Report - Council Workshop: ccTLD Global Policy Gaps

- Workshop inspired by the creation of a “Caretaker Operations” designation for a ccTLD
- Small group established to consider the situation and potential ccNSO response to this policy gap
- The ccNSO is the policy authority for the global policy framework that defines how IANA relates to ccTLDs in the rootzone
- Considered three key questions - all sensitive and complex. Should the ccNSO work to:
 - Consolidate existing policy?
 - Identify gaps in existing policy?
 - Explore ways to deal with future unknowns?
- Workshop agreed to continue with a small group exploring these matters, to prepare for broad community engagement on what to do next at ICANN 79 (March 2024)

Thank you

Next session: ccNSO & ICANN Board
