

New gTLD Program Update

<http://brussels38.icann.org/node/12533>

Monday 21 June 2010 – 15:30 – 17:30

[2010-06-21 15::41:57] Robert_Hoggarth: Welcome to the session everyone!

[2010-06-21 15::43:13] Robert_Hoggarth: kurt advises me that the Q&A will take place at the end of the session, but I will collect a queue throughout the session

[2010-06-21 15::53:25] Karla_Valente_2: there will be 1 hour Q&A at the end of this session. Please submit your questions asap.

[2010-06-21 15::55:33] Erick_Iriarte: Hi.. i copy my comment

[2010-06-21 15::57:40] Karla_Valente_2: thank you, Erick

[2010-06-21 16::03:03] Erick_Iriarte: thanks to you.. i sent by email to the comments (was publicated) but nobody answer that was received :)

[2010-06-21 16::03:33] Charles: How the clearing house data will be built please?

[2010-06-21 16::04:01] Charles: compiled from the different Trademarks databases or there is faster way

[2010-06-21 16::04:38] Cory_Schruth4235: Test

[2010-06-21 16::08:39] Karla_Valente_2: got your question, Charles.

[2010-06-21 16::12:34] Karla_Valente_2: Erick: do you mean you sent your comments to the public forum for the Applicant guidebook version 4?

[2010-06-21 16::13:30] Cory_Schruth4235: Yes of course!

[2010-06-21 16::13:46] gpmgroup: thanks

[2010-06-21 16::14:24] Charles: thanks Karla

[2010-06-21 16::15:21] Karla_Valente_2: gpmgroup: you question will be asked to kurt at the end. I can answer that, but it is a bit long.

[2010-06-21 16::21:24] gpmgroup: That's great thanks Karla

[2010-06-21 16::43:49] Robert_Hoggarth: Q&A time everyone. Karla will be delighted to read them out for you. please label any post as QUESTION or COMMENT to make sure we don't miss it. In queue so far, erik iriarte, charles and gpmgroup

[2010-06-21 16::44:13] Erick_Iriarte: thanks robert

[2010-06-21 16::47:04] Charles: thanks

[2010-06-21 16::48:54] evan_leibovitch: test

[2010-06-21 16::49:08] Bob_Connelly11414: Hello

[2010-06-21 16::51:01] gpmgroup: non substantive review leads to problems too

[2010-06-21 16::51:04] gpmgroup:
<http://curia.europa.eu/jcms/upload/docs/application/pdf/2010-06/cp100051en.pdf>

[2010-06-21 16::51:49] Jim_Fleming: QUESTION Is ICANN aware that industry-wide software/hardware changes will likely render your plans moot ? Example: You are focused on DOS and users will be on Windows by the time you finish your studies.

[2010-06-21 16::57:36] Bob_Connelly11414: Hello

[2010-06-21 17::06:15] Karla_Valente_2: jim, there was laughter in the room ;-)

[2010-06-21 17::07:08] Karla_Valente_2: ALL: if you have more questions, statements, please let me know asap.... he line is short :-)

[2010-06-21 17::08:49] Bret_Fausett: I strongly support Mr. Van Couvering's comment.

[2010-06-21 17::10:22] DKI: Hi Karla, My name is David Cowen, and my question is: It is likely that further delays will occur in the new gTLD process. Why are IDN gTLD's disallowed to continue and finalize regardless of the ASCII gTLD process, at least in the countries where idn.idn ccTLD's are live, the way it is now is clearly an unfair advantage to the community. Thank you.

[2010-06-21 17::11:49] John_McCormac: Question: Is there any sunset process to deal with redelegation of new gTLDs that fail commercially?

[2010-06-21 17::12:21] Patrick_Jones: John, there is a section in the Guidebook on registry transition/termination

[2010-06-21 17::13:23] John_McCormac: thanks Patrick - the performance of some of the present gTLDs brought the question to mind.

[2010-06-21 17::14:01] Jim_Fleming: KV: Good or bad as it may be the software/hardware changes coming to DNS and IPv* are in progress & can not be stopped. Internet@TV is now being installed in consumer's homes. That may be the "First Internet" a young person sees. People's .KIDS may not understand the ICANN Community or Process.

[2010-06-21 17::15:54] Patrick_Jones: John - see Module 5 of the Guidebook, there is an explanatory memo

[2010-06-21 17::16:06] gpmgroup: <http://domainnamewire.com/2010/04/12/new-top-level-domain-trademark-frontrunning-battle-heats-up/>

[2010-06-21 17::16:21] Karla_Valente_2: Jim: I hear you!

[2010-06-21 17::17:01] Karla_Valente_2: David: got your question

[2010-06-21 17::18:09] John_McCormac: Karla, Patrick's answer is fine.

[2010-06-21 17::18:45] Karla_Valente_2: ok, let me know

[2010-06-21 17::19:42] Bret_Fausett: No, you don't get a preference for a generic domain name because you were the first to put up a website, sponsor a meeting, or file a trademark application.

