FY14 Budget Recap

ICANN's Bylaws require that 45 days before adoption of the annual budget, a draft of the annual budget be posted to allow for community feedback.

In the revised budget process we are proposing to have a Framework development period of several months to engage active dialog and feedback with the community, and to solicit community input on the priorities, programs and projects for ICANN to focus on for the next fiscal year.

This Framework provides the building blocks for the Operating Plan and Budget, which will be built by Staff based on further refinement of the programs and projects that can be resourced within the constraints of the targeted fiscal year budget.
