

ccTLDs: GOVERNANCE MODELS

JUNE 2020

Disclaimer

The following data analysis is **for informational purposes** only.

It **may not be accurate** due to assumptions made about the legal nature of the 'losing' and 'gaining' registry. Please **do not refer** to these data as an authoritative source.

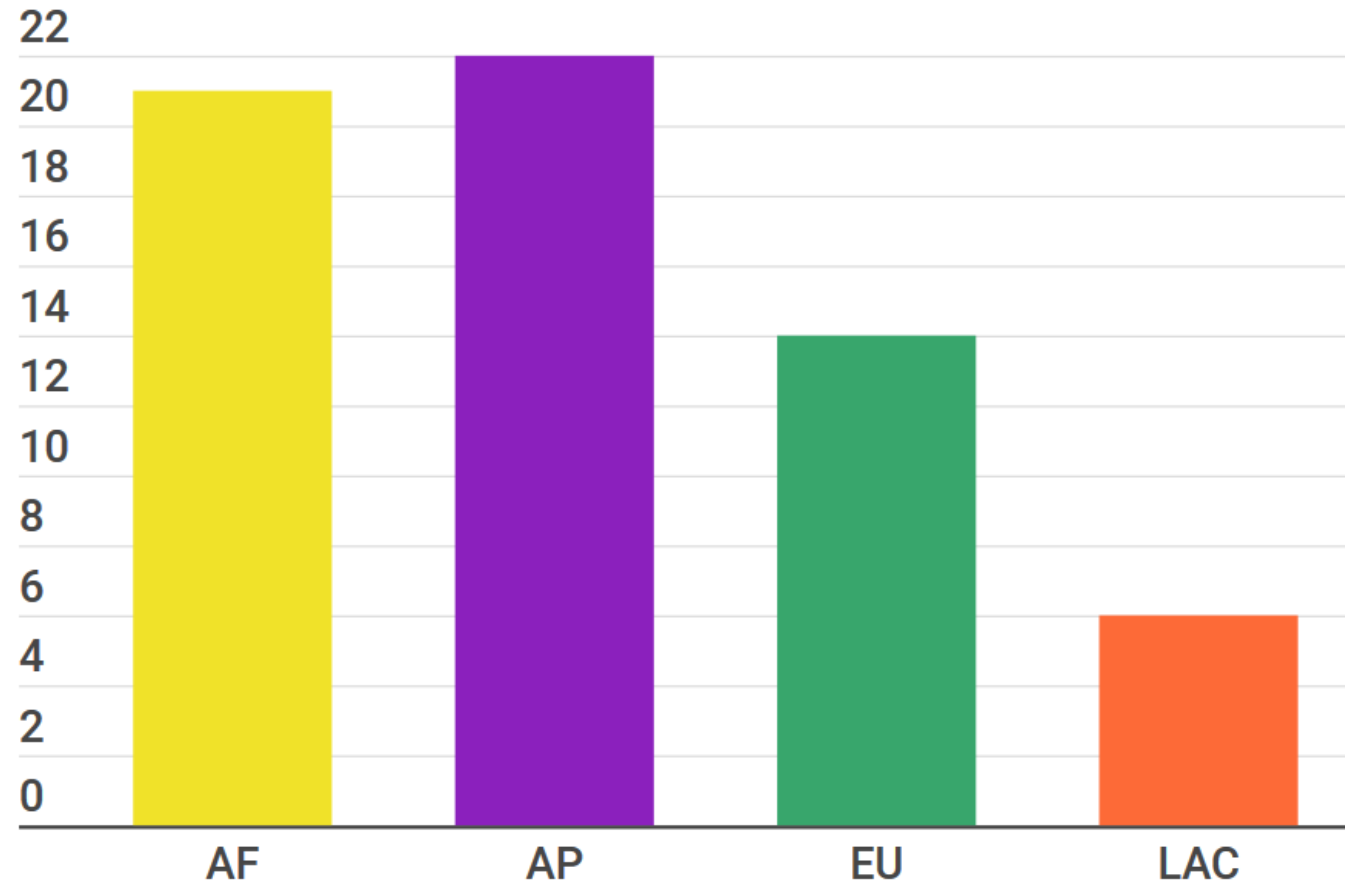

As different regional organisations use different models to describe the legal structure of ccTLD registries, in some cases necessary adjustments and assumptions were made. Although we believe that the data show the dominating trends in AF, AP, EU, and LAC regions, percentage of each governance models may not be accurate.

