Heat map exercise: what is it about?

ICANN has five geographical regions. The members of the ccNSO Internet Governance Liaison Committee (IGLC) and others regularly reflect on what the hot internet governance topics are for each of the five regions, and updates its work plan accordingly.

Are there overlaps? Major differences? Which topics deserve particular attention, and how can IGLC provide value to ccTLDs globally?

Consult previous IGLC heat maps:

What are the hot internet governance topics in your region?

Instructions:

- **One Row per Topic:** Please enter only one topic per row. You may add a description (optional).
- **Select Your Region:** Be sure to select the region for each topic.
- **Duplicate Topics Welcome:** If a topic you want to add is already listed, please add it again! Multiple entries indicate it's truly a hot topic.
