

# Argentina en Internet

35 años de la creación  
del dominio .ar

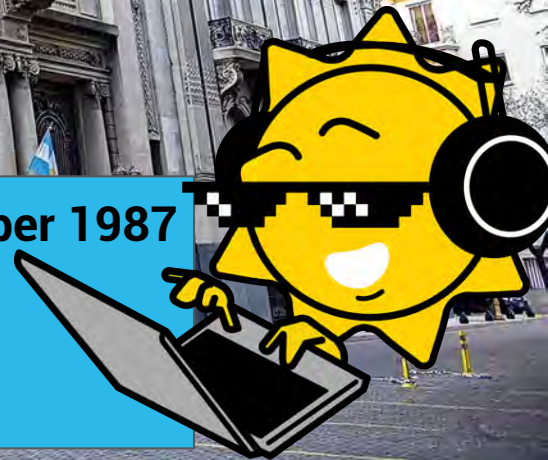

NIC.ar 35

In an office somewhere near this building on **23 September 1987** a group of young pioneers received a confirmation:

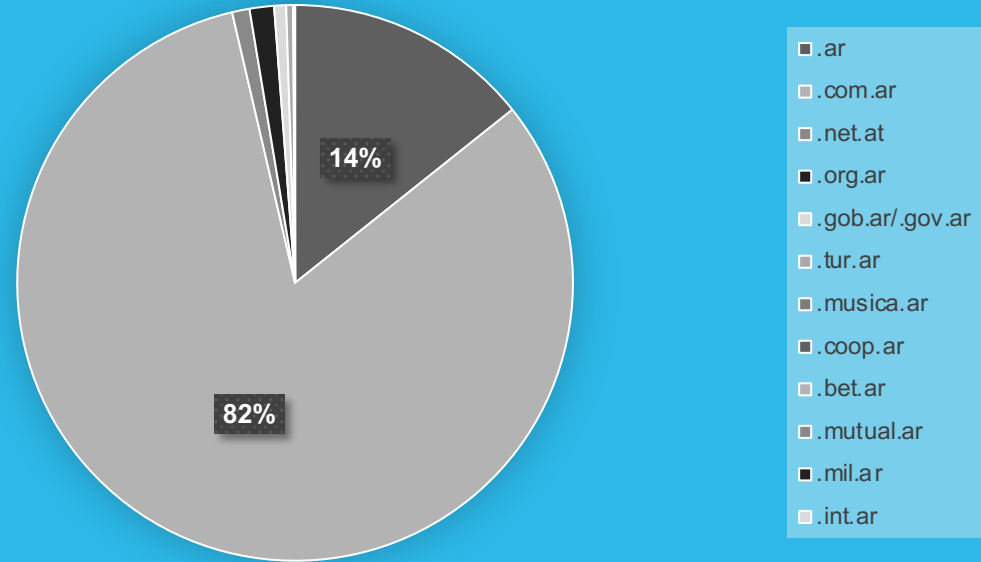

**The domain .ar was officially registered.**

35 years later  
the ccTLD .ar has

669212

current domains

Internet **changed** our lives.

