

# DNSSEC Implementation at .CR

ccNSO TechDay

Luis Espinoza S.

CTO – NIC Costa Rica

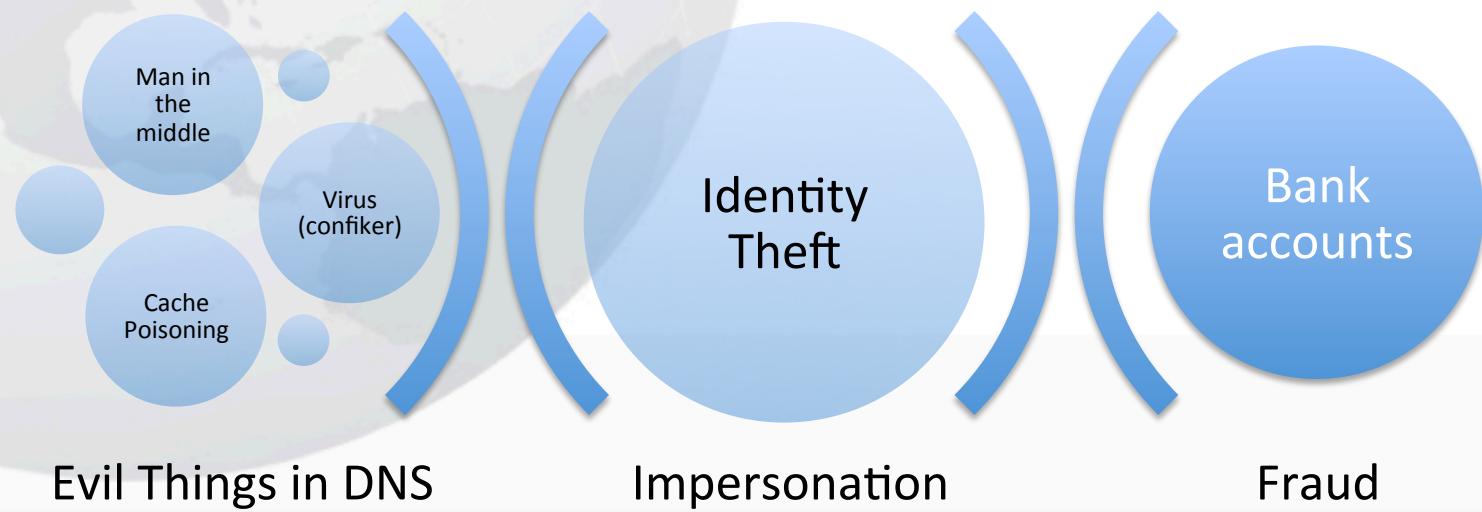

# Agenda

- Introduction
- Planning
- Research and development
- Implementation
- The results.

