Digital Engagement

NO.47 - 14-18 JULY 2013

Continuum of Engagement

General Interest

Engaged

Highly Involved

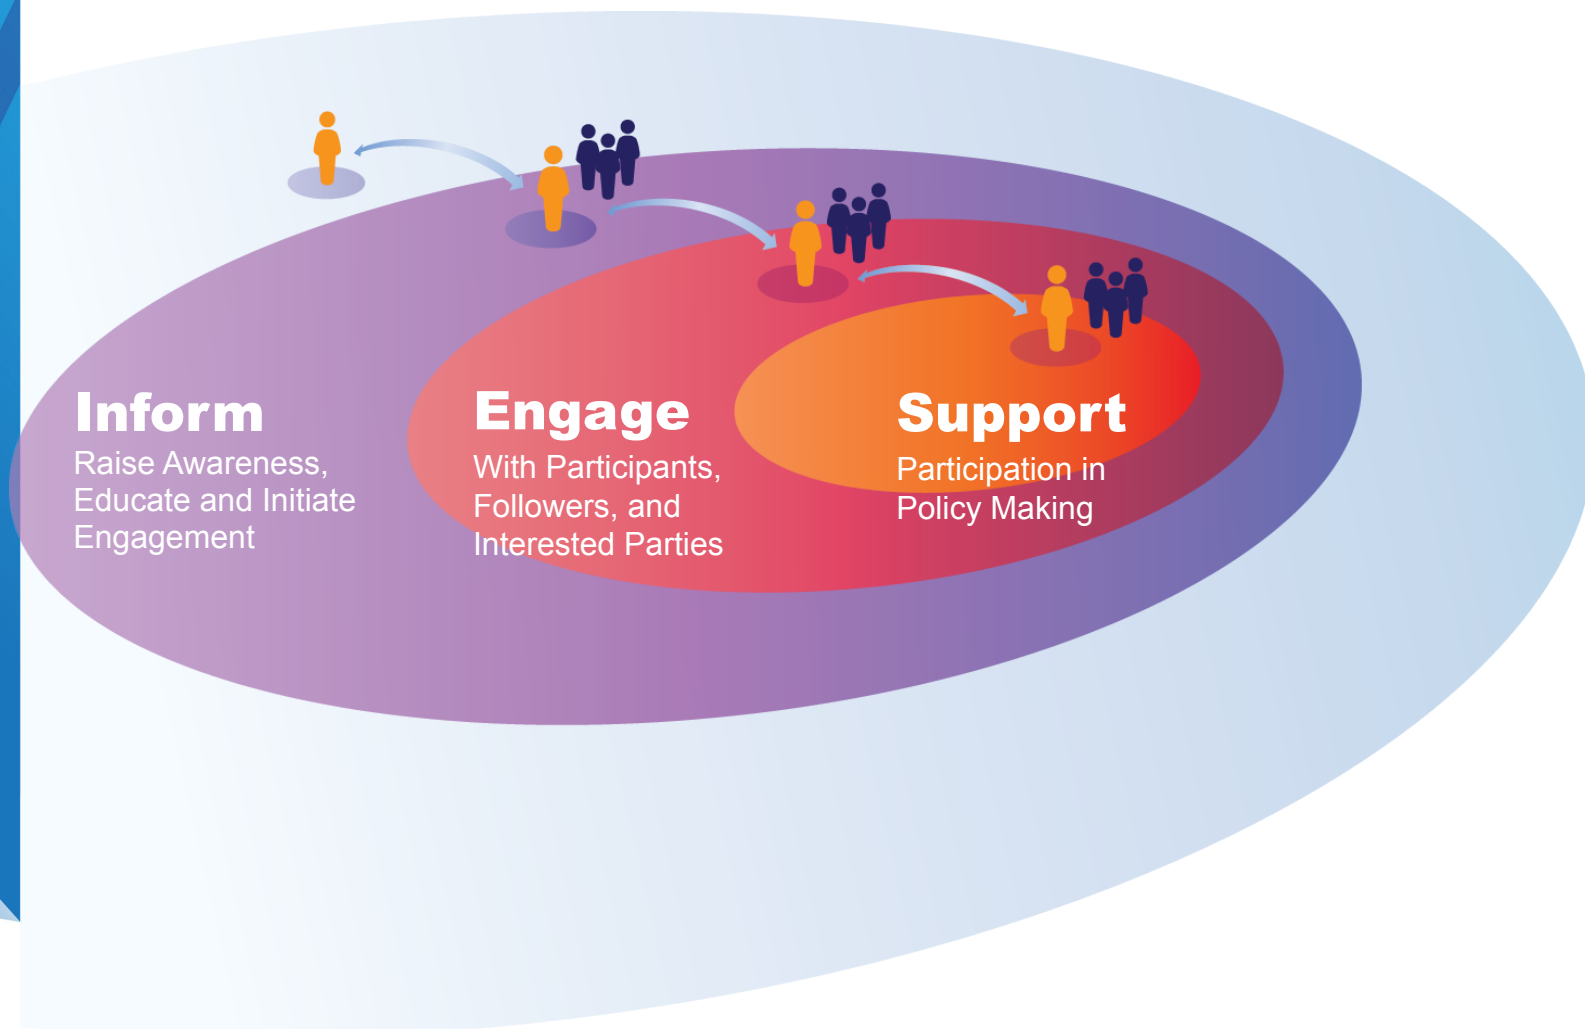

People move left or right along this continuum of engagement depending on personal and professional factors