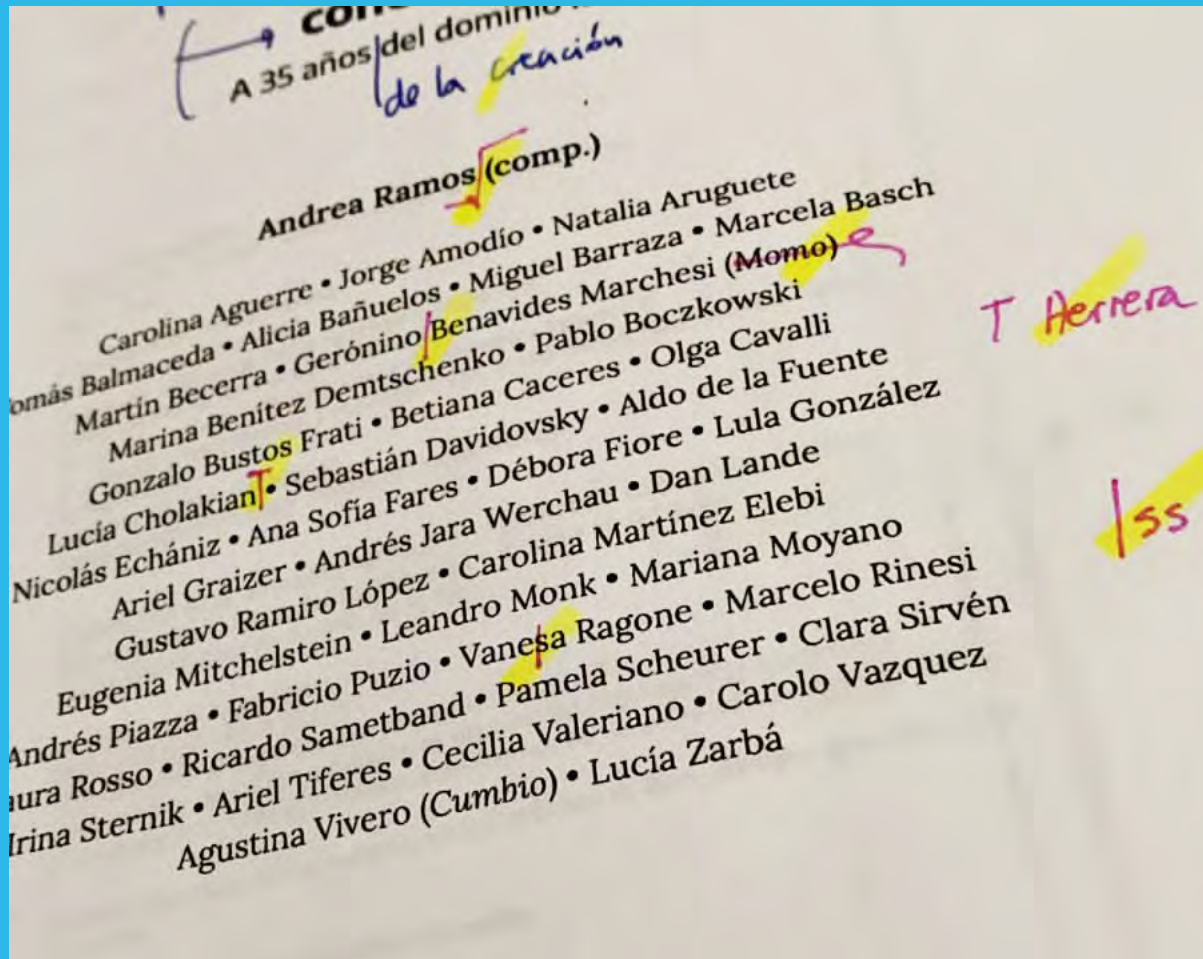

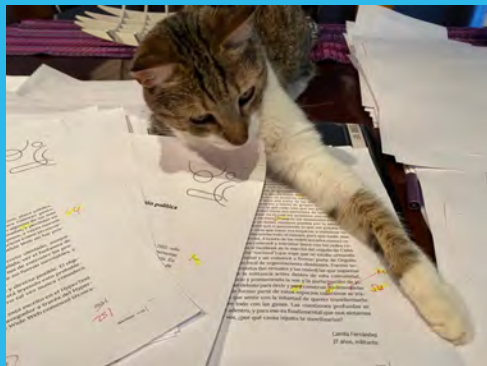

And now we have **more**  
**questions than certainties**

To celebrate our first 35 years we developed an environment of plural and diverse dialogue to find some answers and promote new questions

- 35 articles
- More than 40 writers

Prueba de imprenta con correcciones de la editora

*We didnt count with a permanent connection to the Internet, the first DNS server for .ar was established with secondary servers to other countries. The phone connection was primitive and limited but we were already connected to the world.*

*No contábamos con una conexión permanente a Internet, el primer servidor de DNS para .ar se establece con servidores secundarios a otros países. La conexión telefónica era primitiva y limitada pero ya estábamos conectados el mundo.*

Jorge Amodío, Internet pioneer

*The first to adopt and understand about technology are children. But they cannot decide and buy. That is why the rol of the State is so important at this stage .*

*Los primeros que adoptan y saben de tecnología son los niños. Pero ellos no pueden decidir y comprar. Por eso es tan importante el rol de Estado en esta etapa.*