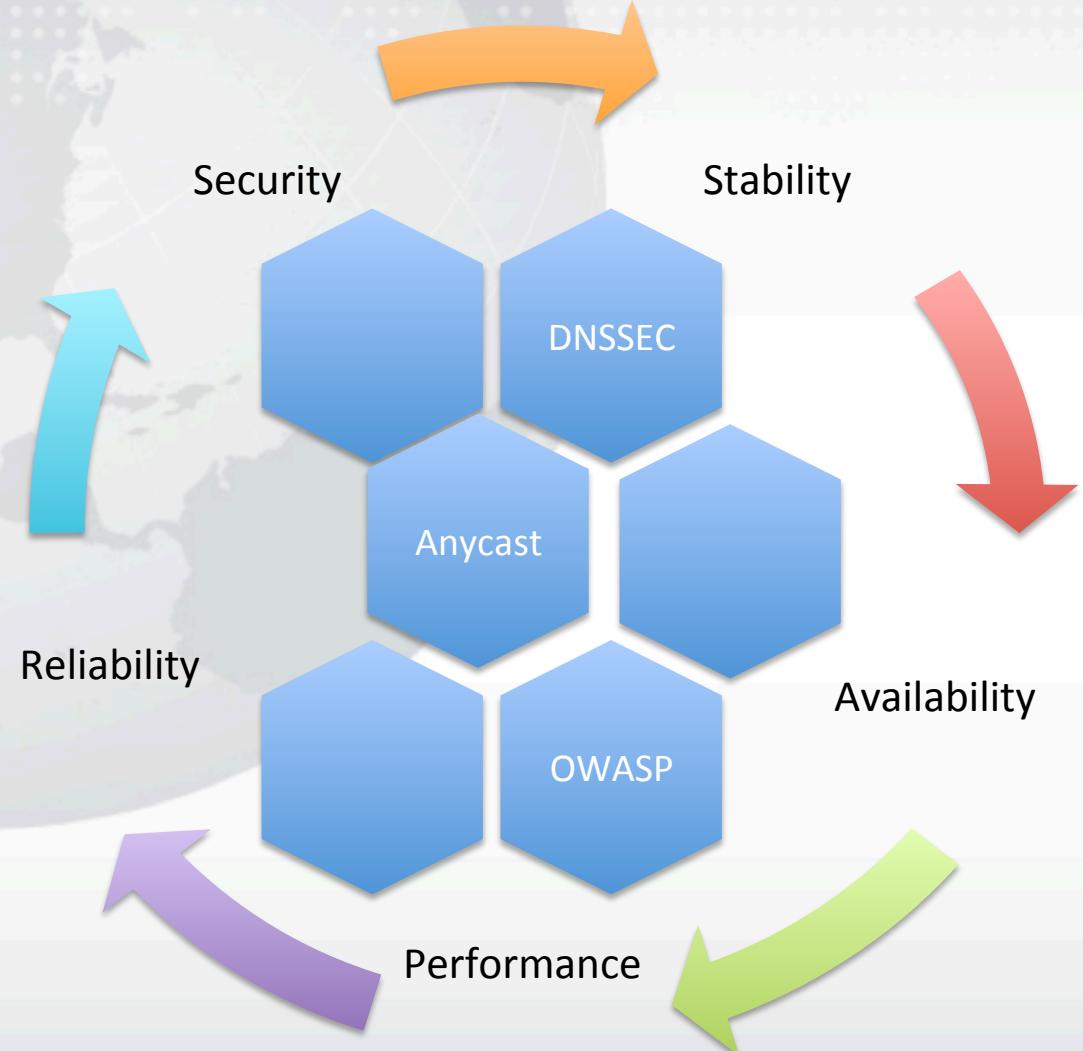

# Introduction

- Evil things come up to DNS:
  - Man in the middle attacks (cache poisoning).
  - Virus (Conficker).
  - Provide: Identity theft (phishing)
  - Results: Bank fraud or worst!

