[10:02]  Dr_Eberhard: but there is only one individual in the audienceyet
[11:50]   Bryan: My screen seems to be stuck on a slide from the previous presentation.
[12:12]  Antoin: Is it me, or are there no slides in the virtual meeting room?
[12:16]  Brandon_Ver: You may need to restart the virtual meeting room service.
[12:17]   Bryan: anyone able to poke whoever is in charge of this virtual meeting?
[12:19]  Brandon_Ver: I will speak with Nick Ashton-Heart about this issue.
[12:19]   Bryan: ty
[12:22]  Antoin: Restarting my browser and reconnecting didn't work, I only see the agenda slide in the virtual meeting room....
[12:34]   nashton: Sorry everyone, I have contacted the staff responsible for the session
[12:35]   nashton: We are working on restoring chat access, it should never have been made invisible
[12:35]   Antoin: Hmm, Why do I suddenly hear classical music?
[12:36]   Antoin: Yes, poke Bart...
[12:37]   nashton: getting replies from Gabi now

Brandon_Ver: Currently the session is on break until 2:00
Bryan: Slides are still *not* working
Bryan: Anyone else having this problem?
Bryan_Bueck: Does anyone see the sides for this presentation?
Norm_Ritchi: not I
Fermin: only the agenda
Bryan_Bueck: Is there any chance that the virtual meeting manager can enable us remote participants to see the slides?
Bryan_Bueck: s/virtual/virtual/
Nick_Ashton: Bryan do you need them posted or in the room here?
Nick_Ashton: sorry, I've been in other rooms with this one hidden
Bryan_Bueck: Nick: couldn't see any slides before, but now it seems to be working again.
Antoin: hmm, sound turned into classical music again....
Bryan_Bueck: sound is working fine here.
Antoin: I'm using the http://stream.icann.org/shimba-64-en.m3u link from teh website, and it now plays "fallback05" which plays classical music....
Brandon_Ver: If your hearing music on http://stream.icann.org/shimba-64-en.m3u please reload your client and connect back to that stream again
Antoin: Reconnacting makes me go to "fallback06"
Brandon_Ver: Which client are you using?
Antoin: So I think number of streams have run out..
Antoin: VLC offcourse
Brandon_Ver: Check the Playlist in VLC
Antoin: It only has "fallback" in the playlist..
Antoin: Ok now it's back
Antoin: After reconnecting again
Brandon_Ver: Good to hear.
Nigel_Rober: I've been impressed with the stability of the audio stream
Nigel_Rober: the audio level is slightly low thou
Nigel_Rober: I never thought I'd say this: "Eberhard, please speak up!"
nicki_lisse: thats not something you hear often...
Nigel_Rober: audio's now disappeared altogether for me
Suzanne_Woo: I don't think anyone is talking....
Suzanne_Woo: ?
Suzanne_Woo: mic is live
Nigel_Rober: Can someone please boost the level of the feed??
Brandon_Ver: On the Audio stream?
Brandon_Ver: On http://stream.icann.org/shimba-64-en.m3u?
Nigel_Rober: yes
Nigel_Rober: It's very good and stable but low level
Brandon_Ver: It's actually quite loud for me. I think if we raise the levels more we will be overdriving the audio.
Kristina_No: Sorry, wrong button
Kristina_No: are you all still on the chat?
Brandon_Ver: Nigel_Roberts: Could you just confirm for me again whether your using Adobe Connect for the Audio, or http://stream.icann.org/shimba-64-en.m3u for the audio stream
Nigel_Rober: I'm connecting directly to the stream
Nigel_Rober: and the audio is perfect now
Nigel_Rober: I'm using Audacious for what its worth
Brandon_Ver: Good to hear.
Nigel_Rober: now its almost inaudible again
Suzanne_Woo: mic, Greg
Suzanne_Woo: thanks
Nigel_Rober: Eberhardis fine but the other speakers are quiet
Bryan_Bueck: slides are not updating remotely. - for me anyway.