Alicia Bañuelos, Internet pioneer

NIC.ar 35

Yes, we made  
a book to think  
the digital world

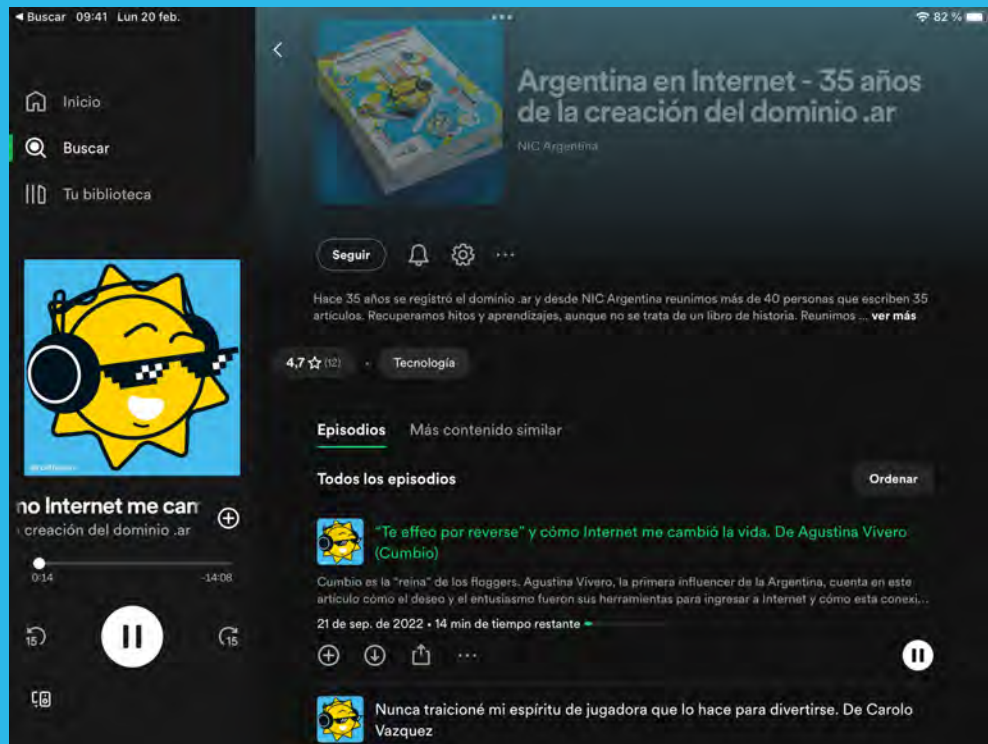

We distributed **4518 books** to:

- Public libraries
- Universities
- Schools
- Journalists and Researchers
- And many colleagues from others ccTLD

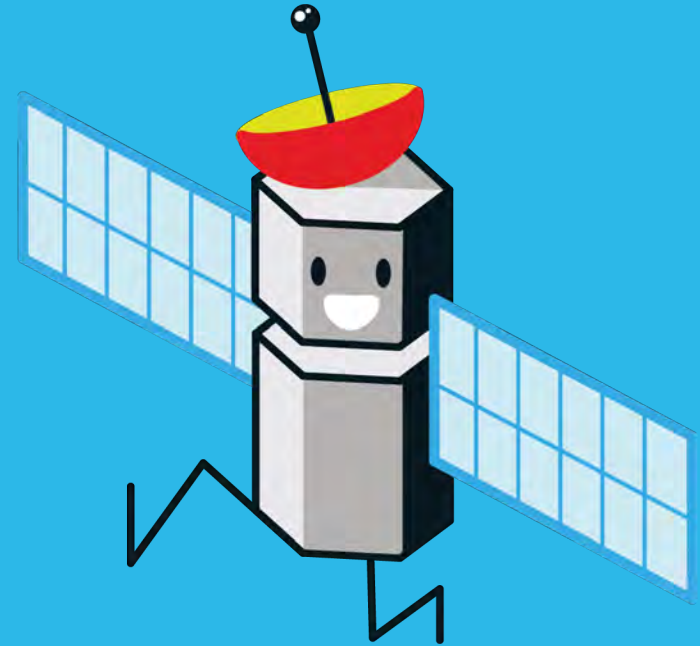

There are also an audiobook and a pdf version available for all people to access the material.

On turning 40 years of uninterrupted democracy in our country, we are already working on a new book to keep debating about the role of Internet.

**Because thinking together is always the best way**

**Thank you**
