DNS Abuse?

- NXDomain-Spoofing
- Any DNS filtering
- Homograph attacks
- Domain squatting
- Cache Poisoning
- Conficker
- Fast Flux
- PayPal
- Inaccurate or unavailable Whois data

Depends on Point of View

- From some perspective, it's all abusive (or at best not in the public interest)

- DNS? TCP? IP? IPSEC? Does it matter?

- Only the cognescenti understand Internet alphabet soup

- We have a responsibility to enhance security, stability, and resiliency

- …. at all layers and where appropriate
