---

[14:06] Roland: Anyone know where the IGF meeting is?

[14:07] Christopher: Hi! is this the IGF meeting? The agenda page is still showing 9 March. CW

[14:07] Arturo\_Herr: Would like to know how ITG & ISMS are being promoted as security and public awareness programs (strategies)

[14:07] Roland: Chris Disspain is chairing, and so it has to be some kind of ccNSO meeting... IDNs by the sound of it

[14:08] Mandy\_Carve: Aberdere

[14:10] Roland: We seem to have two sets of sound...

[14:10] Roland: There's Japp on the phone talking about IDNs, plus Alice has just started

[14:10] Mandy\_Carve: IGF is in Aberdere

[14:11] Roland: Yes, but we can hear sound from a different meeting

[14:11] Siranush\_Va: this is Aberdere, isn't it?

[14:11] Roland: At the same time as sound from Aberdere

[14:12] Mandy\_Carve: IT is working on the sound feed problem

[14:13] Roland: OK, I've switched off the separate audio feed and am now getting just Lesley.

[14:31] mib\_xt8uwk: the volume of the sound is terribly low, even when I put it to the max on my side

[14:32] Mandy\_Carve: we are asking IT to look at the volume question

[14:34] mib\_xt8uwk: @Mandy\_Carver - thank you!

[14:39] Christopher: Volume OK in Brussels. Initial stutter and echo has been corrected now. CW

[14:43] mib\_xt8uwk: I tried real player, windows media player, I have to put my speakers at max in order to hardly hear. I am in the USA, it must be something against the Americans...

[14:44] Mandy\_Carve: we will try again on the volume

[14:44] Brandon\_TEC: I am looking into the issue with the stream now..

[14:47] mib\_xt8uwk: Thank you. I can hear it, but it is at max on all places - volume control, player, and wave, and speakers themselves. if suddenly you change it, it may be really loud.

[14:55] Mandy\_Carve: If individuals following in the remote chat have questions please write them in the chat and I will read them to the chair

[14:56] mib\_xt8uwk: Question to Mr. Kumer: What is the position of the Secretariate vis-a-vis the ITU's role in governing the Internet?

[14:58] mib\_xt8uwk: the sound now is better

[14:59] Arturo\_Herr: Would it be suitable to develop an Earth's ITG "eartheration" based on the federal system where: 1) Global strategies and policies are developed by International stakeholders (i.e. Intl. organizations, ICANN, IT community & alike); 2) Policies & strategies are adjusted at a National+Regional level (stakeholders: National Govs., Regional Orgs., Nat. ITGF, Private sector & alike); and 3) ad-hoc policies & strategies are identified for specific I

[15:03] Mandy\_Carve: The chair is taking questions in groups and then answering them in sequence - I have your question and will submit it once they complete this first set of questions

[15:05] Mandy\_Carve: In your question what word follows specific? I only see the letter I

[15:05] mib\_xt8uwk: Thank you.

[15:06] Arturo\_Herr: specific local sectors, meaning local community.

[15:07] Mandy\_Carve: Thank you

[15:18] Fouad\_Bajwa: Pakistan's example of regional ICT/Internet Governance Policy Public Consultations in Pictures <http://www.facebook.com/group.php?gid=30136677675>

[15:19] Fouad\_Bajwa: A more direct link <http://www.facebook.com/group.php?v=photos&gid=30136677675>

[15:24] Arturo\_Herr: IMHO what we should focus on is on structuring a "duplex" policy-strategies development plus implementation scheme: bottom-to-top, as well as top-to-bottom. But an horizontal perspective should be bared in mind as to promote a global democratic evolution.

[15:27] Mandy\_Carve: May I take this as a comment to the chat room rather than a question for the panel

[15:33] Mandy\_Carve: Thank you remote participants - this ends the session

[15:33] Arturo\_Herr: yes

[15:34] Christopher: Thankyou. Excellent meeting. CW