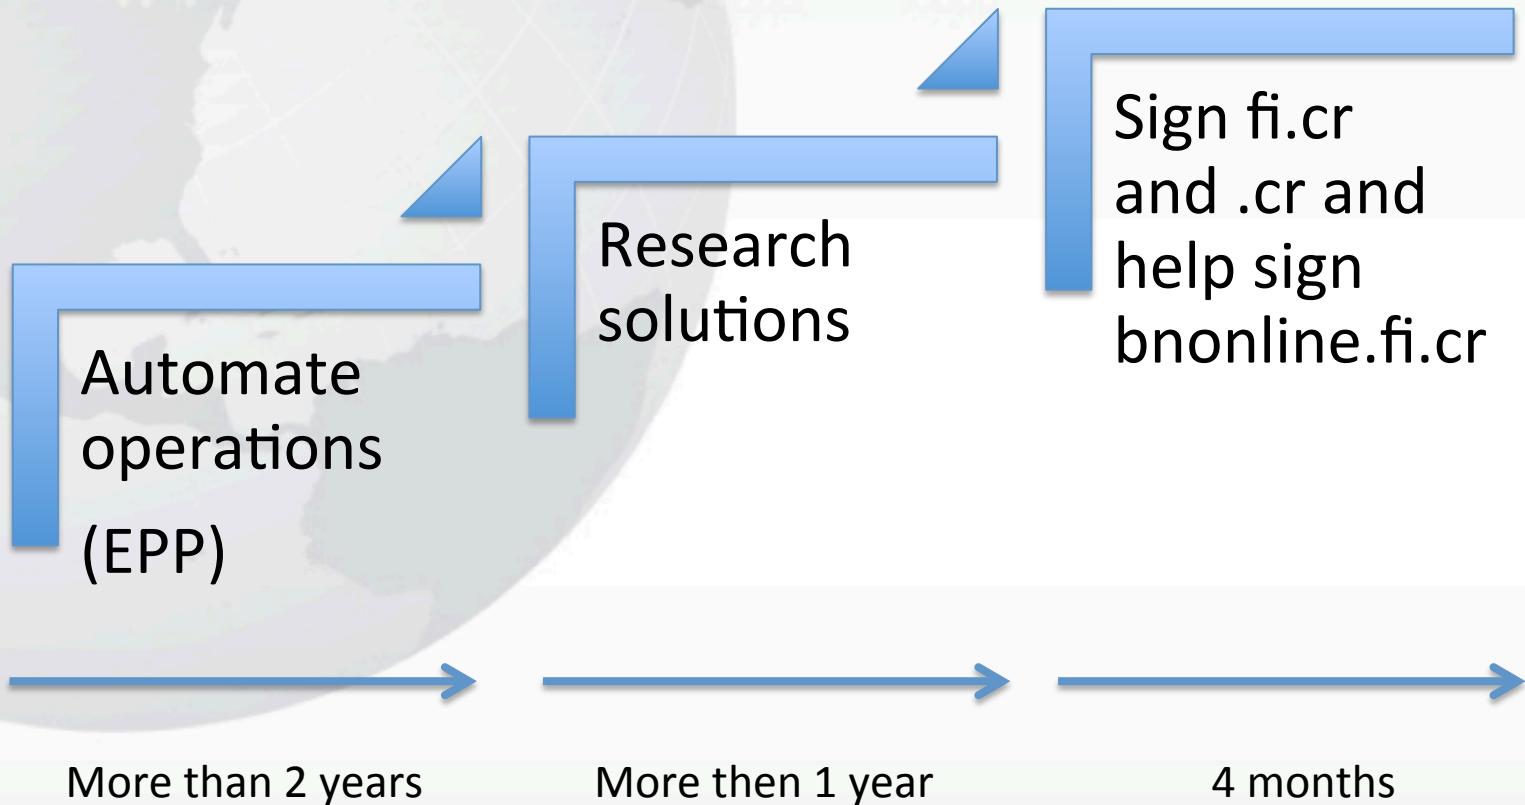

# Introduction

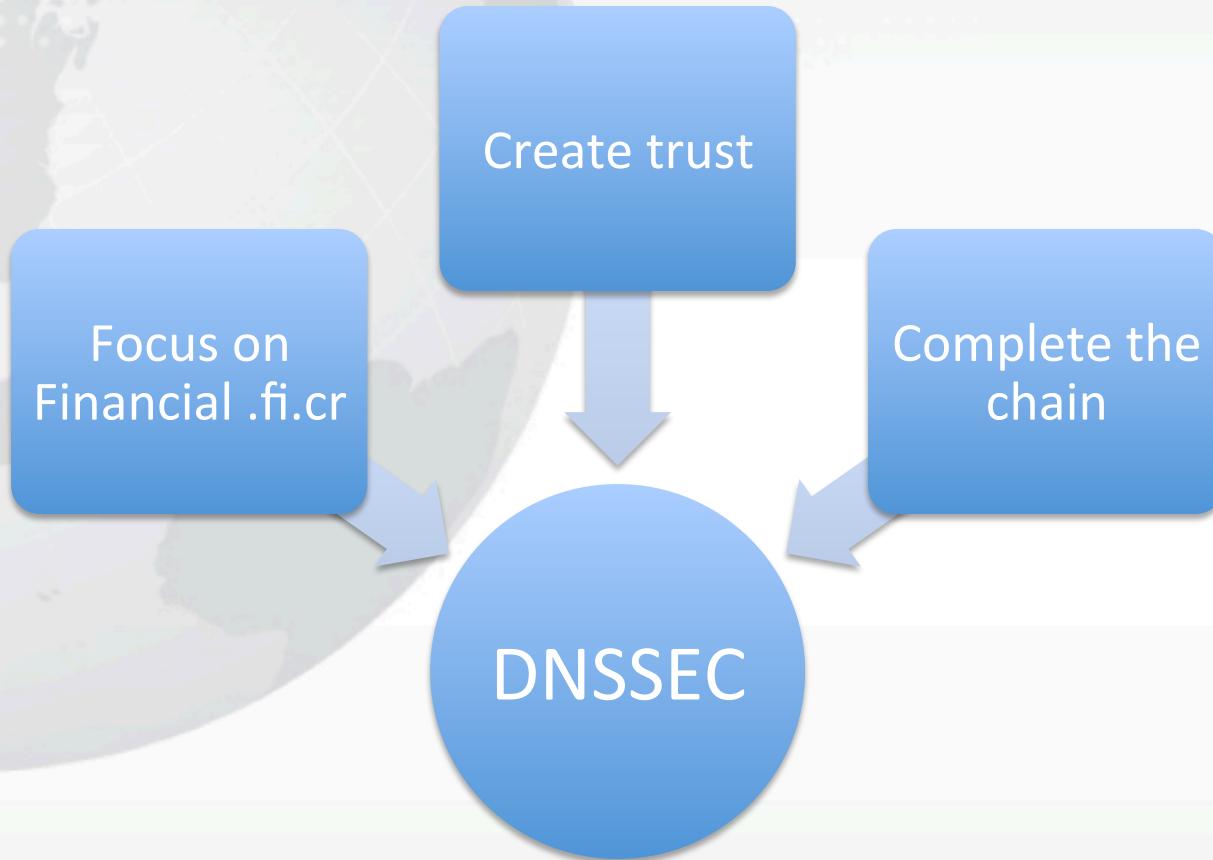

# Introduction

# Planning DNSSEC Deploy

# Implementation

# Implementation details

- Look for an important Bank under .fi.cr to present a pilot project – Banco Nacional de Costa Rica.
- Implement DNSSEC for .fi.cr and chain with .cr, then chain with root-servers.
- Use hardware based solution (new low cost solution based on TPM).
- DNSSEC Policy Statement