- Move at different speeds
- Stop where ever appropriate
- Engagement varies by topic

There must be no artificial barriers preventing people from moving from left to right

Engagement Model

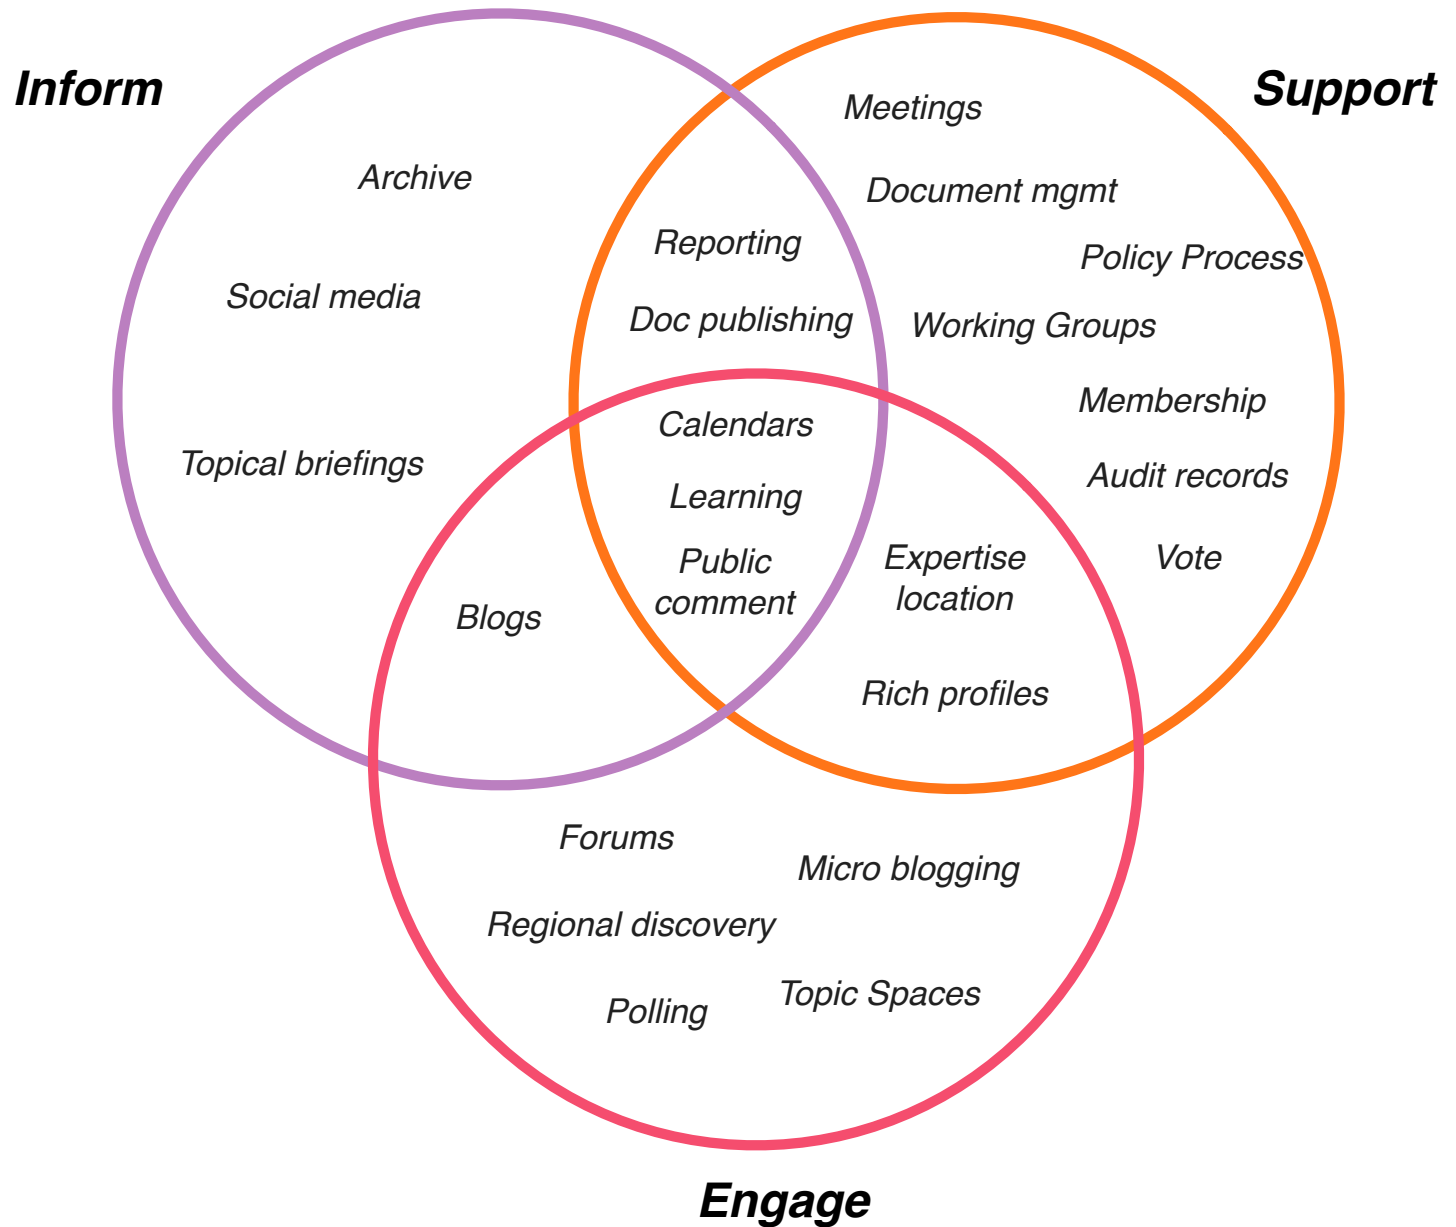

Digital Engagement at ICANN Today

Digital Engagement at ICANN Tomorrow

Experiences: A model for digital engagement

Questions