[2010-06-21 17::19:52] →^a lightIRC_6589 is now known as George_Kirikos.

[2010-06-21 17::19:54] George_Kirikos: Hi folks. :)

[2010-06-21 17::20:36] gpmgroup: Hi George

[2010-06-21 17::21:31] George_Kirikos3069: Hello.

[2010-06-21 17::22:35] →^a lightIRC_2029 joined the chat room.

[2010-06-21 17::22:56] George_Kirikos3069: Here's a question for ICANN: Has anyone read the document by Tim Berners-Lee, titled "New TLDs considered harmful" <http://www.w3.org/DesignIssues/TLD>

[2010-06-21 17::24:42] Ryan: @gpmgroup: I think this was the referenced article: http://www.circleid.com/posts/20090819_new_gtlds_let_the_gaming_begin_part_1_tld_front_running/

[2010-06-21 17::24:47] Bret_Fausett: For the .MUSIC team, they should know that not everyone who has been following this process and participating in the ICANN process is public. You get no priority because you decided to go public. Public v. stealth mode has never been an evaluation point.[2010-06-21 17::24:52] hta: Kirikos, Tim was specifically talking about .xxx and .mobi.

[2010-06-21 17::25:33] George_Kirikos3069: Wrong -- read the entire document, including the title bar.

[2010-06-21 17::26:35] John_McCormac: There is a distinct danger that many new gTLDs will turn into zTLDs - zombie TLDs.

[2010-06-21 17::26:40] Karla_Valente_2: all: we have only 10 minutes left. I believe I got all your questions/comments on record. Thank you all for your participation. Please go to the comment forum to share your thoughts and join the tuesday and wednesday sessions on new gTLDs

[2010-06-21 17::26:49] George_Kirikos3069: Did you get mine, Karla?

[2010-06-21 17::27:08] Karla_Valente_2: sorry, george. I will try

[2010-06-21 17::27:19] George_Kirikos3069: Thanks, Karla.

[2010-06-21 17::28:35] Jim_Fleming: KV: Thank you for your help and understanding. In my opinion, the hill gets very steep from here and the rocks, cliffs and dragons on the other side are worse.

[2010-06-21 17::28:43] George_Kirikos3069: Fortunately, remote participants can't smell the odor in Brusells. :)

[2010-06-21 17::28:44] hta: george, xxx is in fact referenced ONLY in the title / intro. He gives no specifics about that. Most of his 2004 rant was about the idea of segregating mobile devices on the Web.

[2010-06-21 17::28:48] gpmgroup: @ryan thanks

[2010-06-21 17::29:32] Bob_Connelly11414: Who is in front of the camera

[2010-06-21 17::29:46] George_Kirikos3069: lol No comment beyond that? Sheesh.

[2010-06-21 17::30:29] George_Kirikos3069: Bye for now.

[2010-06-21 17::30:34] John_McCormac: were you expecting anything different George?

[2010-06-21 17::30:40] Bob_Connelly11414: What's next and when?

[2010-06-21 17::31:46] Robert_Hoggarth: bob Proposals for Improvements to the RAA Monday, 21 June 2010 - 17:30 - 19:00

[2010-06-21 17::34:09] gpmgroup: Would it be worth making links given in the chatroom clickable? So there was no need to copy and paste

[2010-06-21 17::35:35] John_McCormac: it would be handy but there could be security issues

[2010-06-21 17::36:57] wseltzer: If you use IRC with a reasonable client, you can click away

[2010-06-21 17::37:06] John_McCormac: what is worrying about the whole new gTLD process is that most of the new gTLDs will turn into zombie TLDs if the last ten years is any guide

[2010-06-21 17::38:31] gpmgroup: THanks Wendy thats what I thought - using Adobe perhaps there is a setting

[2010-06-21 17::39:03] Bob_Connelly11414: Is this the right node and room for the RAA discussions?

[2010-06-21 17::39:51] gpmgroup: @john I think pre existing real world communities may be the key like .cat

[2010-06-21 17::40:52] John_McCormac: @gpmgroup yep. They have good pre-existing markets that are very well defined. The city TLDs are the most likely to do well even with ccTLD competition.

[2010-06-21 17::41:38] gpmgroup: problem iwth cities though is like .vegas where there is massive lobbying of local government bodies promising riches

[2010-06-21 17::41:48] John_McCormac: most of the new gTLDS will be heavily dependent on brand protection and there's a trend in some of the newer TLDs that brand protection is not a big concern

[2010-06-21 17::43:30] John_McCormac: the number of doms regged in com/net/org/biz/info/mobi/asia/tel was only 28762 (June 2010)

[2010-06-21 17::43:56] John_McCormac: cross TLD analysis

[2010-06-21 17::45:08] wseltzer: QUESTION: why are there no end-user perspectives represented on the panel?
