[2010-06-22 09::18:18] Massimiliano_Minisci: Dear Remote Participants welcome to this session of the GAC. Please note that although GAC meetings are open only Governments' representatives can intervene in the discussion. We won't therefore be able to take questions from the chat room.

[2010-06-22 14::25:28] Roelof_Meijer_SIDN18537: I have no audio on remote participation

[2010-06-22 14::28:31] Massimiliano_Minisci: Hi Relof, we're checking

[2010-06-22 14::30:58] Roelof_Meijer_SIDN16712: Hi Massimiliano, am using link in schedule: <http://ac.icann.org/room400>

[2010-06-22 14::32:27] Massimiliano_Minisci: <http://brussels38.icann.org/node/12481> try from here

[2010-06-22 14::36:47] Roelof_Meijer_SIDN: Massimiliano, logged in all over again, still no audio. Do other users have audio?

[2010-06-22 14::38:15] Massimiliano_Minisci: I'm sorry Roelof, seems to be ok on our end

[2010-06-22 14::40:13] Roelof_Meijer_SIDN: OK, thnx for checking

[2010-06-22 14::41:16] David_Hogan: No, I don't have audio on the adobe connect page. The stand alone feed works fine.

[2010-06-22 14::41:28] Massimiliano_Minisci: have you tried both high badwidth and low badwidth options?

[2010-06-22 14::44:17] Roelof_Meijer_SIDN: Thanks David, have audio on the seperate feed now. Badly out off sync with scribes though

[2010-06-22 14::54:42] SeanPowell: Roelof, how far out of sync is it?

[2010-06-22 14::59:11] Roelof_Meijer_SIDN: Much better now, max 10 secs, spoken text is on top of scribes screen

[2010-06-22 15::24:51] Vassil_Petev: Question on

[2010-06-22 15::33:29] Vassil_Petev: Question on IDNs: Does ICANN look at IDN ccTLDs in terms of context? For example, the Bulgarian IDN ccTLD is *.бг in Cyrillic, which indeed looks very similar to Brazilian's *.br. However when put into context, the IDNs look very different, and every one will notice the difference: telerik.br and тelerik.бг. This case stands true for the rest of the Cyrillic languages such as Macedonian, Serbian, etc. Thank you.

[2010-06-22 15::34:03] Vassil_Petev: telerik.br and тelerik.бг