As we ramp up our digital innovation efforts, we asked ourselves how we could innovate in a way that stays true to ICANN's organizational values?

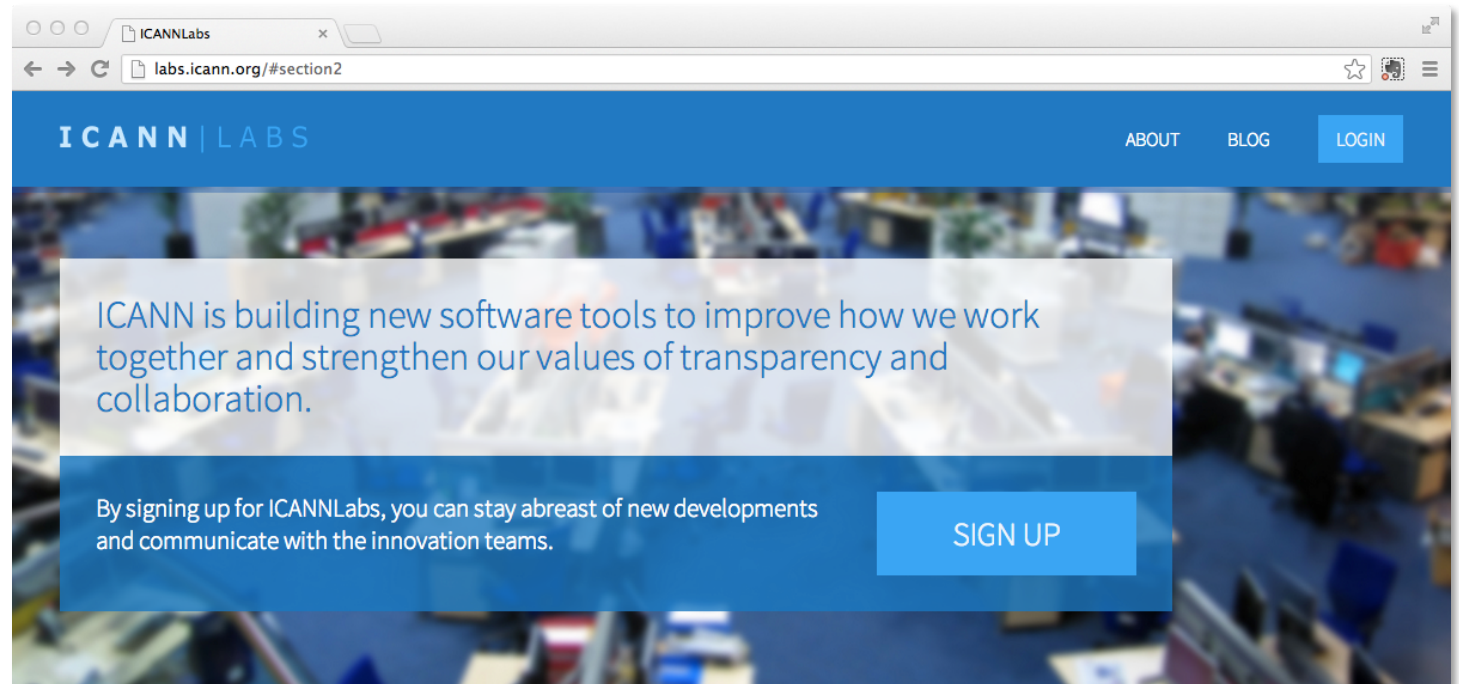

How could we transparently develop applications with bottoms-up participation?

Where could we test and prototype new ideas without disrupting vital work or causing confusion?

How do we maintain organizational flexibility?

Can community members or other organizations tap into this model?

