

## Forum on DNS Abuse

<http://brussels38.icann.org/node/12513>

**Thursday, 24 June 2010 – 11:00 – 12:30**

[2010-06-24 11::06:23] Doug\_Barton: Hmmmm, the line that the caption pod says should not wrap in the window is wrapping, at least it is on my window

[2010-06-24 11::07:10] Doug\_Barton: (In case anyone cares) :)

[2010-06-24 11::22:16] wseltzer: Layers matter for whether it's in ICANN's scope, even if the end-user doesn't understand the distinctions

[2010-06-24 11::25:18] Doug\_Barton: question for paypal rep when it's appropriate, "Signing with what technology? PGP I hope?"

[2010-06-24 11::27:07] Margie\_Milam: Please indicate in your chat "QUESTION" so I can refer it to the moderator during the Q&A session. Thanks!

[2010-06-24 11::28:05] Jeremy\_Malcolm: Margie: not q uestion, butt I'm not hearing anythin through the phone... hope that' snormal. Can just about follow on the webcast, anyway

[2010-06-24 11::29:51] Margie\_Milam: Jeremy- I'll check with the tech support to see if thats right

[2010-06-24 11::31:14] Jeremy\_Malcolm: OK working now

[2010-06-24 11::31:41] dclosson: ok how about now?

[2010-06-24 11::31:59] Jeremy\_Malcolm: Yes dclosson thanks

[2010-06-24 11::33:42] dclosson: I was not watching the chat...will do so more often

[2010-06-24 11::34:29] Doug\_Barton: Right, because you don't have anything else to do :)

[2010-06-24 11::34:54] John\_McCormac\_HosterStats: QUESTION for Peter Janssen. Cross TLD analysis with gTLDs is quite easy but ccTLDs are the main problem as there is no access to ccTLD zones. Has Eurid considered a realtime cross ccTLD check using DNS rather than zonefiles for new domains?

[2010-06-24 11::38:38] wseltzer: QUESTION: How often are domains put into the Spamhaus blacklist by a third party's malicious abuse of a leegitimately used name (e.g., throwing someone else's real URL into a spamm)

[2010-06-24 11::39:13] wseltzer: QUESTION: Who says all domain names must be semantically meaningful?

[2010-06-24 11::45:59] Doug\_Barton: Thanks

[2010-06-24 11::48:25] John\_McCormac\_HosterStats: thanks

[2010-06-24 11::48:38] →<sup>a</sup> Antoin joined the chat room.

[2010-06-24 11::49:01] Jart: QUESTION: RE; eurID - DOES THIS MEAN THE REGISTRY NOW TAKES RESPONSIBILITY FOR THE DOAMIN ABUSE, RATHER THAN THE REGISTRAR?

[2010-06-24 11::54:32] wseltzer: thanks Margie

[2010-06-24 11::57:14] John\_McCormac\_HosterStats: QUESTION Is there a possibility of a domain block list that could be circulated to the registrars by the registry?

[2010-06-24 11::58:18] Jart: Good on dialog re: registry / registrar - domain abuse - when?

[2010-06-24 12::21:39] Margie\_Milam: Jeremy- Marc says we need to wrap up your talk

[2010-06-24 12::29:32] Don\_Blumenthal: Margie, I have to log off at 2:30 your time. Can I send a question now, assuming there's time for them, and check the transcript for the answer?

[2010-06-24 12::29:44] Margie\_Milam: hi Don- Yes that is fine

[2010-06-24 12::29:57] Don\_Blumenthal: Thanks. In a sec.

[2010-06-24 12::33:30] Don\_Blumenthal: Clarifiication: defining it for his effort. Thanks.Don

[2010-06-24 12::37:16] John\_McCormac\_HosterStats: QUESTION Is there a possibility of a domain block list (beyond the reserved domains list) that could be circulated to the registrars by the registry

[2010-06-24 12::41:55] John\_McCormac\_HosterStats: thanks

[2010-06-24 12::43:40] Ron: Scribes notes aren't appearing... is it my connection or a glitch?

[2010-06-24 12::44:17] Margie\_Milam: We are having technical difficulties with the scribing but it is back now

[2010-06-24 12::44:31] Ron: Thank you. It just came on.

[2010-06-24 12::47:18] Jeremy\_Malcolm: Thanks Margie, Marc, Heidi and all

[2010-06-24 12::47:24] John\_McCormac\_HosterStats: thanks all - it was an interesting session
