

SSAC Update

13 Nov 2024

Graeme Bunton & Rowena Schoo

NetBeacon Reporter

- [Reached 50K Reports](#)
- **Mitigation Monitor:** Reporters can now track the status of their submissions. Most requested feature.
- **Automatic Reporting to Hosts:** Simultaneously sends all reports of DNS Abuse to the associated hosting providers.
- **ccTLD Integration:** ccTLD registries receive and manage reports in line with their local policies and processes. 15 ccTLDs, including: de, uk, eu, br, nz and ca.

Thanks to **CleanDNS** for building NetBeacon Reporter.

Referrals

Report was also sent to IP abuse contact rir-abuse@cisco.com at 2024-11-08T09:27:30.488Z.

NetBeacon MAP

- New Brand: Monthly Analysis
- Bite size analysis on topics
 - [1 Year of registrar abuse data](#)
 - [Freenom – TLDs](#)
 - [Phishing Attack Trends & standards deviations](#)

Measuring the Amendments

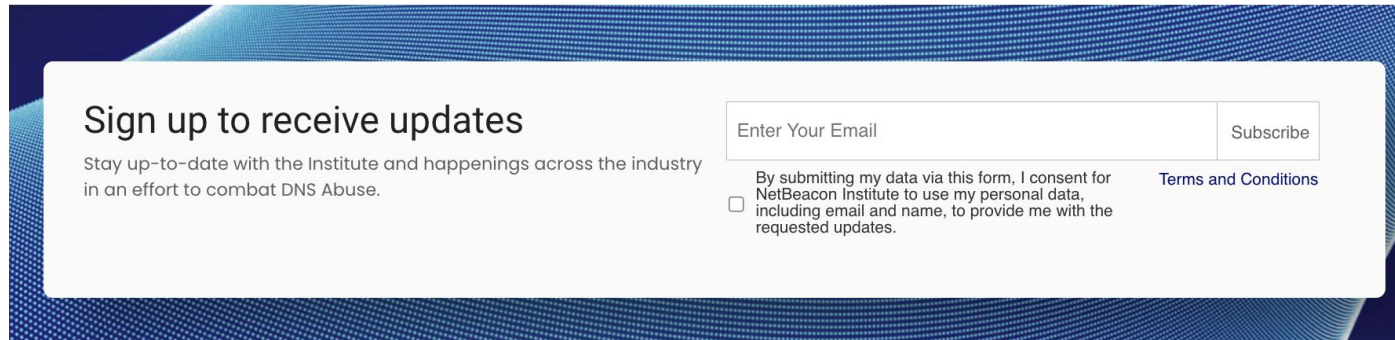

Initial focus:

- Malicious mitigation rates per registrar & TLD
- Requires insight into ups & downs at the granular level, not just aggregate
- Mitigation speed for DNS level malicious mitigation

Future: Composition of type of abuse, moving outside the ecosystem? Linking of TLD – RR mitigation rates?

How can SSAC help?

- Help us understand your needs re abuse
- Spread the word – all our “products” are **free!**
- Introduce us to commercial abuse reporters
- Sign up to our [newsletter](#), support our social posts so others see our activity ([LinkedIn](#), [X](#))
