
Attachment to Module 2

Evaluation Questions and Criteria

Since ICANN was founded 10 years ago as a not-for-profit, multi-stakeholder organization, one of its key mandates has been to promote competition in the domain name market. ICANN's mission specifically calls for the corporation to maintain and build on processes that will ensure competition and consumer interests – without compromising Internet security and stability. This includes the consideration and implementation of new gTLDs. It is ICANN's goal to make the criteria and evaluation as objective as possible.

While new gTLDs are viewed by ICANN as important to fostering choice, innovation and competition in domain registration services, the decision to launch these coming new gTLD application rounds followed a detailed and lengthy consultation process with all constituencies of the global Internet community.

Any public or private sector organization can apply to create and operate a new gTLD. However the process is not like simply registering or buying a second-level domain name. Instead, the application process is to evaluate and select candidates capable of running a registry, a business that manages top level domains such as, for example, .COM or .INFO. Any successful applicant will need to meet published operational and technical criteria in order to preserve Internet stability and interoperability.

I. Principles of the Technical and Financial New gTLD Evaluation Criteria

- Principles of conservatism. This is the first round of what is to be an ongoing process for the introduction of new TLDs including Internationalized Domain Names. Therefore, the criteria in this round require applicants to provide a thorough and thoughtful analysis of the technical requirements to operate a registry and the proposed business model.
- The criteria and evaluation should be as objective as possible.
 - With that goal in mind, an important objective of the new TLD process is to diversify the namespace, with different registry business models and target audiences. In some cases, criteria that are objective, but that ignore the differences in business models and target audiences of new registries, will tend to make the process exclusionary. For example, the business model for a registry targeted to a small community need not possess the same robustness in funding and technical infrastructure as a registry intending to compete with large gTLDs. Therefore purely objective criteria such as a requirement for a certain amount of cash on hand will not provide for the flexibility to consider different business models. The process must provide for an objective evaluation framework, but allow for adaptation according to the differing models applicants will present. Within that framework, applicant's responses will be evaluated against the criteria in light of the proposed model.
 - Therefore the criteria should be flexible: able to scale with the overall business approach plan, providing that the planned approach is consistent and coherent, and can withstand highs and lows.

- Criteria can be objective in areas of registrant protection, for example:
 - Providing for funds to continue operations in the event of a registry failure.
 - Adherence to data escrow and registry failover and continuity plans.
- The evaluation must strike the correct balance between establishing the business and technical competence of the applicant to operate a registry (to serve the interests of registrants), while not asking for the detailed sort of information or making the judgment that a venture capitalist would. ICANN is not seeking to certify business success but instead seeks to encourage innovation while providing certain safeguards for registrants.
- New registries must be added in a way that maintains DNS stability and security. Therefore, ICANN asks several questions so that the applicant can demonstrate an understanding of the technical requirements to operate a registry. In certain cases, ICANN will ask the applicant to demonstrate actual operational technical compliance prior to delegation. This is in-line with current ~~ICANN/IANA~~ prerequisites for the delegation of a TLD.
- Registrant protection is emphasized in both the criteria and the scoring. Examples of this include asking the applicant to:
 - Plan for the occurrence of contingencies and registry failure by putting in place financial resources to fund the ongoing resolution of names while a replacement operator is found or extended notice can be given to registrants,
 - Demonstrate a capability to understand and plan for business contingencies to afford some protections through the marketplace,
 - Adhere to DNS stability and security requirements as described in the technical section, and
 - Provide access to the widest variety of services.

II. Aspects of the Questions Asked in the Application and Evaluation Criteria

The technical and financial questions are intended to inform and guide the applicant in aspects of registry start-up and operation. The established registry operator should find the questions straightforward while inexperienced applicants should find them a natural part of planning.

Evaluation and scoring (detailed below) will emphasize:

- How thorough are the answers? Are they well thought through and do they provide a sufficient basis for evaluation?
- Demonstration of the ability to operate and fund the registry on an ongoing basis:
 - Funding sources to support technical operations in a manner that ensures stability and security and supports planned expenses,
 - Resilience and sustainability in the face of ups and downs, anticipation of contingencies,
 - Bonding or other funding to carry on operations in the event of failure.
- Demonstration that the technical plan will likely deliver on best practices for a registry and identification of issues that might raise DNS stability and security issues.

- Ensures plan integration, consistency and compatibility (responses to questions are not evaluated individually but in comparison to others):
 - Funding adequately covers technical requirements,
 - Funding covers costs,
 - Risks are identified and addressed, in comparison to other aspects of the plan.

III. Scoring

Evaluation

- The questions, criteria, scoring and evaluation methodology are to be conducted in accordance with the principles described earlier in the paper. With that in mind, globally diverse evaluation panelists will staff evaluation panels. The diversity of evaluators and access to experts in all regions of the world will ensure application evaluations take into account cultural, technical and business norms in the regions from which applications originate.
- ~~Independent~~ Evaluation teams will consist of two independent panels. One will evaluate the applications against the financial criteria. The other will evaluate the applications against the technical & operational criteria. Given the requirement that technical and financial planning be well integrated, it is likely that one organization will coordinate the information transfer between panels. Other relevant experts (e.g., technical, audit, legal, insurance, finance) in pertinent regions will provide advice as required.
- Precautions will be taken to ensure that no member of the Evaluation Teams will have any interest or association that may be viewed as a real or potential conflict of interest with an applicant or application. All members ~~have signed a Deed of Confidentiality/ Non-Disclosure Agreement relating specifically to this tender/project, must adhere to the Code of Conduct and Conflict of Interest guidelines that are found in Module 2.~~
- Communications between the evaluation teams and the applicants will be through an online interface. During the evaluation, evaluators may pose a set of clarifying questions to an applicant, to which the applicant may respond through the interface.
- Confidentiality: ICANN will post applications after the close of the application period. The applications consist of the answers to the questions below. The answers to all questions will be published except for the Demonstration of Financial Capability questions (Questions ~~5245 - 5057~~) and the Registry Transition question (~~407~~). The answers to these questions will be kept confidential.

Scoring

- Responses will be evaluated against each criterion. A score will be assigned according to the scoring schedule linked to each question or set of questions. In nearly all cases, 2 points are awarded for a response that exceeds requirements, 1 point is awarded for a response that meets requirements and 0 points are awarded for a response that fails to meet requirements. In several questions, 1 point is the maximum score that may be awarded. Each question must receive at least a score of "1," making each a "pass/fail" question.
- In the Continuity question in the financial section(see Question #~~507~~), up to 3 points are awarded if an applicant provides, at the application stage, a financial instrument ~~of~~

~~some type~~ that will guarantee ongoing registry operations in the event of a business failure. This extra point can serve to guarantee passing the financial criteria for applicants who score the minimum passing score for each of the individual criteria. The purpose of this weighting is to reward applicants who make early arrangements for the protection of registrants and to accept relatively riskier business plans where registrants are protected.

- There are ~~210~~ Technical & Operational questions. Each question has a criterion and scoring associated with it. The scoring for each is 0, 1, or 2 points as described above. ~~OneTwo~~ of the questions (~~DNSSEC and IDN implementations~~) ~~are~~ optional. Other than the optional questions, all Technical & Operational criteria must be scored a 1 or more or the application will fail the evaluation.
- The total technical score must be equal to or greater than ~~220~~ for the application to pass. That means the applicant can pass by:
 - Receiving a 1 ~~or more~~ on all questions, including the ~~two~~ optional questions, and a 2 on at least one mandatory question; or
 - Receiving a 1 on all questions, excluding the optional question and a 2 on at least two mandatory questions.
 - ~~Scoring a 2 on least two mandatory questions;~~
 - ~~Receiving a combination of high and optional scores.~~

This scoring methodology requires a minimum passing score for each question and a slightly higher average score than the per question minimum to pass.

- There are six Financial questions and six sets of criteria that are scored by rating the answers to one or more of the questions. For example, the question concerning registry operation costs requires consistency between the technical plans (described in the answers to the Technical & Operational questions) and the costs (described in the answers to the costs question).
- The scoring for each of the Financial criteria is 0, 1 or 2 points as described above with ~~one exception. The exception of~~ the Continuity question, ~~described above,~~ for which up to 3 points are possible. All questions must receive at least a 1 or the application will fail the evaluation.
- The total financial score on the six criteria must be 8 or greater for the application to pass. That means the applicant can pass by:
 - Scoring a 3 on the continuity criteria, or
 - Scoring a 2 on any two financial criteria.
- Applications that do not pass can enter into an extended evaluation process as described in the Applicant Guidebook. The scoring is the same.

Note that the redline version provided here shows changes against the previous version of the Evaluation Criteria, as posted in May 2009 and available at <http://www.icann.org/en/topics/new-gtlds/draft-evaluation-criteria-30may09-en.pdf>.