ABOUT BLOG LOGIN

ICANN is building new software tools to improve how we work together and strengthen our values of transparency and collaboration.

By signing up for ICANN Labs, you can stay abreast of new developments and communicate with the innovation teams.

SIGN UP

Letter from Fadi Chehadé

The success of ICANN's multi-stakeholder model hinges on bottom-up, community-driven policy and for that success to continue we need to increase our reach and relevance to new digital audiences hitting the web. So we have asked ourselves how we could innovate in a way that stays true to those organizational values, but can help us engage and communicate in new ways - and that led us to ICANN Labs, our open innovation platform.

Today, we are inviting participants to sign up and indicate the early areas of interest, so that they can be the

Digital Engagement Phases

Phase 1: 4 Tracks

- Social media and Push Publishing: How social features can increase awareness of governance topics (e.g. activity feeds, notifications, social subscription).
- Community & Conversation Tools: Rethinking how conversations happen on ICANN.org, focusing on modern discussion forums that work across devices/platforms and integrate social media.
- Resources and Education: Exploration of new online models (fully integrating the Online Learning Platform).
- Discovery and Personalization: Richer member profiles that track meaningful activity, and personalized recommendations based on contributions.

What's Next

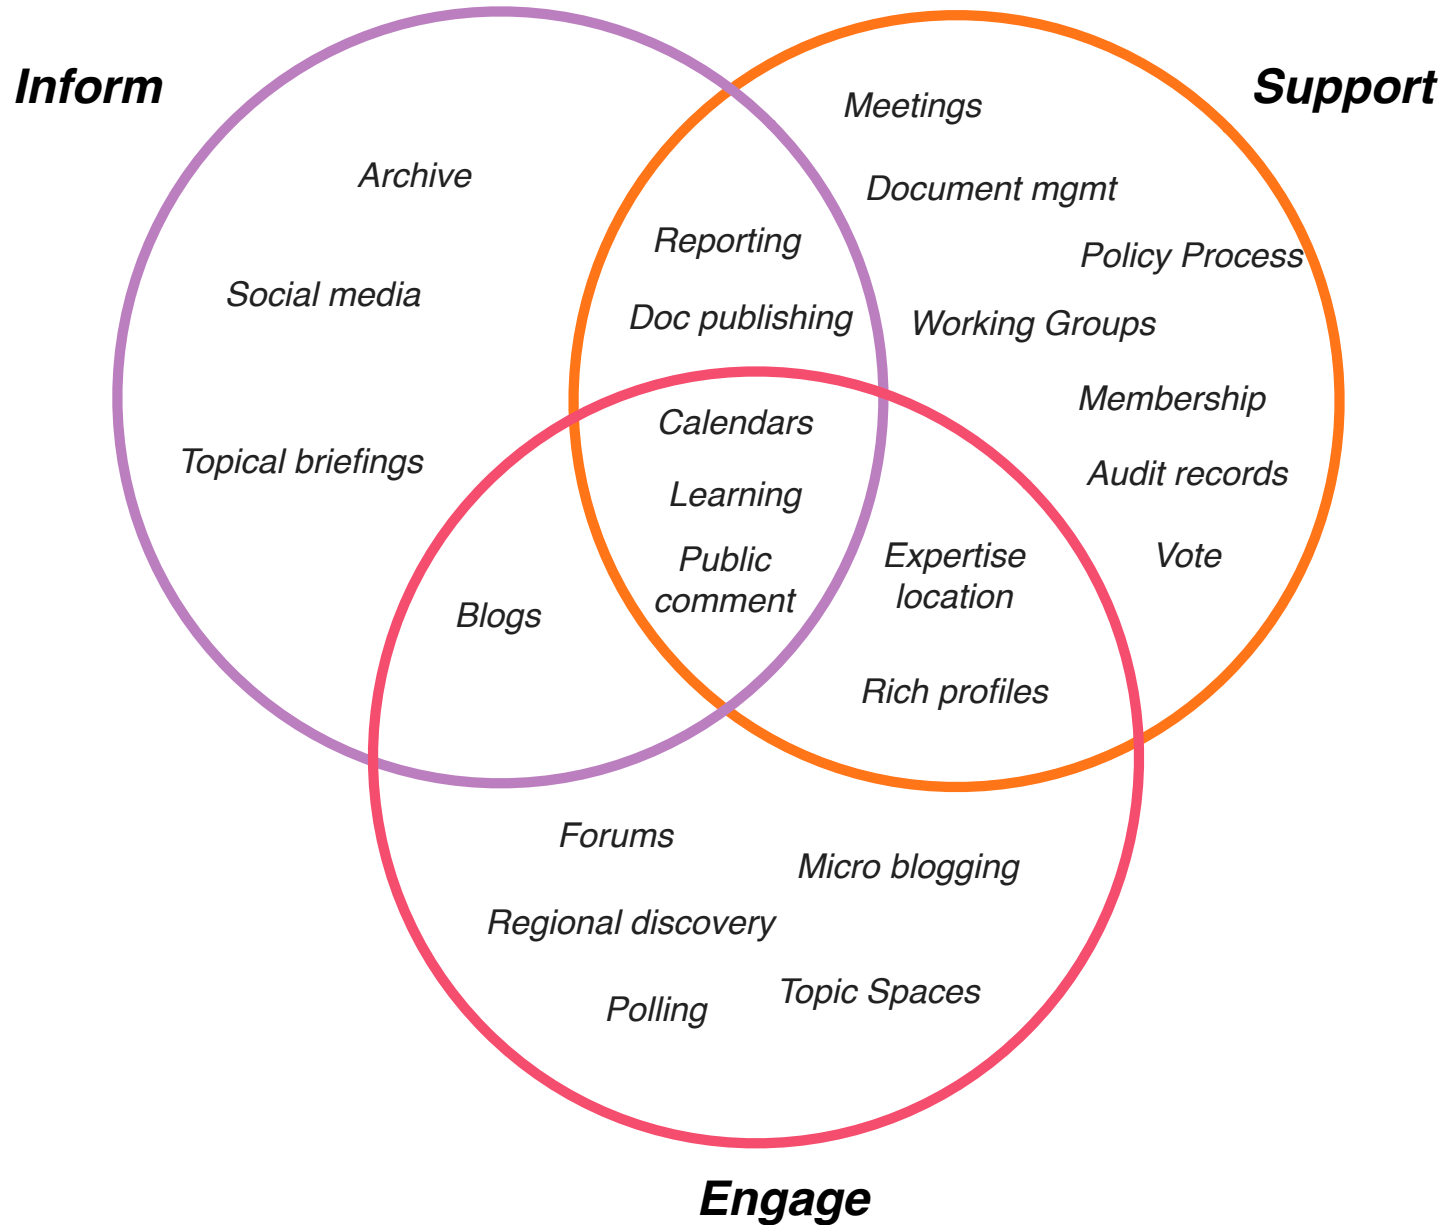

- ICANN Labs launch
- August – Mid-September: research and prototyping
- September – Early October: report on findings
- October – Early December: use findings to develop new production services

