About me

- Freshman at George Mason University in Fairfax, Virginia
- Computer Science Major
- Panelist at IGF 2019
- Member National Computer Science Honor Society

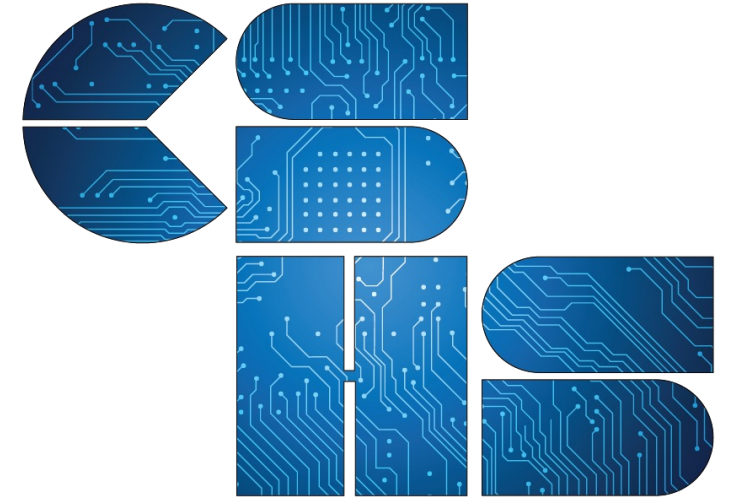

Why Universal Acceptance?

- Key focus for ICANN in the run up to the next round of Top Level Domains
- Ensuring that domains work, regardless of where you are, what script you use or how you access the internet is important
- Facilitating a truly global internet experience by breaking down language and cultural barriers
- Enhancing user experience by ensuring seamless interaction with websites and applications regardless of domain names' characteristics

Strategies for implementation

- Outreach to Computer Science Honor Society Chapters
- Include the role of ICANN in Computer Science curricula
- Outreach to Computer Science Clubs at Universities
- Create online resources and tutorials for developers, making UA education easily accessible
- Sponsor UA-related hackathons or coding competitions to increase interest and skill development