	#	Question	Notes	Scoring Range	Criteria	Scoring
Applicant Information	1	Full legal name of the Applicant (-, being- the established entity that would <u>will be entering</u> into a <u>registry agreement</u> contract with ICANN, following the latter's approval of this proposal.	Responses to Questions 1 - 12 are required for a complete application. Responses are not scored.			
	2	Address of the principal place of business of the Applicant. This address will be used for contractual purposes. No Post Office boxes are allowed.				
	3	Phone number for the Applicant's principal place of business.				
	4	Fax number for the Applicant's - principal place of <u>b</u> Business.				
	5	Email address for the Applicant's principal place of business.				
Primary Contact for this Application	6	Name	<u>-The primary contact will receive all communications regarding the application. Either the primary or the secondary contact may respond. In the event of a conflict, the communication received from the primary contact will be taken as authoritative.</u>			
		Title				
		Address				
		Phone number				
		Fax number				
		Email address				
Secondary Contact for this Application	7	Name	<u>-The secondary contact will be copied on all communications regarding the application. Either the primary or the secondary contact may respond.</u>			
		Title				

		Address			
		Phone number			
		Fax number			
		Email address			
Proof of Legal Establishment	8(a)	(a) Legal form of the Applicant. (e.g., limited liability partnership, corporation, non-profit institution).			
	8(b)	(b) State the specific national or other jurisdictional law that defines the type of entity identified in 8(a). <u>Identify any relevant section references and provide a URL to the document if available online.</u>			
	8(c)	(c) Attach evidence of the applicant's establishment as the type of entity identified in Question 8(a) above, in accordance with the applicable laws identified in Question 8(b).	Applications without valid proof of legal establishment will not be evaluated further.		
Proof of Good Standing	9(a)	(a) Identify the specific organizational or business purpose(s) of the entity specified in Question 8.			
	9(b)	(b) If the applicant operates in a regulated industry where a specific document <u>or license</u> is required to <u>engage in the purpose specified in 9(a)</u> operate under the laws identified <u>in the applicant's response to question 8(b)</u> (e.g., banking, insurance), the applicant must attach a copy of its current, unrevoked permission or certificate to engage <u>in</u> the activity or operate as the type of business entity identified above. If the applicant's business purpose does not require such permission or certification, the applicant must attach a certificate from the	It may be possible to satisfy this requirement with the document submitted for proof of legal establishment, <u>i.e., the same document may provide both proof of establishment and good standing.</u> In this case, applicant must note so in its response. Applications without valid proof of good standing will not be evaluated further.		

		incorporating body or alternative organization authorized by the incorporating body verifying the continued validity of the applicant (e.g., certificate of good standing or affidavit from a notary public). -The applicant must clearly explain the chain of authority from the law identified <u>in its response to question 8(b) above</u> to the alternative organization providing the documentation.				
	10	Business ID, Tax ID, VAT <u>registration number</u> , or equivalent of the Applicant.				
Applicant Background	11{ a}	<u>(a)</u> Enter the full name, contact information, and position of all directors.	Background checks may be conducted on individuals named <u>in the applicant's response to question 11.-</u> <u>Any material misstatement or misrepresentation (or omission of material information) may cause the application to be rejected.</u>			
	11{ b}	<u>(b)</u> Enter the full name, contact information, and position of all officers <u>and partners</u> .				
	11{ c}	<u>(c)</u> Enter the full name, contact information and position of all shareholders holding at least 15% of shares.				
	11{ d}	<u>(d)</u> Indicate whether the applicant or any of its directors, officers, <u>partners</u> , or shareholders named above: i. within the past ten years, has been convicted of a felony, or of a misdemeanor related to financial or corporate governance activities, or has been judged by a court to	ICANN may deny an otherwise qualified application for any of the following reasons: Applicant, or any <u>partner</u> , officer, director, or manager, or any person or entity owning (or beneficially owning) fifteen percent or more of applicant:			

	<p>have committed fraud or breach of fiduciary duty, or has been the subject of a judicial determination that is similar or related to any of these.;</p> <p>ii. within the past ten years, has been disciplined by atthe government of its, her, or his domicile for conduct involving dishonesty or misuse of funds of others;</p> <p>iii. is currently involved in any judicial or regulatory proceeding that could result in a conviction, judgment, determination, or discipline of the type specified in (i) or (ii); or</p> <p>iv. is the subject of a disqualification imposed by ICANN and in effect at the time of this application.</p> <p>If any of the above events have occurred, please provide details.</p>	<p>a. within the past ten years, has been convicted of a felony, or of a misdemeanor related to financial or corporate governance activities, or has been judged by a court to have committed fraud or breach of fiduciary duty, or has been the subject of a judicial determination that ICANN deemed as the substantive equivalent of any of these;</p> <p>b. within the past ten years, has been disciplined by any government or industry regulatory body for conduct involving dishonesty or misuse of the funds of others;</p> <p>c. is currently involved in any judicial or regulatory proceeding that could result in a conviction, judgment, determination, or discipline of the type specified in (a) or (b); or</p> <p>d. is the subject of a disqualification imposed by ICANN and in effect at</p>		
--	---	---	--	--

			<p>the time the application is considered; <u>or</u></p> <p><u>e. fails to provide ICANN with the identifying information necessary to confirm identity at the time of application.</u></p>			
	<p>11 e)</p>	<p><u>(e)</u> Indicate whether the applicant or any of its directors, officers, <u>partners</u>, or shareholders named above have demonstrated a pattern or practice of, or been found liable for, cybersquatting or domain <u>name</u>-related abuses.</p>	<p>ICANN may deny an otherwise qualified application for any of the following reasons:</p> <p>Applicant, or any <u>partner</u>, officer, director, or manager, or any person or entity owning (or beneficially owning) fifteen percent or more of applicant is the subject of a pattern of decisions indicating liability for, or repeated practice of bad faith in regard to domain name registrations, including:</p> <p>(i) acquiring domain names primarily for the purpose of selling, renting, or otherwise transferring the domain name registrations to the owner of a trademark or service mark or to a competitor, for valuable consideration in excess of documented out-of-pocket costs directly related to the domain name; or</p> <p>(ii) registering domain names in order to prevent the owner of the trademark or service mark from reflecting the mark in a corresponding domain name; or</p>			

			<p>(iii) registering domain names primarily for the purpose of disrupting the business of a competitor; or</p> <p>(iv) using domain names with intent to attract, for commercial gain, Internet users to a web site or other on-line location, by creating a likelihood of confusion with a trademark or service mark as to the source, sponsorship, affiliation, or endorsement of the web site or location or of a product or service on the web site or location.</p>			
	11 11	(f) Disclose whether the applicant has been involved in any administrative or other legal proceeding, as plaintiff or defendant , in which allegations of intellectual property trademark infringement of a domain name have been made. Provide an explanation related to each such instance.				
Evaluation Fee	12	Enter the confirmation information for your payment of the evaluation fee (e.g., wire transfer confirmation number).				
Applied-for gTLD string	13	Provide the applied-for gTLD string. If applying for an IDN, provide the A-label (beginning with "xn_--").	Responses to Questions 13- 17 are not scored, but are used for database and validation purposes.			
	14	(a) If applying for an IDN, provide the U-label.	The U-label is an IDNA-valid string of Unicode characters, including at least one non-ASCII character.			

	15	(b) If an IDN, provide the translation or transliteration of the string in English, that is, the literal meaning of the string in the opinion of the applicant.				
	16	(c) If an IDN, provide the language of the label (both in English and as referenced by ISO-639-1)?				
	17	(d) If an IDN, provide the script of the label (both in English and as referenced by ISO 15924).				
	18	(e) If an IDN, list all the code points contained in the U-label according to Unicode form.				
	159	If an IDN, upload IDN tables for the proposed registry. An IDN table must include: 1) the applied-for gTLD string relevant to the tables, 2) the script or language designator (as defined in BCP 47), 3) table version number, 4) effective date (DD Month YYYY), and 5) contact name, email address, and phone number. Submission of IDN tables in a standards-based format is encouraged.				
	162 e	If an IDN, describe the applicant's efforts to ensure that there are no known operational or rendering problems concerning the applied-for gTLD string. If such issues are known, describe steps that will be taken to mitigate these issues in software and other applications.				
	172 ±	<u>OPTIONAL.</u> <u>Provide a representation of the label according to the International Phonetic Alphabet (http://www.langsci.ucl.ac.uk/ipa/).</u>	If provided, this information will be used as a guide to ICANN in communications regarding the application.			