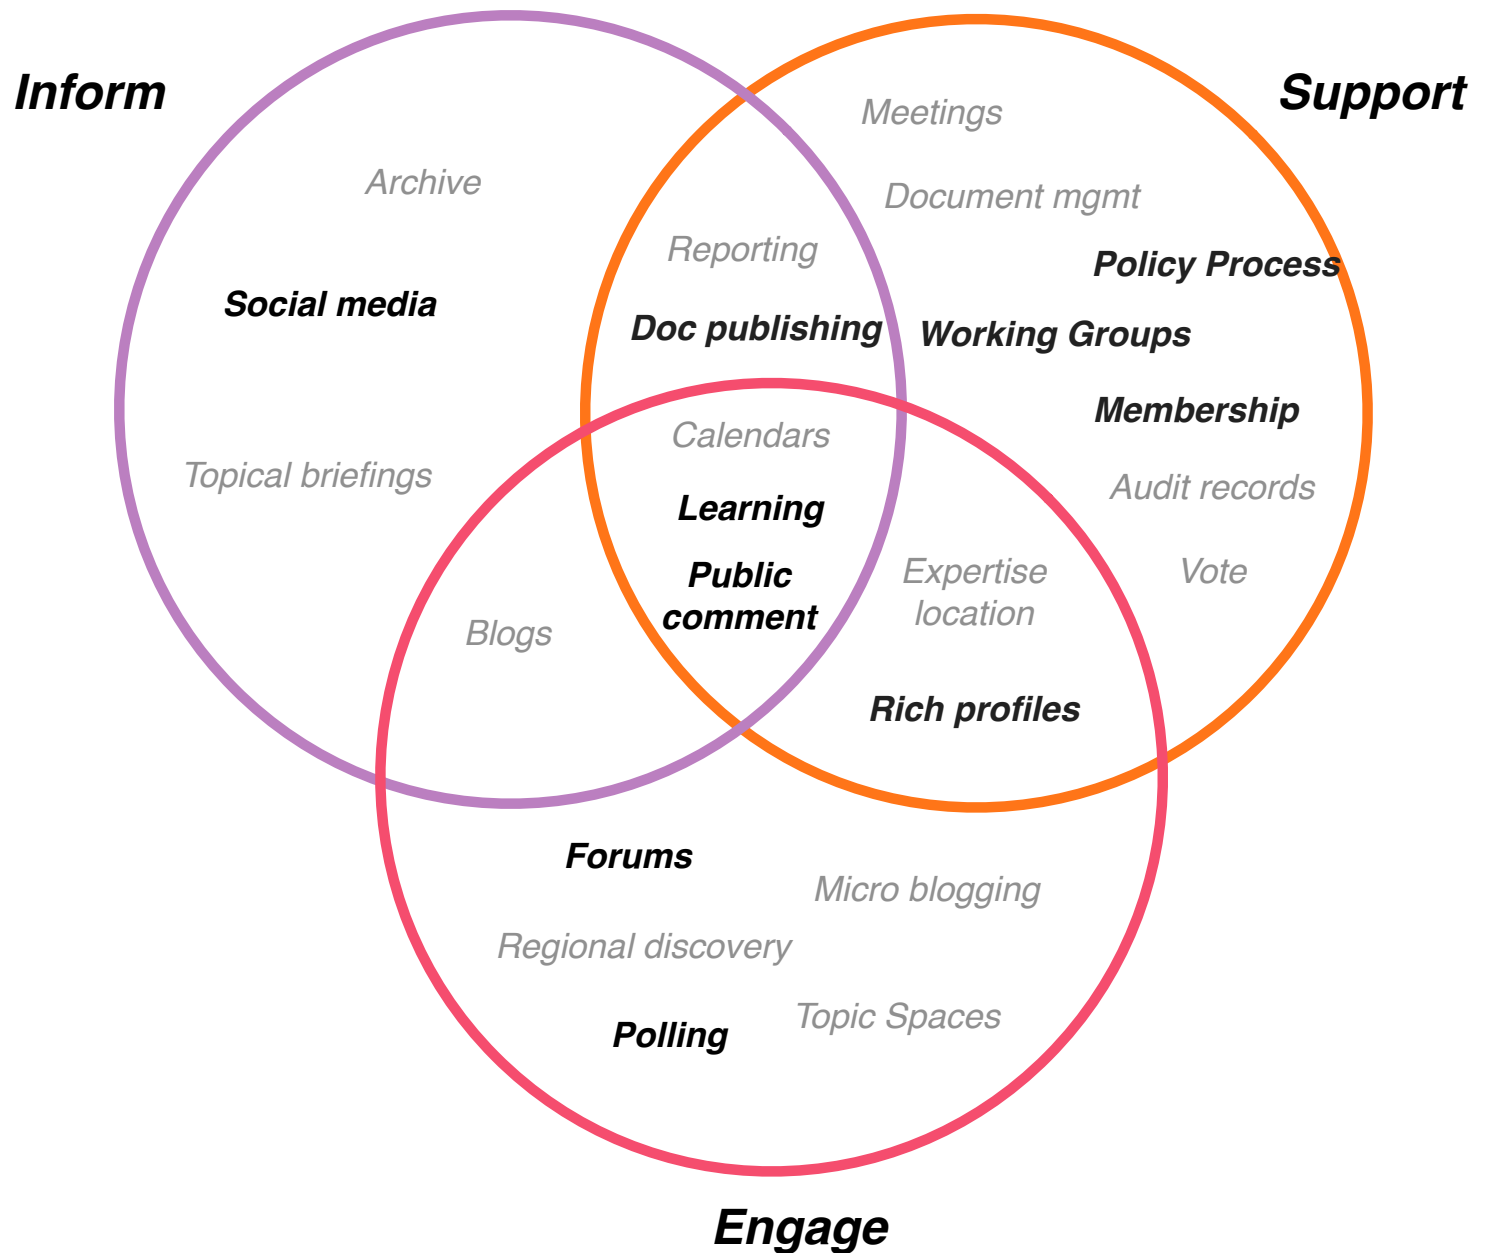

Open ICANN

Experiences: A model for digital engagement

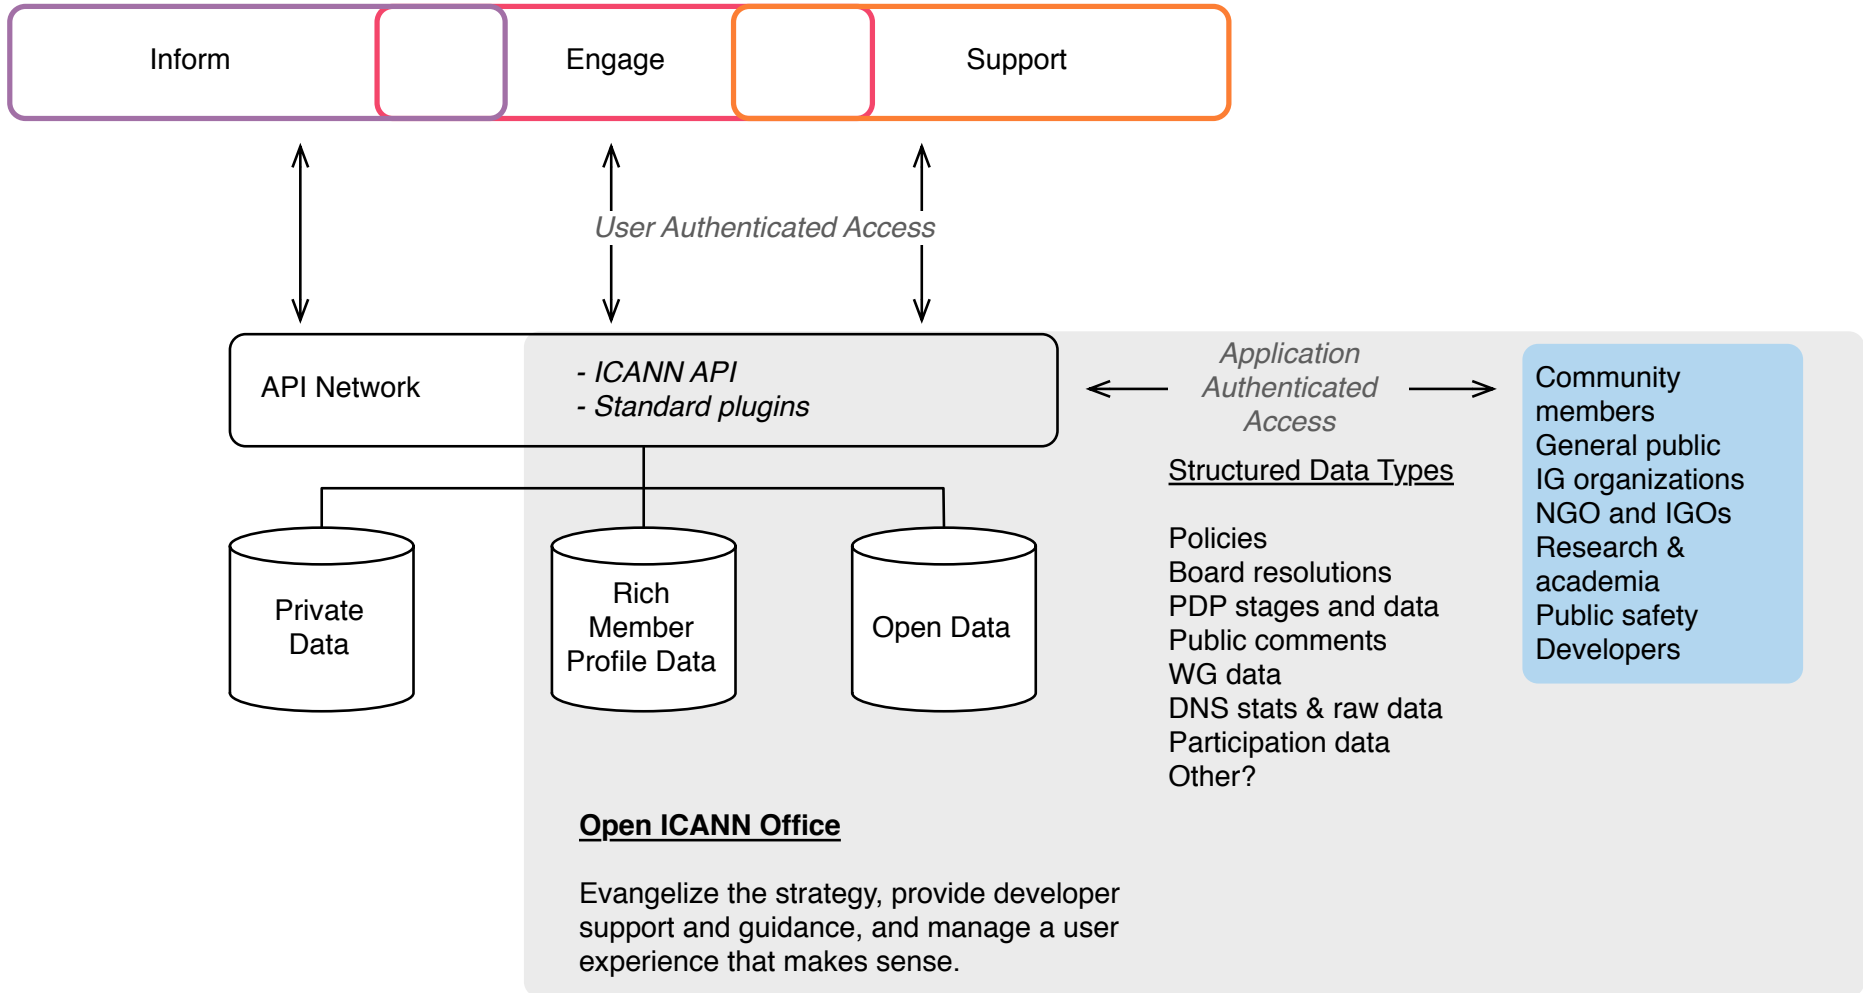

Focus on Core Experiences

Open ICANN

ICANN Web Assets

Benefits

- Aligned with organizational values.
- Transparent, open, and collaborative.
- Flexible for ICANN, community members, and constituencies, and all stakeholders.
- Cost effectively develop services while maintaining an overall user experience that makes sense.

Next Steps

- We're still in early phases of articulating and introducing the concept and broad ideas.
- Work will begin in earnest in September
- Proposed requirements, project plan and timeline to be issued in September.

