CSC Update

1. Introducing the CSC
2. SLAs & Monitoring
3. Amendment SLA change process:
introducing regular review full set of SLAs

- The IANA Transition proposal provided for the creation of the Customer Standing Committee and this requirement is now provided for in the ICANN Bylaws:

ICANN Bylaws 17.1:

"ICANN shall establish a Customer Standing Committee ("CSC") to monitor PTI's performance under the IANA Naming Function Contract and IANA Naming Function SOW.

- The IANA Transition Proposal also established a charter for the CSC which included its mission statement:

The mission of the CSC is to ensure continued satisfactory performance of the IANA naming function for the direct customers of the naming services. The direct customers of the naming services are top-level domain registry operators as well as root server operators and other non-root zone functions.

The CSC will achieve this mission through regular monitoring of the performance of the IANA naming function against the IANA Naming Function Contract and IANA Naming Function SOW and through mechanisms to engage with PTI to remedy identified areas of concern."

- These words are replicated in 17.1 of the ICANN Bylaws.

CSC in Context

Post Transition

* The ultimate accountability mechanism is dependent on the work of the CCWG-Accountability.

** Group, But Not Necessarily a Legal Entity

- Two (2) gTLD members, appointed by RySG
- Two (2) ccTLD members, appointed by ccNSO
- One (1) member non-ccTLD or gTLD – none appointed to date
- Up to seven (7) Liaisons, may be optionally appointed by their organizations: **ALAC**, SSAC, **GNSO - Non-Registry**, **GAC**, **RSSAC**, ASO (and any future Supporting Organization or Advisory Committee that should be established)
- One (1) PTI Liaison
- Alternates (since October 2023)

What do we do?

- SLAs & Monitoring
- Complaints & Performance Issue Remediation
- Informing, Consultations & Reviews

IANA Naming Function SLAs

- CSC monitors and reports on PTI compliance with 'Service Level Agreement' (SLA) metrics
- The SLA's were developed during the IANA Transition, some based on data collection done at that time
- Currently 64 individual metrics within 7 groups e.g. technical checks, staff processing time for gTLD creation, etc.
- The SLAs can be found on the PTI website's SLA Table.
- SLAs are directly related to IANA Naming Function Contract between ICANN and PTI

Monitoring – Monthly Reporting

- PTI publishes a [monthly report](#) with measurements based on summarized performance percentages.
- The Monthly report is available prior to the CSC's monthly meeting. CSC to discuss the naming services performance with PTI on basis of report

Monitoring – CSC Monthly Reporting

- The CSC produces a monthly report based on the following rankings:
 - **Excellent** – PTI's performance over [month] was 100 %. PTI met all [x, currently 64] of the currently defined thresholds.
 - **Satisfactory** - PTI's performance over [month] was [y] %. PTI met [z] of the [x, currently 64] thresholds. Missed thresholds were satisfactorily explained and the CSC has determined that these exceptions were no cause for concern. No persistent problems were identified and no further action is needed.
 - **Needs Improvement** - Performance needs improvement due to a) severe degradation in meeting the thresholds from previous months, b) a trend in complaints that indicate a persistent issue to be resolved, and c) a negative trend in compliance to the thresholds over several months.
- The CSC Findings % summarizes PTI performance as the percentage – the rating – of the thresholds that were met, for example 98.4%, implies 63 of 64 thresholds were met.
- If SLA was not met, explanation is needed, and understood by CSC

For majority of “metrics missed” 2016-2020 thresholds for technical checks were re-defined whilst ensuring the direct customers were not affected

- In 2018 CSC and PTI approved:
 - a "Process for amending the IANA Naming Function Service Level agreements" and
 - a "Procedure for Modifying the process for amending the IANA Naming Function Service Level agreements"
- Processes became effective with amendment of IANA Naming Function Contract (March 2019).

-
- PTI and CSC identified three SLAs which needed to changes:
 - Technical Checks (need revision to the metric only)
 - New SLAs, for publication of IDN / LGR tables
 - Redefinition of ccTLD Delegation/Transfer: Validation and Reviews
 - Current status of SLAs changes:
 - 3 Technical Checks: COMPLETED and OPERATIONAL
 - New SLAs, for IDN / LGR tables: COMPLETED and OPERATIONAL
 - ccTLD creation/transfer: COMPLETED and OPERATIONAL

Result 2nd CSC Effectiveness review: Need for regular reviews of SLAs

- Current 64 SLAs documented as part of IANA Stewardship Transition, effective in 2016
 - Structure of SLAs could be improved
 - Example: Some SLAs measure PTI and Customer performance as part of one and the same SLA. PTI becomes responsible for behaviour of customer
- Evolution of Rootzone Management
- Gap between the performance of PTI as measured through SLAs and the results of the Customer survey

Why is CSC involved in general review of SLAs?

- Currently no one is responsible for SLA review process
 - IANA Function Review looks at performance IANA Naming Function Contract
 - CSC looks at PTI performance against SLAs
- CSC is mandated to ensure continued satisfactory performance of the IANA function for the direct customers of the naming services
- CSC primary interface between PTI and customers

- CSC in close cooperation with PTI developing a framework for regular reviews of the SLAs
 - Requirement: involvement of the direct customers in the process is ensured
 - Amendment of the 2018 Process for SLA changes
- PTI/ICANN need to agree to preposed changes
- ICANN Public comment period (at least 40 days)
- CSC , PTI and ICANN to agree on revised process documentation, taking into account comments public comment