<p>Community-based Designation</p>	<p><u>182</u> <u>2</u></p>	<p>Is the application for a community-based TLD?</p>	<p>There is a presumption that the application is <u>a standard application for an open TLD</u> (as defined in the Applicant Guidebook) if this question is left unanswered.</p> <p><u>The applicant's designation as standard or community-based cannot be changed once the application is submitted.</u></p>			
	<p><u>23</u></p>	<p>In the event of string contention does the community based applicant elect a comparative (community priority) evaluation as the preferred method of resolving the contention?</p>	<p>If community based, an applicant has the option to elect a comparative (community priority) evaluation in the event of string contention. See Module 4 of the Applicant Guidebook for more information on string contention resolution procedures.</p>			
	<p><u>192</u> <u>4</u></p>	<p>(a) Provide the name and full description of the community that <u>the applicant is committing to serve you represent</u>. Community-based applications participating in a <u>community priority (comparative)</u> (community priority) evaluation will be scored <u>in that event</u> based on the community identified in response to this question.</p>	<p>Descriptions should include:</p> <ul style="list-style-type: none"> • How the community is delineated from Internet users generally. Such descriptions may include, but are not limited to, the following: membership, registration, or licensing processes, operation in a particular industry, use of a language. • How the community is <u>structured and organized</u>. <u>For a community consisting of an alliance of groups, details about the constituent parts are required.</u> • When the community was established, including the date(s) of formal organization, if any, <u>as well as a description of community activities to date.</u> • <u>The current estimated size of the community, both as to membership and geographic extent.</u> 		<p><u>Responses to Question 19 will be regarded as firm commitments to the specified community and reflected in the registry agreement, provided the application is successful.</u></p> <p>Responses to Question 24 are not scored in the Initial Evaluation. Responses may be scored, in a comparative (community a community priority (comparative)) evaluation, if applicable. Criteria and scoring methodology for the community priority (comparative) evaluation are described in Module 4 of the Applicant Guidebook.</p>	

	(b) Explain the applicant's relationship to the community identified in 1924(a) .	<p><u>Explanations should clearly state:</u></p> <ul style="list-style-type: none"> • <u>relations to any community organizations</u> • <u>relations to the community and its constituent parts/groups</u> 			
	(c) Provide a description of the community-based purpose of the applied-for -gTLD .	<p>Descriptions should include:</p> <ul style="list-style-type: none"> • Intended registrants in the TLD. • Intended end-users of the TLD. • Related activities the applicant has carried out or intends to carry out in service of this purpose. • <u>Explanation of how the purpose is of a lasting nature.</u> <p>If filled out, this will automatically populate Question 206, on mission/purpose.</p>			
	(d) Explain the relationship between the applied-for gTLD string and the community identified in 1924(a) .	<p><u>Explanations should clearly state:</u></p> <ul style="list-style-type: none"> • <u>relationship to the established name, if any, of the community.</u> • <u>relationship to the identification of community members.</u> • <u>any connotations the string may have beyond the community.</u> 			
	(e) Provide a complete description of the applicant's intended registration policies in support of the community-based purpose of the applied-for g-TLD . Policies and enforcement mechanisms are expected to constitute a coherent set.	<p>Descriptions should include proposed policies, if any, on the following:</p> <ul style="list-style-type: none"> • Eligibility: who is eligible to register a second-level name in the gTLD, and how will eligibility be determined. • Name selection: what types of second-level names may be registered in the gTLD. 			

			<ul style="list-style-type: none"> • Content/Use: what restrictions, if any, will the <u>registry</u> operator <u>will</u> impose on how a registrant may use its <u>registered</u> name. • Enforcement: what investigation practices and mechanisms exist to enforce the policies above, what resources are allocated for enforcement, and what appeal mechanisms are available to registrants. 			
		(f) Attach any written endorsements for the application from <u>institutions</u> /groups representative of the community identified in <u>1924(a)</u> . An applicant may submit endorsements by multiple institutions/ <u>groups</u> , <u>if relevant to the community</u> .	<u>Endorsements from institutions/groups not mentioned in the response to 19(b) should be accompanied by a clear description of each such institution's/group's relationship to the community.</u>			
<u>Mission/Purpose</u>	<u>20</u>	<u>Describe the mission/purpose of your proposed gTLD.</u>	<u>Applicants are encouraged to provide a thorough and detailed description to enable informed consultation and comment. Responses to this question are not scored.</u>			

Geographical Names	215	(a) Is the application for a geographical name?	An applied-for gTLD string is considered a geographical name if it is: (a) a <u>country or territory name as defined in the Applicant Guidebook</u> meaningful representation of a country or territory name listed in the ISO 3166-1 standard ; (b) a sub-national place name listed in the ISO 3166-2 standard; (c) the capital city name of a country or territory listed in the ISO 3166-1 standard; (d) a city name, where the applicant declares <u>in its response to question 20</u> that it intends to use the gTLD for purposes associated with the city name; <u>or</u> (e) a continent or UN region. The applicant is expected to identify whether its applied for gTLD string is a geographical name and to provide the required documentation. See further description of geographical names requirements in Module 2 of the Applicant Guidebook.			
		(b) If a geographical name, attach documentation of support or non-objection from all relevant government(s) or public authority(ies).	See the documentation requirements in Module 2 of the Applicant Guidebook.			
General Questions	26	Describe the mission/purpose of your proposed gTLD.		-		
Protection of Geographical Names	22	<u>Describe proposed measures for protection of geographic names at the second and other levels in the applied-for gTLD. This should include any applicable rules and procedures for reservation and/or release of such names.</u>	<u>Applicants should consider and describe how they will incorporate Governmental Advisory Committee (GAC) advice in their management of second-level domain name registrations. See "Principles regarding New gTLDs" at http://gac.icann.org/index.php?name=Imp_d</u>			

oc.

For reference, applicants may draw on existing methodology developed for the reservation and release of country names in the .INFO top-level domain. See ".info Procedure" at http://gac.icann.org/index.php?name=Imp_d
oc.

Proposed measures will be posted for public comment as part of the application.

<p><u>Registry Services</u></p>	<p>237</p>	<p>Provide name and full description of all the Registry Services to be provided. <u>Descriptions should include both technical and business components of each proposed service, and address any potential security or stability concerns.</u></p> <p><u>The following registry services are customary services offered by a registry operator:</u></p> <ul style="list-style-type: none"> <u>A. Receipt of data from registrars concerning registration of domain names and name servers.</u> <u>B. Provision of status information relating to zone servers for the TLD.</u> <u>C. Dissemination of TLD zone files.</u> <u>D. Dissemination of contact or other information concerning domain name registrations (Whois service).</u> <u>E. Internationalized Domain Names, where offered.</u> <u>F. DNS Security Extensions (DNSSEC).</u> <p><u>The applicant must describe whether any of these registry services are intended to be offered in a manner unique to the TLD.</u></p> <p><u>Additional proposed registry services that are unique to the registry must also be described.</u></p>	<p>Registry Services are defined as the following: (1) operations of the Registry critical to the following tasks: (i) the receipt of data from registrars concerning registrations of domain names and name servers; (ii) provision to registrars of status information relating to the zone servers for the TLD; (iii) dissemination of TLD zone files; (iv) operation of the Registry zone servers; and (v) dissemination of contact and other information concerning domain name server registrations in the TLD as required by the Registry Agreement; and (2) other products or services that the Registry Operator is required to provide because of the establishment of a Consensus Policy; (3) any other products or services that only a Registry Operator is capable of providing, by reason of its designation as the Registry Operator. A full definition of Registry Services can be found at http://www.icann.org/en/registries/rsep/rsep.html.</p> <p><u>Security: For purposes of this applicant guidebook, an effect on security by the proposed Registry Service means (1) the unauthorized disclosure, alteration, insertion or destruction of Registry Data, or (2) the unauthorized access to or disclosure of information or resources on the Internet by systems operating in accordance with applicable standards.</u></p> <p><u>Stability: For purposes of this applicant guidebook, an effect on stability shall mean that the proposed Registry Service (1) is not</u></p>	<p><u>Responses are not scored. A preliminary assessment will be made to determine if there are potential security or stability issues with any of the applicant's proposed Registry Services. If any such issues are identified, the application will be referred for an extended review. See the description of the Registry Services Review process in Module 2 of the Applicant Guidebook. Any information contained in the application may be considered as part of the registry services review. If its application is approved, a</u>Applicant<u> may</u>can<u> engage in only those registry services defined in the application, unless a new request is submitted to ICANN in accordance with the registry agreement. Complete response adequately describes services so that a Registry Services evaluation can take place. Registry Services must not significantly impact DNS Stability or Security.</u></p> <p><u>Security: For purposes of this applicant guidebook, an effect on security by the proposed Registry Service</u></p>	<p>A preliminary assessment will be made to determine if there may be possible security or stability issues with any of the applicant's proposed Registry Services. If any such issues are identified, the application will be referred for an extended review. See the description of the Registry Services Review process in Module 2 of the Applicant Guidebook.</p>
---------------------------------	------------	--	---	--	--

		<p><u>compliant with applicable relevant standards that are authoritative and published by a well-established, recognized and authoritative standards body, such as relevant Standards-Track or Best Current Practice RFCs sponsored by the IETF, or (2) creates a condition that adversely affects the throughput, response time, consistency or coherence of responses to Internet servers or end systems, operating in accordance with applicable relevant standards that are authoritative and published by a well-established, recognized and authoritative standards body, such as relevant Standards-Track or Best Current Practice RFCs and relying on Registry Operator's delegation information or provisioning.</u></p>	<p>means (1) the unauthorized disclosure, alteration, insertion or destruction of Registry Data, or (2) the unauthorized access to or disclosure of information or resources on the Internet by systems operating in accordance with applicable standards.</p> <p>Stability: For purposes of this applicant guidebook, an effect on stability shall mean that the proposed Registry Service (1) is not compliant with applicable relevant standards that are authoritative and published by a well-established, recognized and authoritative standards body, such as relevant Standards-Track or Best Current Practice RFCs sponsored by the IETF, or (2) creates a condition that adversely affects the throughput, response time, consistency or coherence of responses to Internet servers or end systems, operating in accordance with applicable relevant standards that are authoritative and published by a well-established, recognized and authoritative standards body, such as</p>