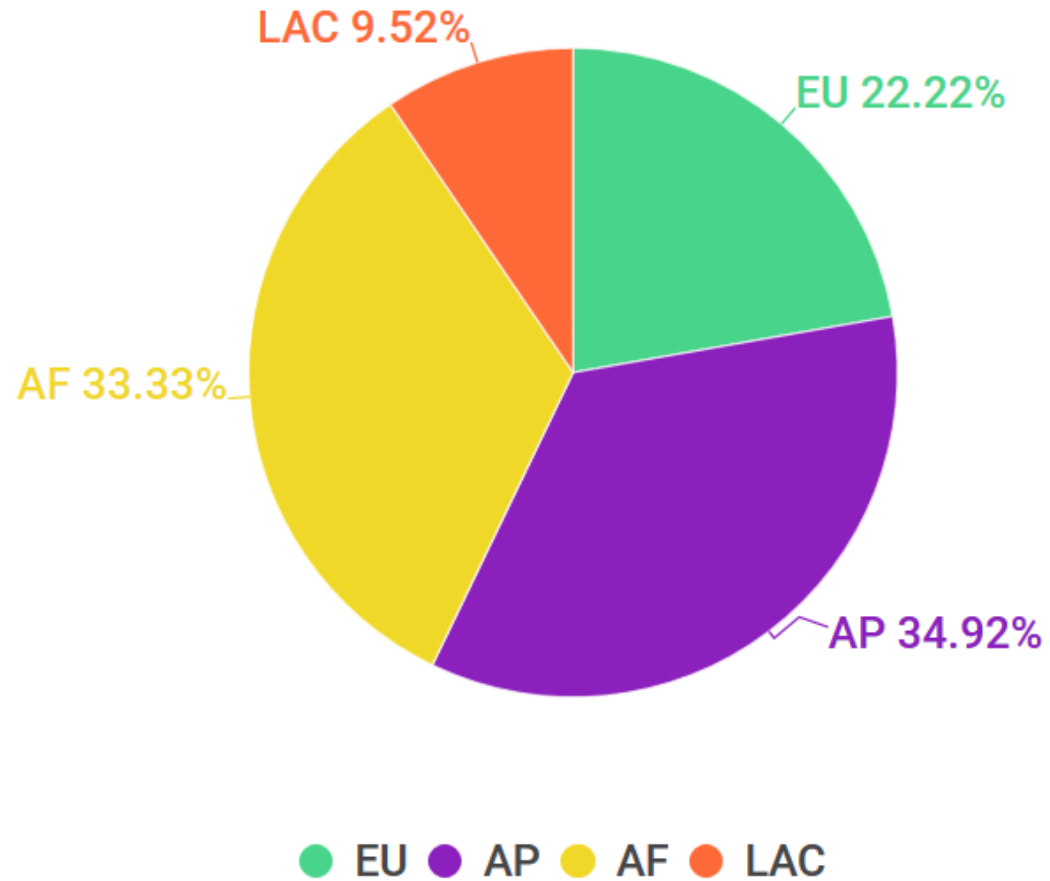

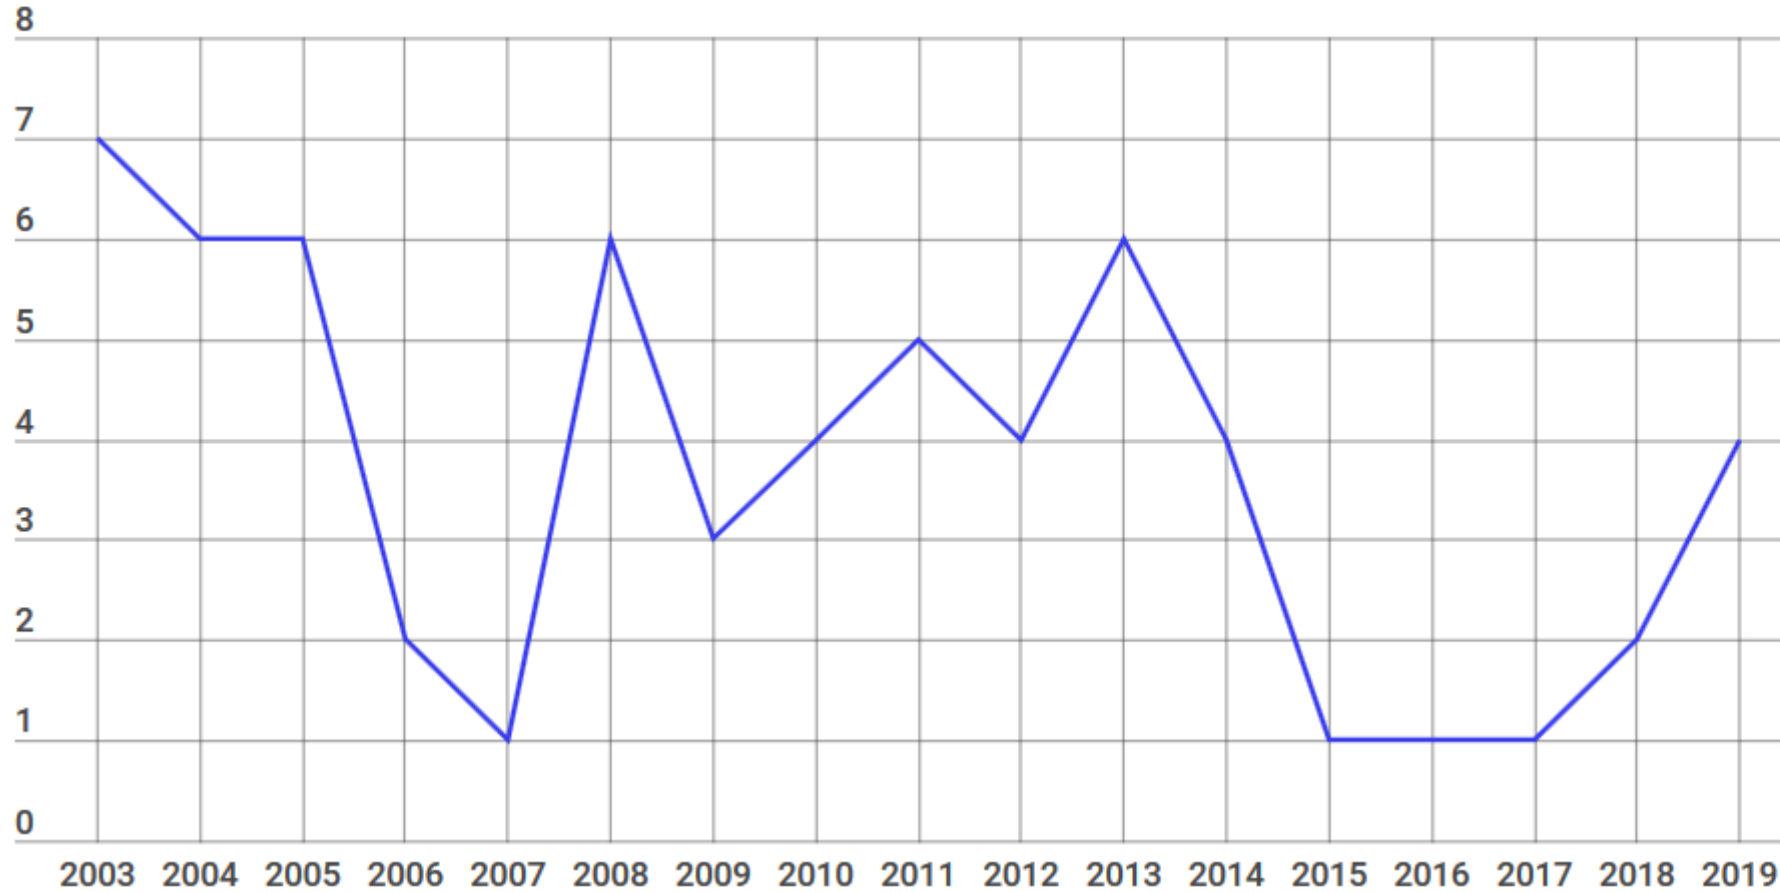

Total Number of Transfers since 2003