# Goals Achieved

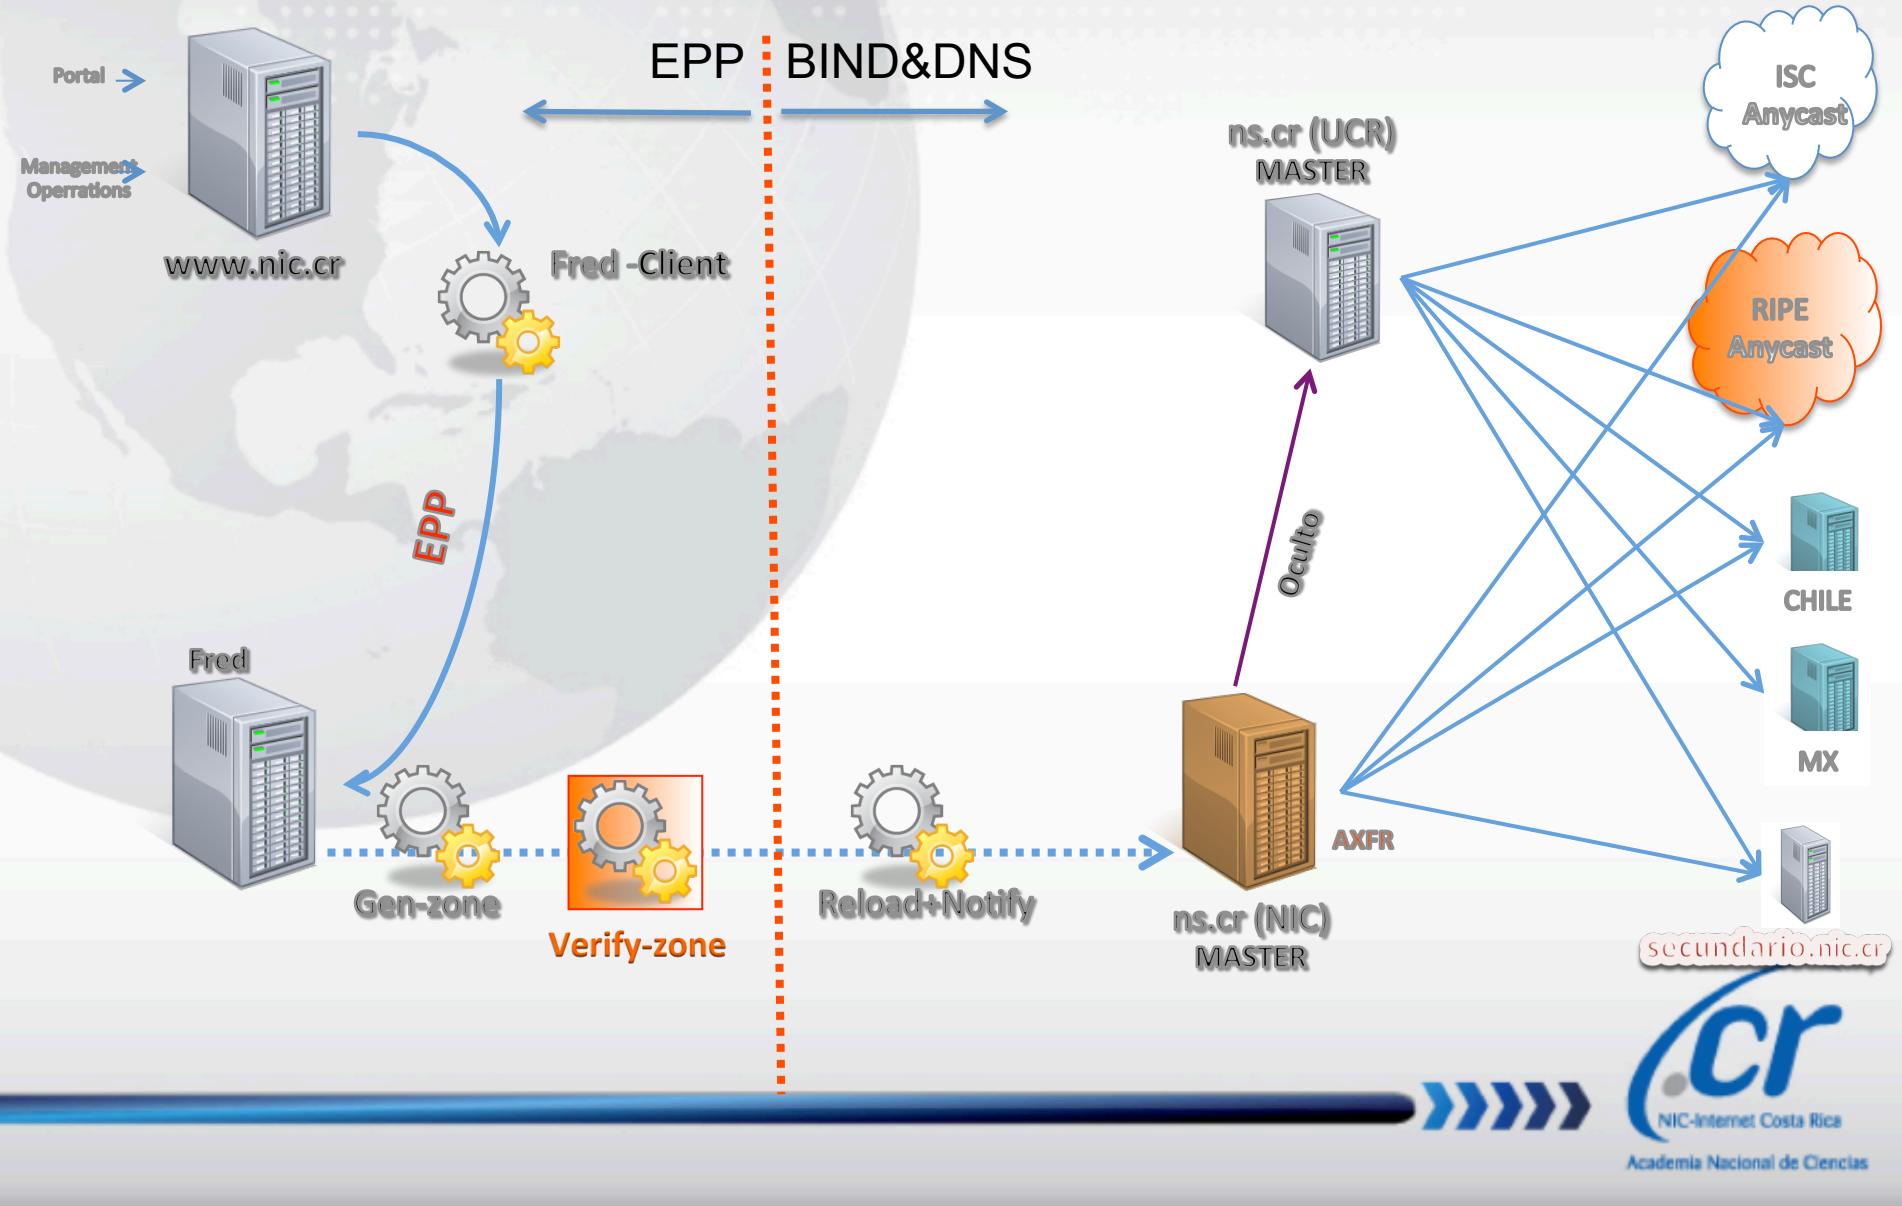

DNSSEC  
awareness

- Banco Nacional embrace DNSSEC

Implement

- Signer using TPM
- Signing and re-signing integrated within work flow
- DPS in Spanish