					<p><u>overall business approach as described in the application-with-business model</u>; and</p> <p>(4) Demonstrates that technical resources required to carry through the plans for this element are readily available.</p> <p>0 - fails requirements: Does not meet the requirements to score 1-.</p>	
	<p>273 2</p>	<p>Geographic Diversity: provide a description of plans for geographic diversity of</p> <ul style="list-style-type: none"> • name servers and • operations centers. <p><u>This should include the intended physical locations of systems, operations centers, and other infrastructure.</u></p> <p>This may include Registry plans to use Anycast or other geo-diversity measures.</p>		0-2	<p>Complete answer demonstrates:</p> <p>(1) geographic diversity of nameservers and operations centers;</p> <p>(2) the proposed geo-diversity measures are consistent with the <u>overall business approach</u> business model and planned size of the registry; and</p> <p>(3) a technical plan that is adequately resourced in the planned costs <u>detailed in the</u></p>	<p>2 - exceeds requirements: Response includes</p> <p>(1) <u>Evidence of highly developed measures for geo-diversity of operations, with locations and functions;</u></p> <p>(1) <u>Highly-developed and detailed geo-diversity strategy, including specific number and locations of name servers worldwide;</u></p> <p>(2) A high level of resiliency, security, and bandwidth;</p>

					<p>financial section in the registry business plan.</p>	<p>(3) _____ Evidence of highly developed measures for geo-diversity of operations, with locations and functions; (34) Full interplay and consistency of technical and business requirements; and (45) <u>Evidence of technical resources</u> are already on hand or committed. 1 - meets requirements: Response includes (1) Description of geodiversity plans includes all necessary elements; (2) Plans provide adequate geo-diversity of name servers and operations; and. (3) Geo-diversity plans are commensurate with <u>overall business approach as described in the business model application</u>; and (4) <u>D</u>emonstrates that technical resources required to carry through the plans for this element are readily available. 0 - fails requirements: Does not meet the requirements to score 1-.</p>
--	--	--	--	--	---	---

<p>283 3</p>	<p>DNS Service Protocol Compliance: describe the configuration and operation of nameservers, including <u>how the applicant will comply compliance</u> with RFCs.</p> <p>All name servers used for the new gTLD must be operated in compliance with the DNS protocol specifications defined in the <u>relevant RFCs, including but not limited to following IETF Requests for Comments (RFCs):</u> 1034, 1035, 1101, 1982, 1996, 2181, 2182, 2308, 2671, 3226, 3596, 3597, <u>3901, 4343, and 4472 and 3671.</u></p> <p>Describe the <u>DNS</u> services to be provided, the resources used to implement the services, and demonstrate how the system will function. Suggested information includes:</p> <p>Services. Query rates to be supported at initial operation, and reserve capacity of the system. How will these be scaled as a function of growth in the TLDs? Similarly, <u>describe how services will scale for</u> name server update method and performance.</p> <p>Resources. <u>Describe c</u>Complete server hardware and software.</p> <p>Descriptions to evaluate if <u>Describe how services they</u> are compliant with RFCs. Are these dedicated or shared with any other functions (capacity/performance) <u>or DNS zones?</u> <u>Describe n</u>Network bandwidth and addressing plans for servers.</p> <p><u>Describe how the proposed infrastructure will be able to deliver the performance described</u></p>	<p><u>-Note that the use of DNS wildcard resource records as described in RFC 4592 or any other method or technology for synthesizing DNS resource records or using redirection within the DNS by the registry is prohibited in the Registry Agreement.</u></p> <p><u>Also note that name servers for the new gTLD must comply with IANA Technical requirements for authoritative name servers: <http://www.iana.org/procedures/nameserver-requirements.html>.</u></p>	<p>0-2</p> <p>Complete answer demonstrates:</p> <p>(1) adequate description of configurations of nameservers and compliance with respective DNS protocol-related RFCs;</p> <p>(2) a technical plan scope/scale that is consistent with the <u>overall business approach-business model</u> and planned size of the registry; and</p> <p>(3) a technical plan that is adequately resourced in the planned costs <u>detailed in the financial section; and in the registry business plan.</u></p> <p><u>(4) evidence of compliance with Specification 6 to the Registry Agreement.</u></p>	<p>2 - exceeds requirements:</p> <p>Response includes:</p> <p>(1) Highly developed and detailed plans to ensure compliance with DNS protocols <u>and required performance specifications;</u></p> <p>(2) A high level of resiliency;</p> <p>(3) Full interplay and consistency of technical and business requirements; and</p> <p>(4) <u>Evidence of t</u>Technical resources are already on hand or committed.</p> <p>1 - meets requirements:</p> <p>Response includes:</p> <p>(1) Adequate level of detail to substantially demonstrate capability and knowledge required to meet this element;</p> <p>(2) Plans are sufficient to result in compliance with DNS protocols <u>and required performance specifications;</u> and</p> <p>(3) Plans are commensurate with <u>overall business approach as described in the application business model;</u> and</p> <p>(4) <u>D</u>demonstrates that technical resources required to carry through</p>
------------------	--	--	---	--

		<p><u>in the Performance Specification (Specification 6) attached to the draft Registry Agreement.</u></p> <p>Examples of evidence include:</p> <ul style="list-style-type: none"> • Server configuration(s) • Network addressing and bandwidth for query load and update propagation • Security and DDOS policy • Headroom to meet surges • Monitoring and remediation process 			<p>the plans for this element are readily available.</p> <p>0 - fails requirements: Does not meet the requirements to score 1-.</p>	
	<p>293 4</p>	<p>SRS Performance: describe the plan for operation of a robust and reliable Shared Registration System. SRS is a critical registry function for enabling multiple registrars to provide domain name registration services in the TLD. Please refer to the requirements in Sections 1-3 of the Registry Interoperability, Continuity, and Performance Specification (Specification 6) attached to the draft RegistryBase Agreement.</p>		<p>0-1</p>	<p>Complete answer demonstrates: (1) a robust plan for operating a reliable SRS; (2) scalability and performance are consistent with the <u>overall business approach, business model</u> and planned size of the registry; (3) a technical plan that is adequately resourced in the planned costs <u>detailed in the financial section in the</u></p>	<p>1 - meets requirements: Response includes (1) Evidence of highly developed and detailed plan to operate a robust and reliable; SRS; (2) SRS plans are sufficient to result in compliance with the Registry Continuity, Interoperability, and Performance Specifications; <u>Specifications;</u> (3) Full interplay and</p>

					<p>registry business plan; and (4) evidence of compliance with Specification 6 to the RegistryBase Agreement.</p>	<p>consistency of technical and business requirements; and (4) Demonstrates that technical resources are already on hand, or committed or readily available. 0 - fails requirements: Does not meet the requirements to score 1.</p>
	305	<p>EPP: provide a detailed description of the interface with registrars, including <u>how the applicant will comply</u> with Extensible Provisioning Protocol in <u>the relevant RFCs, including but not limited to: RFCs 3915, 3735, and 4930-4934/5730-5734.</u></p> <p>Provide the EPP templates and schemas that will be used.</p>		0-1	<p>Complete answer demonstrates: (1) complete knowledge and understanding of this aspect of registry technical requirements; (2) a technical plan scope/scale consistent with the <u>overall business approach</u>business model and planned size of the registry; and (3) a technical plan that is adequately resourced in the planned costs <u>detailed in the financial section in the registry business plan.</u></p>	<p>1 - meets requirements: Response includes (1) Adequate level of detail to substantially demonstrate capability and knowledge required to meet this element, (2) EPP templates and schemas compliant with RFCs and provide all necessary functionalities for registrar interface; (3) Full interplay and consistency of technical and business requirements; and (4) Demonstrates that technical resources are already on hand, or committed or readily available. 0 - fails requirements:</p>