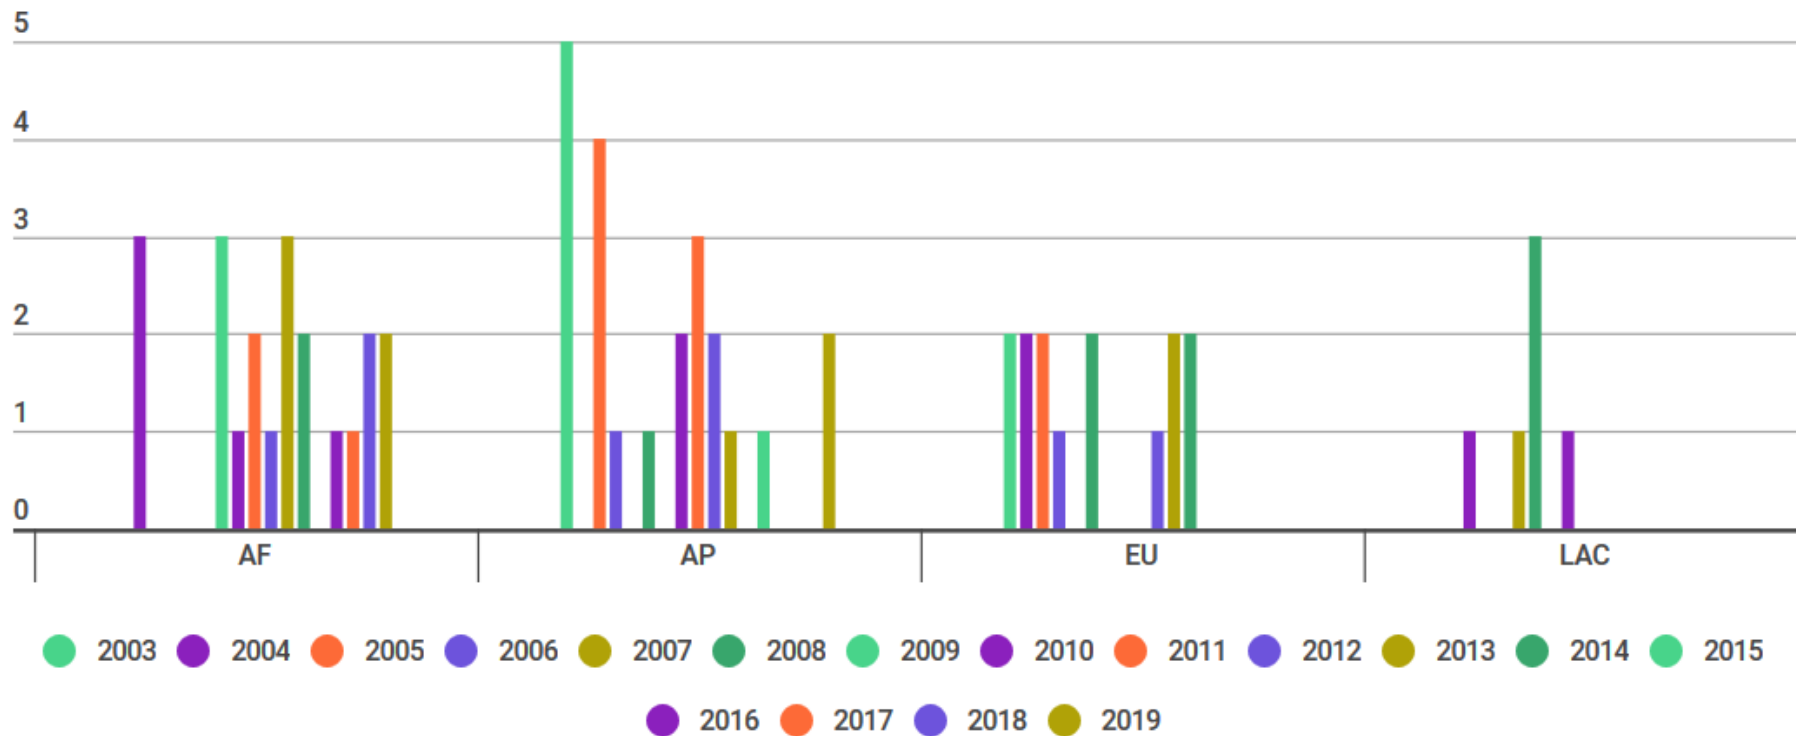

Total Number of Transfers since 2003

Number of Transfers per Year

Number of Transfers per Year

Changes of Governance Models

| Old \ New | ACA | COMP | GOV | ORG | Total |
