

I C A N N COMMUNITY FORUM	76
CANCÚN 11-16 March 2023	

ccNSO & ccTLD-related ICANN Board members

Wednesday, 15 March 2023 | 21:30-22:30 UTC

ICANN76

agenda

1. Welcome
2. The board's goals for 2023 and how they relate to ccNSO affairs
3. Progress on improving ICANN's work prioritization
4. Progress and thinking on the holistic review pilot proposal
5. Update and discussion: implementation & review of ccNSO developed policies
6. AOB
7. Closure

1. Board's goals for 2023

- What are they?
- Are there any of them highly related to ccNSO affairs?

2. Progress on improving ICANN's work prioritization

Setting ICANN's priorities has been a recurring topic in the discussions to date, and the ccNSO through its SOPC and other commentaries have always urged ICANN to set priorities. Last year, the Prioritization Framework was introduced to improve ICANN's priority setting process.

- Can the community expect additional improvements?
- Will the priority framework be re-used for the next FY five-year plan and annual operating plan and budget?
- Has the prioritization process improved in your opinion?

3. Progress and thinking on the holistic review pilot proposal

- The ccNSO Council provided feedback, as did other community groups.
- What will be the next steps, and how is ccNSO feedback taken into consideration?
- Related question from Board members:
How does ccNSO envision and takes care of its continuous improvement?

4. Update and discussion: Implementation & review of ccNSO developed policies

- By end 2023, the ccNSO is likely to conclude both Part 2 on ccPDP3-RM (review mechanisms) and the ccPDP4 on the (de-)selection of IDN ccTLD strings.
- Following the adoption of the ccTLD retirement policy (ccPDP3-RET), the ccNSO is exploring how to structure the interaction between the ccNSO & ICANN (org and the Board) to ensure predictability and clarity of roles with respect to the implementation of policies developed by the ccNSO and even beyond implementation.
- Who determines when the implementation is completed and is available to be used i.e operational?
- What is the expected role of the ccNSO with respect to implementation, if any?
- Will the policy and its implementation be reviewed, and if so who decides?
- What are the roles and responsibilities of the Board, ICANN org and ccNSO with respect to a policy developed by the ccNSO and after the Board has approved the recommended policy?