					Does not meet the requirements to score 1.	
	316	<p>Security Policy: provide an outline of the security policy and procedures for the proposed registry, including:</p> <ul style="list-style-type: none"> • system and network access control, ensuring systems are maintained in a secure fashion, including details of how they are monitored, logged and backed up; • provisioning and other measures that mitigate risks posed by denial of service attacks; • computer and network incident response policies, plans, and processes; • plans to minimize the risk of unauthorized access to its systems or tampering with registry data; • intrusion detection mechanisms, • a threat analysis for the proposed registry and the defenses that will be deployed against those threats; • details for auditing capability on all 		0-2	<p>Complete answer demonstrates:</p> <p>(1) detailed description of processes and solutions deployed to manage logical security across infrastructure and systems, monitoring and detecting threats and security vulnerabilities and taking appropriate steps to resolve them;</p> <p>(2) security capabilities are consistent with the <u>overall business approach</u> business model and planned size of the registry;</p> <p>(3) a technical plan adequately resourced in the planned costs <u>detailed in the financial section</u> in the registry business plan; <u>and</u></p>	<p>2 - exceeds requirements: Response includes</p> <p>(1) Evidence of highly developed and detailed security capabilities, with various baseline security levels, independent benchmarking of security metrics, robust periodic security monitoring, and continuous enforcement;</p> <p>-(2) Independent assessment report available with leading practices being followed; <u>and</u></p> <p>(3) Full interplay of business and technical requirements; <u>-including any special security requirements due to the</u></p>

	<p>network access;</p> <ul style="list-style-type: none"> • <u>independent assessment report to demonstrate security capabilities, if any;</u> • <u>resources to secure integrity of updates between registry systems and nameservers, and between nameservers, if any.</u> <ul style="list-style-type: none"> • <u>any augmented security levels or capabilities commensurate with the nature of the applied for gTLD string.</u> 		<p>(4) security measures are consistent with any commitments made to registrants regarding security levels; and (5) security measures appropriate for the applied for gTLD string. (For example, certain financial or industry-oriented TLDs may call for a higher level of security)</p>	<p>nature of the applied for gTLD string; and (4) <u>Evidence of Technical resources</u> are already on hand or fully committed. 1 - meets requirements: Response includes: (1) Adequate level of detail to substantially demonstrate capability and knowledge to meet this element; (2) Evidence of adequate security capabilities, enforcement of logical access control, threat analysis, incident response and auditing. Ad-hoc oversight and governance and leading practices being followed; (3) Security capabilities aligned with the <u>overall business approach as described in the application, business model/scale</u> and <u>any</u> commitments made to registrants; and (4) <u>D</u>emonstrates that technical resources required to carry through the plans for this element are readily available. 0 - fails requirements: Does not meet the</p>
--	--	--	---	---

						requirements to score 1-
--	--	--	--	--	--	--------------------------

	<p>327 IPv6 Reachability: the registry supports access to <u>Whois, Web based Whois and any other Registration Data Publication Service as described in Specification 6 to the Registry Agreement. The registry also supports</u> DNS servers over an IPv6 network <u>for at least 2 nameservers</u>. IANA currently has a minimum set of technical requirements for IPv4 name service. These include two nameservers separated by geography and by network topology, that each serve <u>ing</u>e a consistent set of data, and are reachable from multiple locations across the globe. Describe how the registry will meet this same criterion for IPv6, requiring IPv6 transport to their network. <u>List all services that will be provided over IPv6, and describe the IPv6 connectivity and provider diversity that will be used.</u></p>		<p>0-2 Complete answer demonstrates: (1) complete knowledge and understanding of this aspect of registry technical requirements; (2) a technical plan scope/scale that is consistent with <u>the overall business approach</u>the business model and planned size of the registry; <u>and</u> (3) a technical plan that is adequately resourced in the planned costs <u>detailed in the financial section in the registry business plan;</u> and (4) identification of IPv6-reachable name servers that meet these requirements.</p>	<p>2 - exceeds requirements: Response includes: (1) Evidence of highly developed and detailed network architecture and implementation plan, indicating IPv6 reachability allowing IPv6 transport in the network in compliance to IPv4 IANA specifications with at least 2 separated nameservers; (2) A high level of resiliency; (3) Full interplay and consistency of technical and business requirements; and (4) <u>Evidence of t</u>Technical resources are already on hand or <u>fully</u> committed.</p> <p>1 - meets requirements: Response includes (1) Adequate level of detail to substantially demonstrate capability and knowledge required to meet this element; (2) Evidence of adequate implementation plan addressing requirements for IPv6 reachability, including identification <u>of IPv6 of IPv6</u> reachable</p>
--	--	--	---	---

						<p>nameservers; (3) IPv6 plans commensurate with <u>overall business approach as described in the application business model</u>; and demonstrates that technical resources required to carry through the plans for this element are readily available.</p> <p>0 - fails requirements: Does not meet the requirements to score 1-</p>
--	--	--	--	--	--	--

	338	<p>Whois: describe how the applicant will comply with ICANN's Registry Publicly Available Registration Data (Whois) specifications for data objects, bulk access, and lookups as defined in the base agreement: "Specification for Registration Data Publication Services." (Spec 4) Describe how the Applicant's Registry Publicly Available Registration Data (Whois) service will comply with RFC 3912.</p> <p><u>Describe how the applicant will comply with performance specifications for Whois service as in Specification 6 to the draft registry agreement.</u></p>		0-1	<p>Complete answer demonstrates:</p> <p>(1) complete knowledge and understanding of this aspect of registry technical requirements;</p> <p>(2) a technical plan scope/scale consistent with the <u>overall business approach</u>business model and planned size of the registry; and</p> <p>(3) a technical plan that is adequately resourced in the planned costs <u>detailed in the financial section in the registry business plan.</u></p>	<p>1 - meets requirements:</p> <p>Response includes</p> <p>(1) adequate level of detail to substantially demonstrate capability and knowledge required to meet this element; and</p> <p>(2) Whois services compliant with RFCs and provide all necessary functionalities for user interface;</p> <p>(3) Whois capabilities commensurate with <u>the overall business approach as described in the application business model</u>; and (4) demonstrates that technical resources required to carry through the plans for this element are already on hand or readily available.</p> <p>0 - fails requirements:</p> <p>Does not meet the requirements to score 1.</p>
	349	<p>Registration Life Cycle: provide a detailed description of the proposed registration lifecycle for domain names in the proposed gTLD. The description must explain the various registration states as well as the criteria and procedures that are used to change state. It must describe the typical registration lifecycle of create/update/delete and all intervening steps such as pending, locked, expired, and transferred that may apply. Any time elements</p>		0-1	<p>Complete answer demonstrates: (1) complete knowledge and understanding of registration lifecycles and states; and</p> <p>(2) consistency with any specific commitments made to registrants as adapted to the <u>overall business approach for business plan of</u> the proposed gTLD.</p>	<p>1 - meets requirements:</p> <p>Response includes</p> <p>(1) Evidence of highly developed registration life cycle with definition of various registration states and transition between the states;</p> <p>2) Consistency of</p>

		that are involved - for instance details of add-grace or redemption grace periods, or notice periods for renewals or transfers - must also be clearly explained.			registration lifecycle with <u>any</u> commitments to registrants and with <u>business and technical and financial</u> plans; and (3) <u>D</u> emonstrates that technical resources required to carry through the plans for this element are already on hand or readily available. 0 - fails requirements: Does not meet the requirements to score 1.	
	35	<p><u>Abuse Prevention and Mitigation: Applicants should describe the proposed policies and procedures to minimize abusive registrations and other activities that have a negative impact on Internet users.</u></p> <p><u>Answers should include:</u></p> <ul style="list-style-type: none"> <u>Safeguards the applicant will implement at the time of registration, policies to reduce opportunities for abusive behaviors using registered domain names in the TLD, and policies for handling complaints regarding abuse. Each registry operator will be required to establish and publish on its website a single abuse point of contact responsible for addressing matters requiring expedited attention and providing a timely response to abuse complaints concerning all names registered in the TLD through all registrars of record, including those involving a reseller.</u> <u>A description of rapid takedown or suspension systems that will be implemented.</u> 		0-1	<p><u>Complete answer demonstrates:</u></p> <p>(1) <u>Comprehensive abuse policies and procedures that will effectively minimize potential for abuse in the TLD;</u></p> <p>(2) <u>Plans are adequately resourced in the planned costs detailed in the financial section;</u></p> <p>(3) <u>Policies and procedures identify and address the abusive use of registered names at startup and on an ongoing basis; and</u></p> <p>(4) <u>When executed in accordance with the</u></p>	<p>1 – meets requirements</p> <p>(1) <u>Evidence of highly developed abuse policies and procedures;</u>(2) <u>Plans are consistent with overall business approach and any commitments made to registrants; and</u></p> <p>(3) <u>Plans are sufficient to result in compliance with contractual requirements.</u></p>

		<ul style="list-style-type: none"> <u>Proposed measures for management and removal of orphan glue records for names removed from the zone.</u> 			<u>Registry Agreement, plans will result in compliance with contractual requirements.</u>	<u>0 – fails Requirements</u> <u>Does not meet the requirements to score 1.</u>
	<u>36</u> <u>40</u>	Measures against Abuse: Applicants should describe how their proposal will create policies and practices that minimize abusive registrations and other activities that affect the legal rights of others. Describe how the proposal will implement safeguards against allowing unqualified registrations, and reduce opportunities for behaviors such as phishing or pharming. Answers may also include additional measures such as abusive use policies, takedown procedures, registrant pre-verification, or authentication procedures, or other covenants.	<u>Note: Although no changes from v2 of the Applicant Guidebook are present here, the applicant questions and requirements regarding abuse policies are expected to evolve as a result of community discussions on how to address the “overarching issues” of trademark protection and malicious conduct. See https://st.icann.org/new-gtld-overarching-issues/index.cgi. ICANN continues to encourage suggestions in this area. Note that requirements for rights protection mechanisms remain under discussion. The applicant questions and criteria included here are expected to evolve as a result of community consideration on an effective approach to rights protection in new gTLDs. In this regard, various proposals and corresponding guidebook language are being published for comment simultaneously with the publication of this draft of the Applicant Guidebook.</u>	0-2	Complete answer describes mechanisms designed to (1) prevent abusive registrations, and to (2) identify & address the abusive use of registered names on an ongoing basis.	2 - exceeds requirements: (1) Evidence of highly developed rights protection mechanisms (RPM), specified in detail for inclusion into registry agreement. (2) Mechanisms provide pre-registration and post-registration (beyond UDRP) protections, and (3) Mechanisms address registry start-up and ongoing operations. 1 - meets requirements: (1) Proposed registry operator commits to and describes protection of rights mechanisms and (2) These mechanisms provide protections at least at registry start-up. 0 - fails requirements: Does not meet the requirements to score a 1.