# EPP - Architecture NIC-CR

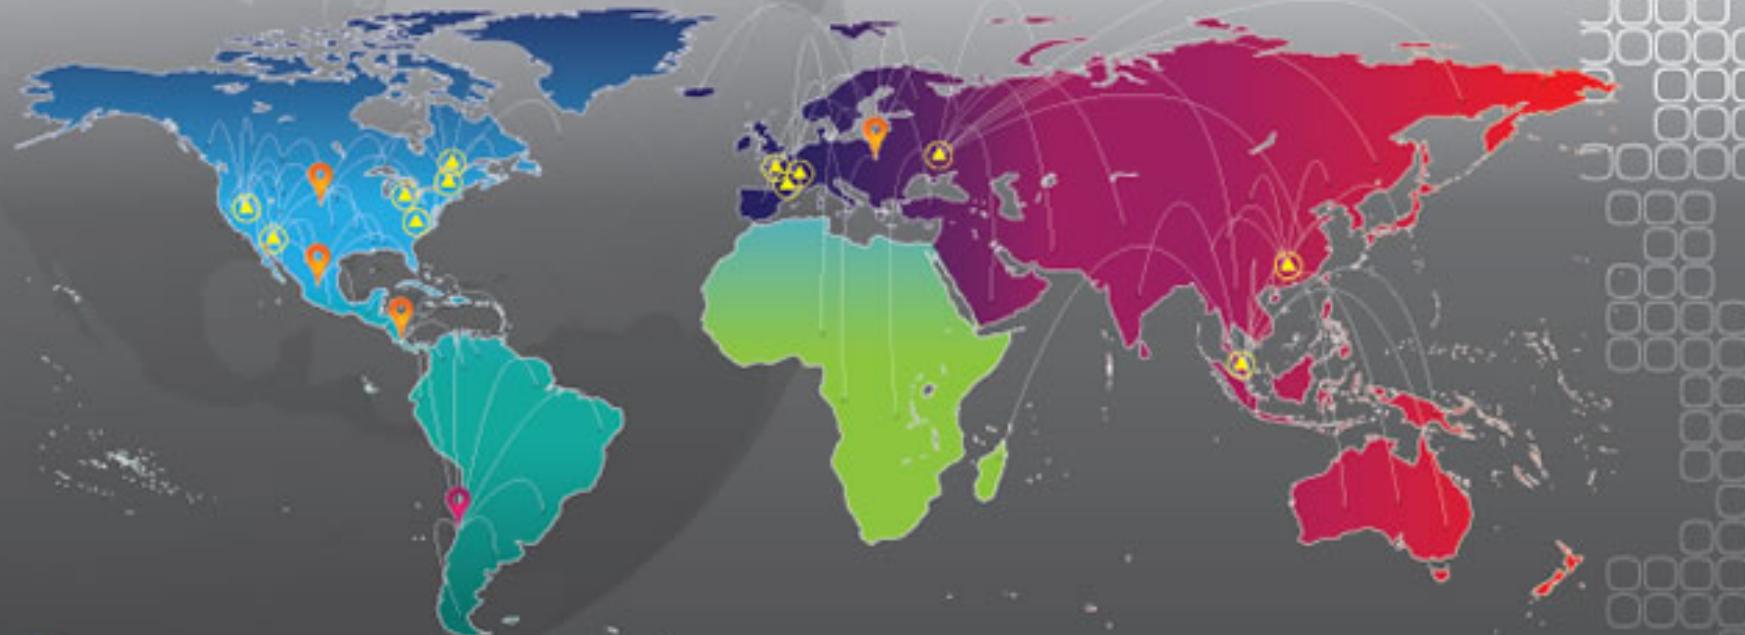

## Secondary Name Servers distribution for .cr

NIC-Internet Costa Rica

Academia Nacional de Ciencias

Basic Coverage: May 2011 - Mexico, USA, RIPE (EU), C.R.

New coverage: Chile

New coverage - Anycast: East Coast, West Coast, Asia, Europe.

NIC-Internet Costa Rica

Academia Nacional de Ciencias

# NIC-CR+DNSSEC

# Main issues

- Cisco firewall:
  - policy-map type inspect dns preset\_dns\_map
    - Parameters
    - message-length maximum 4096.
- Find how to backup TPM keys before place sign in production environment.
- Process to approve and publish DPS.

# bnonline.fi.cr

- Face to face meeting to awareness about the benefits of DNSSEC.
- Technical work session to explain concepts.
- Self signing process and email send of the DS.
- Incorporation of DS of bnonline.fi.cr within db..fi.cr via hourly script (don't use Fred for this yet).

# Checking with dnsviz.net

# DNSSEC Verification

BNCR – Internet Banking

BN Banco Nacional de Costa Rica (CR)

https://www.bnonline.fi.cr/Login/

**Secured by DNSSEC**

Domain name:  
www.bnonline.fi.cr  
is secured by DNSSEC.

Your computer is also secured by DNSSEC for this particular domain, so you are secured against domain name spoofing.

El BN Internet Banking Personal le ofrece herramientas y técnicas de seguridad para ayudarle a reducir el riesgo de que intrusos puedan obtener sus contraseñas de acceso. Sus contraseñas se ingresan por medio de un Teclado Virtual y se requiere el uso de los dispositivos para la generación de claves aleatorias (OTP) para disfrutar en forma completa de los servicios de transferencias de BN Internet Personal.

Le recomendamos visitar el sitio de Ayuda disponible en todo momento en la parte superior derecha de su página. Si alguna de sus dudas no es resuelta con este sitio, le solicitamos comunicarse con el Centro de Llamadas del Banco Nacional en el teléfono 2211-2000.

Recuerde que el Banco Nacional NO tiene como política, solicitar a sus clientes información confidencial, como claves de acceso a Internet o los números de tarjetas de crédito o débito, a través de correo electrónico o llamadas telefónicas. Si recibe un correo solicitando esta información, le recomendamos borrarlo de inmediato y NO ingresar a los sitios (links) referenciados.
