CRISP Team

Status update
11 Feb 2015

ICANN52, Singapore

Alan Barrett (vice chair of CRISP Team)

Overall time line

- Mar 2014: NTIA announced that it intends to transition its stewardship role of IANA functions to the global multistakeholder community.

- Jun 2014: IANA Stewardship Coordination Group (ICG) was formed

- Sep 2014: ICG called for proposals from various communities within ICANN

- Nov 2014: RIRs formed CRISP Team

- 19 Dec 2014, 8 Jan 2015: CRISP Team published drafts

- 15 Jan 2015: Proposal sent to ICG

CRISP Team composition

- 15 members: 3 from each RIR region
  - 2 community members, 1 staff member
- **AFRINIC region**: Alan Barrett (vice chair), Mwendwa Kivuva, Ernest Byaruhanga
- **APNIC region**: Dr. Govind, Izumi Okutani (chair), Craig Ng
- **ARIN region**: Bill Woodcock, John Sweeting, Michael Abejuala
- **LACNIC region**: Esteban Lescano, Nico Scheper, Andres Piazza
- **RIPE region**: Andrei Robachevsky, Nurani Nimpuno, Paul Rendek

Working method

- Input from the five RIR regions

  - Some regions had detailed proposals, others had only high level principles

- Reconcile differences, prepare draft

- Public comments, second draft

- Public comments, final proposal

More information

- https://nro.net/crisp-team
- Final proposal
- Drafts
- Some other documents
- Calls for comments
- Mailing list archives
- Notes and recordings from teleconferences

Common elements from all RIRs

- No large changes to status quo

- ICANN to remain as IANA number services operator

  - But it must be possible to change in the future

- Service Level Agreement (SLA)

Non-common elements

- Affirmation of Commitments (AoC)
    - Proposed by APNIC and LACNIC
- Multi-stakeholder Oversight Numbers Council (MONC)
    - Proposed by LACNIC
    - Would be a permanent body within NRO
    - Decisions binding on ICANN

Resolution of differences

- Contract between RIRs and ICANN as the IANA Number Services Operator

  – Incorporates SLA

  – Removes need for separate AoC

- Review Committee

  – Compromise position, instead of MONC

  – Advises NRO/RIRs

  – Decisions not binding

Elements of final proposal

- ICANN to remain as operator, for the near future

- Contract between RIRs and operator

- SLA to be incorporated into contract

- Review committee

  – Monitor operator's performance

  – Advise NRO EC

- Intellectual property rights

  – (more detail later)

Intellectual property rights

- IANA trademark and IANA.ORG domain must be associated with the IANA function, not with a particular operator

    - Should preferably be transferred to a third party such as the IETF trust

- All public information will be in the public domain

- Any non-public information associated with registrations will belong to the RIRs, not the IANA operator

Next steps

- Consultation with IETF regarding IANA trademark and IANA.ORG domain

- Respond to any other issues raised by ICG