	<p><u>37</u> 41</p> <p>Data Backup: provide</p> <ul style="list-style-type: none"> • details of frequency and procedures for backup of data, • hardware, and systems used for backup • data format, • data backup features, and • procedures for retrieval of data/rebuild of database. 		<p>0-2</p> <p>Complete answer demonstrates:</p> <p>(1) detailed backup processes deployed, retrieval process and frequency;</p> <p>(2) a backup and retrieval process that is consistent with the <u>overall business approach</u>business model and planned size of the registry; and</p> <p>(3) a technical plan that is adequately resourced in the planned costs <u>detailed in the financial section in the registry business plan.</u></p>	<p>2 - exceeds requirements: Response includes</p> <p>(1) <u>(1)</u> Evidence of highly developed data backup policies and procedures, with continuous robust monitoring, continuous enforcement of backup security, regular review of backups, regular recovery testing, and recovery analysis.</p> <p>Leading practices being followed:</p> <p>(2) <u>(2)</u> A high level of resiliency; and</p> <p>(3) Full interplay and consistency of technical and business requirements; and</p> <p>(4) <u>Evidence of IT</u> Technical resources are already on hand or fully committed.</p> <p>1 - meets requirements: Response includes</p> <p>(1) Adequate backup procedures, recovery steps, and retrieval capabilities available; and</p> <p>(2) Minimal leading</p>

	<p>38 42</p> <p>Escrow: describe how the applicant will comply with the escrow arrangements documented in the Registry Data Escrow Specifications (<u>Specification 2 of attached as part of the draft RegistryBase Agreement</u>), including plans for daily backups and archiving of registry information.</p>		<p>0-2</p> <p>Complete answer demonstrates: (1) compliance with -Specification 2 of the draft <u>Registrybase Agreement</u>; (2) a reasonable plan to perform daily backups and archiving of registry information; (23) a technical plan that is adequately resourced in the planned costs <u>detailed in the financial section in the registry business plan</u>, and (34) the escrow arrangement is consistent with the <u>overall business approach</u>business model and size/scope of the registry.</p>	<p>2 - exceeds requirements: Response includes (1) Evidence of highly developed and detailed data escrow procedures, including continuous monitoring, archiving, and periodic review for continuous registry operations; (2) Evidences compliance with Specification 2 of the <u>Registrybase Agreement</u>; (3) Full interplay of technical and business requirements;;and (4) <u>Evidence of</u> technical resources are already on hand or committed. 1 – meets requirements: Response includes (1) Adequate level of detail to substantially demonstrate capability and knowledge required to meet this element; (2) Data escrow plans are sufficient to result in compliance with the Data Escrow Specification; and (3) (3) Escrow capabilities are commensurate with <u>the</u></p>
--	---	--	--	---

						<p><u>overall business approach as described in the application business model</u>; and (4) .4) dDemonstrates that technical resources required to carry through the plans for this element are readily available.</p> <p>0 – fails requirements: Does not meet the requirements to score a 1.</p>
	<p>39 43</p>	<p>Registry Continuity: describe how the applicant will comply with registry continuity obligations as described in the Registry Interoperability, Continuity and Performance Specification, attached to as part of the draft <u>BaseRegistry</u> Agreement (<u>Specification 6</u>). For reference, applicants should review the ICANN gTLD Registry Continuity Plan at http://www.icann.org/registries/failover/icann-registry-failover-plan-15jul08.pdf and ICANN's draft registry practices recommendations at http://www.icann.org/en/registries/continuity/draft-plan-best-practices-20oct07.pdf.</p>	<p>For reference, applicants should review the ICANN gTLD Registry Continuity Plan at http://www.icann.org/en/registries/continuity/gtld-registry-continuity-plan-25apr09-en.pdf.</p>	0-2	<p>Complete answer demonstrates: (1) detailed description showing plans for compliance with registry continuity obligations; (2) a technical plan scope/scale that is consistent with the <u>overall business approach business model</u> and planned size of the registry; ← and (3) a technical plan that is adequately resourced in the planned costs <u>detailed in the financial section in the registry business plan</u>.</p>	<p>2 - exceeds requirements: Response includes (1) Highly developed and detailed systems for maintaining registry continuity; (2) A high level of resiliency; and (3) Full interplay and consistency of technical and business requirements, and (4) <u>Evidence of</u> technical</p>

					resources are already on hand or committed. 1 - meets requirements: Response includes (1) Adequate level of detail to substantially demonstrate capability and knowledge required to meet this element; (2) Continuity plans are sufficient to result in compliance with requirements;; (3) Continuity plans are commensurate with <u>overall business approach as described in the application business model</u> ; and; (4) D emonstrates that technical resources required to carry through the plans for this element are readily available. 0 - fails requirements: Does not meet the requirements to score a 1.	
	<u>404</u> 4	Registry Transition: provide a plan that could be followed in the event that it becomes necessary to transition the proposed gTLD to a new operator, including a transition process. (Responses to this question will be kept confidential.)		0-2	Complete answer demonstrates: (1) complete knowledge and understanding of this aspect of registry technical requirements; (2) a technical plan scope/scale consistent with the <u>overall business approach business model</u> and planned size of the registry; and (3) a technical plan that is	2 - exceeds requirements: Response includes <u>(1)</u> Evidence of highly developed registry transition plan including time required for transitions, feasibility analysis during transition,

					adequately resourced in the planned costs detailed in the financial section in the registry business plan.	robust monitoring the pre- and post-delegation phases;-(2) A high level of resiliency; (3) Full interplay and consistency of technical and business requirements; and (4) A transition provider is already on hand. 1 - meets requirements: Response includes Adequate level of detail to substantially demonstrate capability and knowledge required to meet this element ; (1) (2) Evidence of adequate registry transition plan with ad hoc monitoring during registry transition; and (3) Transition plan is commensurate with <u>the overall business approach as described in the application; business model;</u> and (4) Resources for registry transition are fully committed. 0 - fails requirements: Does not meet the requirements to score a 1.
	415	Failover Testing: provide a description of the failover		0-2	Complete answer demonstrates:	2 - exceeds

	<p>testing plan, including mandatory annual testing of the plan. Examples may include a description of plans to test failover of data centers or operations to alternate sites, from a hot to a cold facility, <u>or</u> registry data escrow testing, or continuity testing with other gTLD registries and ICANN.</p>		<p>(1) complete knowledge and understanding of this aspect of registry technical requirements; (2) a technical plan scope/scale consistent with the <u>overall business approach</u>business model and planned size of the registry; and (3) a technical plan that is adequately resourced in the planned costs <u>detailed in the financial section in the registry business plan.</u></p>	<p>requirements: Response includes (1) Evidence of highly developed and detailed failover testing plan, including periodic testing, robust monitoring, review, and analysis; and (2) -A high level of resiliency; (3) Full interplay and consistency of technical and business requirements; and (4) <u>Evidence of</u> Technical resources for failover testing are already on hand or fully committed. 1 - meets requirements: Response includes (1) Adequate level of detail to substantially demonstrate capability and knowledge required to meet this element; - (2) Evidence of adequate failover testing plan with ad hoc review and analysis of failover testing results. (3) Failover testing plan is commensurate with <u>the overall business approach as described in the application</u>business model; and</p>
--	---	--	--	--