ICANN's Digital Footprint

User-led digital strategy: Delivering accessibility, not exclusivity

A digital platform which is visible, using plain terminology and multiple languages

An engagement platform which encourages participation, has shared standards and processes

Transparency and reach delivered through shared data, APIs and social feeds

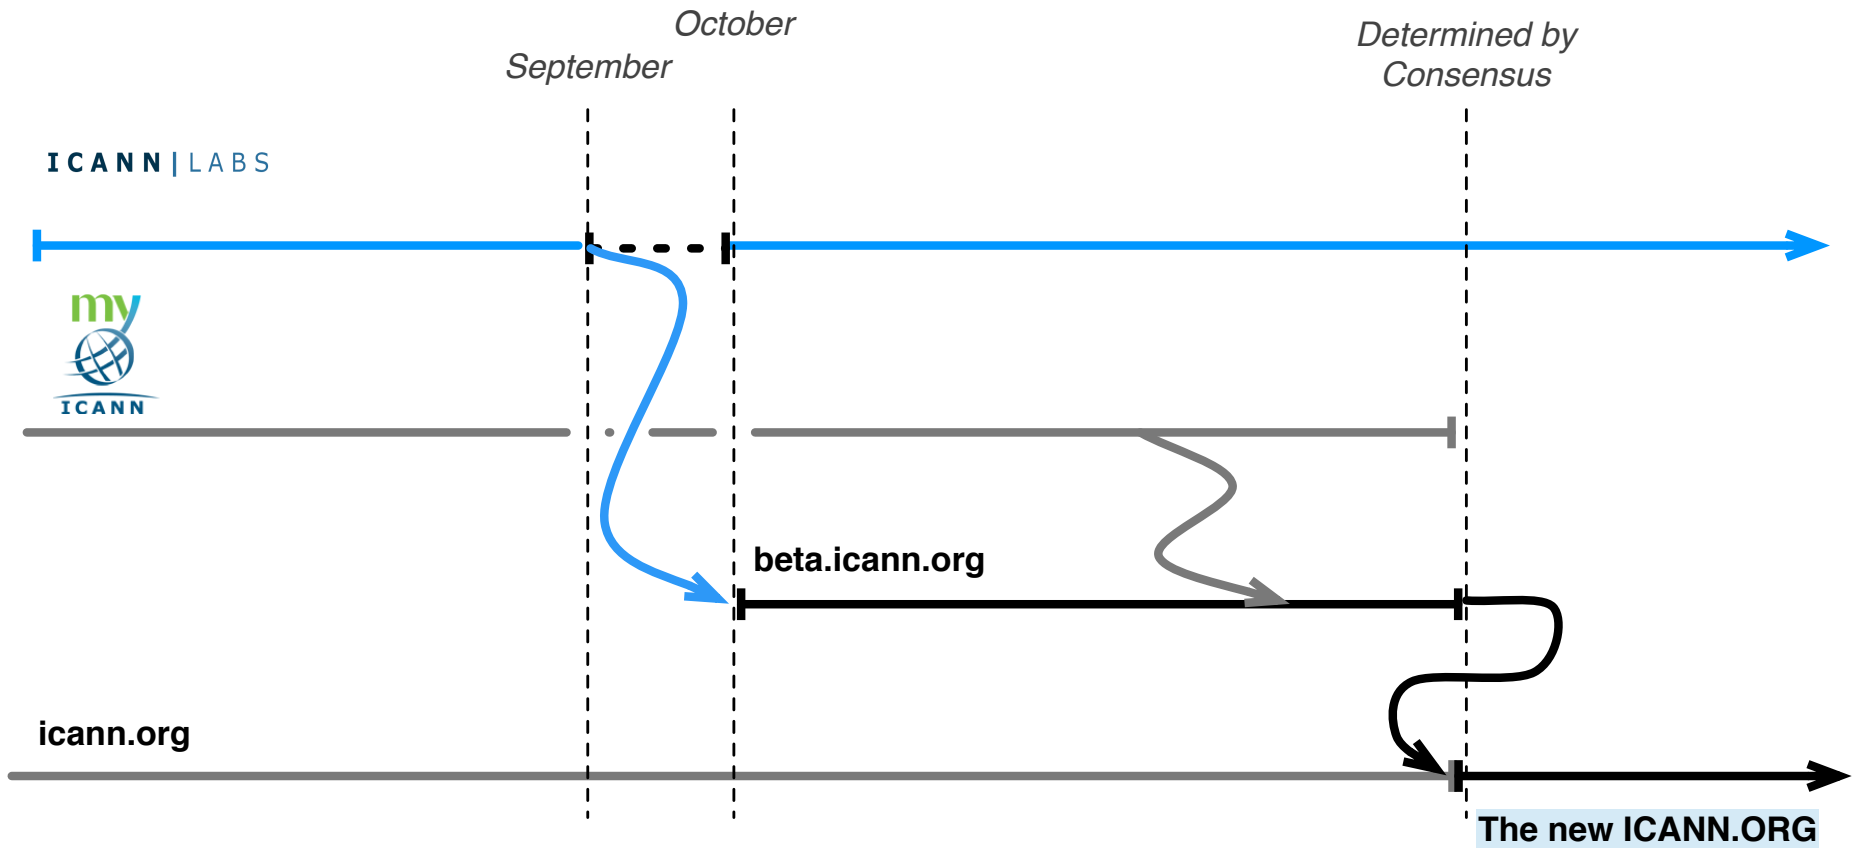

Delivers to a much wider audience, with a much broader demographic, using tools and platforms that those audiences are used to. And building iteration after iteration.