					(4) Demonstrates that technical resources required to carry through the plans for this element are readily available. 0 - fails requirements: Does not meet the requirements to score a 1.	
	42 6	<p>Monitoring and Fault Escalation Processes: provide a description of the proposed (or actual) arrangements for monitoring critical registry systems (including SRS, database systems, DNS servers, publicly available registration data (Whois) service, policy network connectivity, routers and firewalls). This description should explain how these systems are monitored and the mechanisms that will be used for fault escalation and reporting, and should provide details of the proposed support arrangements for these registry systems.</p> <p><u>Applicant will describe monitoring and communication mechanisms to registrars for detecting and signaling registry entries resulting in DNS response sizes exceeding the common 512-byte threshold and the RFC-3226-mandated 1220-byte threshold once DNSSEC support is provided.</u></p>		0-2	<p>Complete answer demonstrates:</p> <p>(1) complete knowledge and understanding of this aspect of registry technical requirements;</p> <p>(2) a technical plan scope/scale that is consistent with the <u>overall business approach-business model</u> and planned size of the registry;</p> <p>(3) a technical plan that is adequately resourced in the planned costs <u>detailed in the financial section in the registry business plan;</u> and</p> <p>(4) consistency with the commitments made to registrants regarding system maintenance.</p>	<p>2 - exceeds requirements: Response includes</p> <p>(1) Evidence showing highly developed and detailed fault tolerance/monitoring and redundant systems deployed with real-time monitoring tools / dashboard (metrics) deployed and reviewed regularly;</p> <p>(2) A high level of resiliency;</p> <p>(3) Full interplay and consistency of technical and business requirements, and</p> <p>(3) <u>Evidence of t</u>Technical resources for monitoring and fault escalation are already on hand or fully committed.</p> <p>1 - meets requirements: Response includes</p> <p>(1) Adequate level of detail to substantially</p>

						<p>demonstrate capability and knowledge required to meet this element;</p> <p>(2) Evidence showing adequate fault tolerance/monitoring systems planned with ad hoc monitoring and limited periodic review being performed;</p> <p>-(3) Plans are commensurate with <u>overall business approach; business model;-;</u> and</p> <p>(4) Demonstrates that technical resources required to carry through the plans for this element are readily available.</p> <p>0 - fails requirements: Does not meet the requirements to score 1-.</p>
--	--	--	--	--	--	---

	<p>4 3 7</p> <p>OPTIONAL. DNSSEC: if the proposed gTLD will offer DNSSEC as a registry service at the time of launch, dDescribe the policies and procedures the proposed registry will follow, for example, <u>for signing the zone file, for verifying and accepting DS records from child domains, and</u> how keying material will be securely exchanged and stored. Describe how the DNSSEC implementation will comply with <u>relevant RFCs, including but not limited to: RFCs -4033, 4034, 4035, 4310, 4509, and 4641, and 5155; the latter will only be required if Hashed Authenticated Denial of Existence will be offered.</u></p>	<p>DNSSEC is an optional service. Absence of DNSSEC implementation or plans will not detract from an applicant's score. However, ICANN expects that implementation of DNSSEC will be a requirement for all gTLDs within a five year timeframe.</p>	<p>0-2</p>	<p>DNSSEC is an optional service. Complete answer demonstrates: (1) complete knowledge and understanding of this aspect of registry technical requirements; (2) a technical plan scope/scale that is consistent with the <u>overall business approach</u>business model and planned size of the registry; and (3) a technical plan that is adequately resourced in the planned costs <u>detailed in the financial section in the registry business plan.</u></p>	<p>2 - exceeds requirements: Response includes (1) Evidence of highly developed and detailed policies and procedures for <u>offering DNSSEC at time of launch, with in</u> compliance with required RFCs, <u>and</u> secure encryption key management (exchange and storage); (2) Key management procedures for registrants in the proposed TLD; (3) Full interplay and consistency of technical and business requirements; and (4) <u>Evidence of t</u>Technical resources are already on hand or committed. Applicant must also be able to pass requirements for DNSSEC in pre-delegation <u>testing</u>check. 1 - meets requirements: Response includes (1) Adequate level of detail to substantially demonstrate capability and knowledge required to meet this element; (2) Evidence of an adequate DNSSEC implementation plan that</p>
--	---	---	------------	--	---

						<p>provides a high level of resiliency;</p> <p>(32) Technical plan is commensurate with <u>the overall business approach as described in the application; business model;</u> and</p> <p>(4) Demonstrates that technical resources required to carry through the plans for this element are readily available.</p> <p>0 - fails requirements: Does not meet the requirements to score 1-.</p>
--	--	--	--	--	--	--

	<p>448 OPTIONAL. IDNs: state whether the proposed registry will support the registration of IDN labels in the TLD, and if so, how. For example, explain which characters will be supported, and the associated IDN Table with variants identified along with a corresponding registration policy. This includes -public interfaces to the databases such as Whois and EPP. Describe how the IDN implementation will comply with RFCs 3454, 3490, 3491, and 3743 <u>as well as the ICANN IDN Guidelines at <http://www.icann.org/en/topics/idn/implementation-guidelines.htm>.</u></p>	<p>IDNs are an optional service <u>at time of launch</u>. Absence of IDN implementation or plans will not detract from an applicant's score. <u>Applicants who respond to this question with plans for implementation of IDNs at time of launch will be scored according to the criteria indicated here.</u></p>	<p>0-2 IDNs are an optional service. Complete answer demonstrates: (1) complete knowledge and understanding of this aspect of registry technical requirements; (2) a technical plan that is adequately resourced in the planned costs <u>detailed in the financial section in the registry business plan</u>; (3) consistency with the commitments made to registrants in the purpose of the registration and registry services descriptions; and (4) issues regarding use of scripts are settled and IDN tables are <u>complete and publicly available posted.</u></p>	<p>2 - exceeds requirements: Response includes (1) Evidence of highly developed and detailed procedures for IDNs, including complete IDN tables, compliance with IDNA/IDN guidelines and RFCs, periodic monitoring of IDN operations; (2) Evidence of ability to resolve rendering and known IDN issues or IDN <u>spoofing</u> attacks; (3) Full interplay and consistency of technical and business requirements; and (4) <u>Evidence of technical resources are already on hand or committed.</u> and</p> <p>1 - meets requirements: Response includes (1) Adequate level of detail to substantially demonstrate capability and knowledge required to meet this element; (2) Evidence of adequate implementation plans for IDNs in compliance with IDN/IDNA guidelines; (3) IDN plans are consistent with <u>the overall business approach as</u></p>
--	---	--	--	---

						<p><u>described in the application business model; and</u></p> <p>(4) Demonstrates that technical resources required to carry through the plans for this element are readily available.</p> <p>0 - fails requirements: Does not meet the requirements to score a 1.</p>
Demonstration of Financial Capability	459	<p>Financial Statements: provide audited <u>or certified</u> financial statements for the most recently completed fiscal year for the applicant, and unaudited financial statements for the most recently ended interim financial period for the applicant. For newly-formed applicants, provide the latest available financial statements. (Responses to this question will be kept confidential.)</p> <p><u>Financial statements are used in the analysis of projections and costs.</u></p> <p><u>(Responses to this question will be kept confidential.)</u></p>	<p>-The questions in this section (45-50) are intended to give applicants an opportunity to demonstrate their financial capabilities to run a registry.</p>	0-12	<p>Audited <u>or certified</u> financial statements are prepared in accordance with IFRS (International Financial Reporting Standards) adopted by the IASB (International Accounting Standards Board) or U.S. GAAP (Generally Accepted Accounting Principles). This will include a balance sheet and income statement reflecting the applicant's financial position and results of operations. In the event the applicant is a newly formed entity for the purposes of applying for a gTLD and without an operating history, the applicant must submit pro forma financial statements reflecting the entity's projected capitalization for</p>	<p>2-- completely meets requirements: (1) Complete and authenticated statements are provided as well as (2) unaudited statements for most recent period.</p> <p>1 - minimally meets requirements: <u>Complete audited or certified financial statements are provided, at the highest level available in the applicant's jurisdiction. Where such financial statements are not available, the applicant has provided an explanation and has provided, at a minimum, unaudited financial statements.</u> For applicants where audited statements are not available, pro forma financial statements</p>

				<p>the registry operator. Funding in this latter case must be verifiable as a true and accurate reflection and cannot include prospective funding. <u>Where audited or certified statements are not available, applicant has provided adequate explanation as to practices in its jurisdiction and has provided, at a minimum, unaudited financial statements.</u></p>	<p>reflecting the entity's projected capitalization for the registry operator are provided. 0 - fails requirements: Does not meet the requirements to score 1-or 2. For example, entity with an operating history fails to provide audited <u>or certified</u> statements.</p>
	<p>465 0</p>	<p>Projections Template: provide financial projections for costs and funding using <u>Template 1 (attached) for the most likely scenario the attached template. The start-up period is the time from submission of the application to delegation of the TLD.</u> The template is intended to provide commonality among TLD applications and thereby facilitate the evaluation process. Include explanations for any significant variances between years (or expected in years beyond the timeframe of the template) in any category of costing or funding. <u>Describe the basis for the numbers provided, including studies, reference data, or other steps taken to develop the responses and validate any assumptions made.</u></p> <p>(Responses to this question will be kept confidential.)</p>		<p>0-2</p> <p>Applicant has provided a thorough model that demonstrates a sustainable business (even if break-even is not achieved through the first three years of operation).</p> <p><u>Applicant's description of projections development is sufficient to show due diligence and basis for projections.</u></p>	<p>2 - exceeds requirements: (1) Model is described in sufficient detail to be determined as a conservative balance of cost, funding and risk by an expert in registry operations. <u>i.e.,</u> funding and costs are highly consistent and are representative of a robust on-going concern, and (2) Anticipated ranges in revenue and cost are explained in detail. All operations are funded even at negative ends of expected ranges; <u>and</u> (3) Lead-up work done in developing projections is</p>

						<p><u>described fully and indicates a sound basis for numbers provided.</u></p> <p>1 - meets requirements:</p> <p>(1) Demonstrates resources and plan for a sustainable operations; business.</p> <p>(2) Most important, financial assumptions about the registry services, funding and market are identified; ;</p> <p>(3) Financial estimates are defensible; ; and</p> <p>(4) Model is described in sufficient detail to be determined as a reasonable balance of cost, funding and risk, k by an expert in registry operations. l.e., funding and costs are consistent and are representative of an on-going concern.</p> <p>0 - fails requirements:</p> <p>Does not meet the requirements to score a 1.</p>
--	--	--	--	--	--	--

	<p>475 ± (a) Costs: describe and explain the expected costs of setting up and operating the proposed Registry. As described in the Applicant Guidebook, the information provided will be considered in light of the entire application and the evaluation criteria. Therefore, this answer should agree with the information provided in the template to: 1) maintain registry operations, 2) provide registry services described above, and 3) satisfy the technical requirements described in the Demonstration of Technical & Operational Capability section. (Responses to this question will be kept confidential.)</p>		<p>0-2 Costs identified are consistent with the proposed registry services, adequately fund technical requirements, and are consistent with proposed mission/purpose of the registry. A reasonable person with registry technical operations experience would agree the costs projected are reasonable for a registry of size and scope described in the application. Costs identified include the financial instrument described in question 503 below.</p>	<p>2 - exceeds requirements: (1) Cost elements described are clearly and separately tied to each of the aspects of registry operations: registry services, technical requirements, and other aspects as described by the applicant. (2) Estimated costs are conservative and (3) consistent with an operation of the registry volume/scope/size as described by the applicant. (34) Most estimates are derived from actual examples of previous registry operations or equivalent; <u>and</u>. (45) Conservative estimates are based on those experiences and describe a range of anticipated costs and use the high end of those estimates. 1 - meets requirements: (1) Cost elements described reasonably cover all of the aspects of registry operations: registry services, technical requirements and other aspects as described by the applicant; <u>and</u>.</p>
--	--	--	--	---

	<p>485 2</p> <p>(a) Funding and Revenue: Funding can be derived from several sources (e.g., existing capital or proceeds/revenue from operation of the proposed registry). For each source (as applicable), describe: I) How existing funds will provide resources for both: 1) start-up of operations, and 2) ongoing operations, II) a description of the revenue model including projections for transaction volumes (if the applicant does not intend to rely on registration revenue in order to cover the costs of the registry's operation, it must clarify how the funding for the operation will be developed and maintained in a stable and sustainable manner), III) outside sources of funding, the applicant must (where applicable) provide evidence of the commitment by the party committing the funds.</p> <p>(Responses to this question will be kept confidential.)</p>		<p>0-2</p> <p>Funding resources are clearly identified and adequately provide for registry cost projections. Sources of capital funding are clearly identified, held apart from other potential uses of those funds and available. The plan for transition of funding sources from available capital to revenue from operations (if applicable) is described. Outside sources of funding are documented and verified and must not include prospective sources of funds. Sources of capital funding required to sustain registry operations on an on-going basis are identified. The projected revenues are consistent with the size and projected penetration of the target markets.</p>	<p>2 - exceeds requirements:</p> <p>(1) Existing funds are quantified, segregated and earmarked for registry operations;:-</p> <p>(2) If on-going operations are to be resourced from existing funds (rather than revenue from on-going operations) that funding is segregated and earmarked for this purpose only in an amount adequate for three years operation;:-</p> <p>(3) Revenues are clearly tied to projected business volumes, market size and penetration;:- and</p> <p>(4) Assumptions made are regarded as conservative by industry experts.</p> <p>1 - meets requirements:</p> <p>(1) Existing funds are quantified, identified as available and budgeted;:-</p> <p>(2) If on-going operations are to be resourced from existing funds (rather than revenue from on-going operations) that funding is quantified and its sources identified in an amount adequate for three years operation;:-</p> <p>(3) Revenues are directly related to projected business volumes, market</p>
--	---	--	--	--

						size and penetration; and (4) Assumptions made are regarded as reasonable by industry expert. 0 - fails requirements: Does not meet the requirements to score a 1.
		(b) Describe anticipated ranges in projected funding and revenue. Describe factors that affect those ranges. (Responses to this question will be kept confidential.)				
	495 3	(a) Contingency Planning: describe your contingency planning: identify any projected barriers to implementation of your business plan and how they affect cost, funding or timeline in your planning. E.g., have you identified any particular regulation, law or policy that might impact the Registry Services offering? (Responses to this question will be kept confidential.)		0-2	Contingencies and risks are identified and included in the cost and funding analyses. Action plans are identified in the event contingencies occur. The model is resilient in the event those contingencies occur. Responses address the probability and resource impact of the contingencies identified.	2 - exceeds requirements: (1) Model identifies thoroughly the key risks and the chances that each will occur: operational, business, legal, and other outside risks; and- (2) Action plans and operations adequately resourced in the existing funding and revenue plan even if contingencies occur. 1 - meets requirements: (1) Model identifies the key risks with sufficient detail to be understood by a business person with experience in this area; - (2) Response gives some consideration to probability of contingencies identified; - and- (3) If resources are not available to fund

						contingencies in the existing plan, funding sources and a plan for obtaining them are identified. 0 - fails requirements: Does not meet the requirements to score a 1.
		(b) Describe your contingency planning where funding sources so significantly under run your business plan that material deviations from your implementation model are required. In particular, how will on-going technical requirements be met? <u>Complete a financial projections template (Template 2) for the worst case scenario.</u> (Responses to this question will be kept confidential.)				
		(c) Describe your contingency planning where activity volumes so significantly exceed the high projections that material deviation from your implementation model are required. In particular, how will on-going technical requirements be met? (Responses to this question will be kept confidential.)

Continuity: Registrant protection is critical and thus New gTLD applicants are requested to provide evidence indicating that critical functions will continue to be performed even if the applicant's business suffers or funding is not sustained. First, costs for maintaining critical registrant protection functions are to be estimated. Second, methods of securing the funds required to perform these functions for three to five years are to be described by the applicant.

1. (Responses to this question will be kept confidential.)(a) Provide a cost estimate for funding basic registry operations on an annual basis. The basic functions of a registry which must be supported even if an applicant's business and/or funding fails are:

- a) Maintenance of TLD nameservers and DNS for registered domain names;
- b) Operation of the Shared Registration System;
- c) Provision of Whois service
- d) Maintenance of registrar billing and accounting processes;
- e) Maintenance of data security processes and regular escrow deposits;
- f) Maintenance of IDN Tables (if

1. Applicants are requested to provide cost estimates for funding basic operations on an annual basis. The basic functions of a registry which must be supported even if an applicant's business and/or funding fails include:

- a. — Maintenance of nameservers and DNS for registered domain names
- b. — Shared Registration System
- c. — Whois service
- d. — Registrar billing and accounting
- e. — Data security and data escrow
- f. — IDN Tables (if IDNs are offered by the registry)
- g. — DNSSEC Keys (if DNSSEC is offered by the registry)

These are identified as critical functions of a registry in the gTLD Registry Continuity Plan; see <http://www.icann.org/en/registries/continuity/> for more information.

2. Applicants must provide evidence of how the funds required for performing these basic functions are ensured, so as to protect registrants. Evidence can be in the form of financial instruments or contracts such as:

- Contracting with Other Registries: A contract can be entered into whereby a more established and secure

0-3

Figures provided are based on an accurate estimate of costs. Documented evidence or detailed plan for ability to fund on-going basic registry operations for registrants for a period of three to five years in the event of registry failure, default or until a successor operator can be designated. Evidence of financial wherewithal to fund this requirement prior to delegation. This requirement must be met prior to or concurrent with the execution of the registry agreement. ~~delegation of the registry.~~

~~3 - exceeds requirements:~~
~~(1) Costs are commensurate with technical plans and overall business approach as described in the application; and~~
~~(2) Financial instrument is secured and formal agreement is made and fully funded with back up services provider; or other financing and arrangements are in place to provide for on-going operations for at least three of five years in the event of failure.~~
~~2 - exceeds requirements:~~
~~Financial instrument is secured; formal agreement is made and fully funded with back-up services provider; or other financing and arrangements are in place to provide for on-going operations of three years in the event of failure.~~
~~1 - meets requirements:~~
~~(1) Costs are commensurate with technical plans and overall business approach as described in the application; and~~
~~Separate (2) Funding is~~
