Tuesday, 9 March 2010 - 14:00 - 15:30

Room:

Batian

Presentation:

Open Meeting of the Security and Stability Advisory Committee

Meeting Leaders:

Julie Hedlund Director, SSAC Support

<http://nbo.icann.org/node/8920>

[13:57] Dave: good morning from SC

[13:59] Doug_Barton: Same from soggy southern california :)

[14:00] Suzanne_Woo: and relatively-balmy eastern MA

[14:00] Nick_Ashton: Good afternoon all

[14:00] Dave: is anyone picking up audio yet

[14:00] Suzanne_Woo: nice music :)

[14:01] Dave: ah there we go

[14:01] Dave: i need led zeppelin or heavy metal in the morning

[14:02] Doug_Barton: I wish they'd do the chat with jabber so the people in the room could more easily join in

[14:03] Nick_Ashton: Doug, I don't know if you are aware of this or not, but the chat is actually using IRC

[14:03] Doug_Barton: ... and that this meeting were not scheduled opposite the gac/ccnso meeting

[14:03] Doug_Barton: and a pony while you're at it :)

[14:04] Doug_Barton: Nick are you referring to this chat? And if so, is there another way to access it?

[14:05] Doug_Barton: One of the really nice things about IETF remote participation is that in a jabber chat room it's easy for the non-remote participants to join in without consuming all the b/w that this adobe thing does

[14:07] Nick_Ashton: so if you have an IRC client, you can connect to the IRC server directly

[14:07] Nick_Ashton: AND, there is a web interface to the IRC room, on the agenda for this and every open meeting

[14:07] wseltzer: chat.icann.org, channels named after the rooms

[14:07] Nick_Ashton: so those on low bandwidth connections do not have to load up AC

[14:08] tlr: ... and those with small screens don't need to clutter them with it

[14:09] Doug_Barton: *wave*

[14:09] Doug_Barton: Interesting, thanks Nick

[14:10] Doug_Barton: Is the information on how to connect with an irc client published?

[14:10] Suzanne_Woo: are you guys getting this meeting on the audio stream?

[14:10] Dave: the link on the ssac page has audio with Cheryl langdon orr?

[14:10] wseltzer: gaaah!

[14:11] Doug_Barton: Suz, re-click the URL, I just got a different result

[14:11] Doug_Barton: (insert joke about insanity here)

[14:12] Jim_Galvin: I've had "crossed audio" a few times the past 2 days. As Doug says, re-clicking always seem to fix it.

[14:12] Suzanne_Woo: got it

[14:13] guest12: nothing but muzak here

[14:13] Dave: ditto

[14:13] Jim_Galvin: I suggest re-clicking.

[14:14] guest12: have done

[14:14] Suzanne_Woo: yeah, music still

[14:14] Dave: julie says audio is on regular ssac line i'll try that

[14:16] Jim_Galvin: The phone can hear itself but no Nairobi.

[14:16] Dave: 1 sec

[14:17] DougBartonI: And they let us run the Internet?

[14:18] Dave: well, they don't, that might be the problem

[14:21] * DougBartonIRC listening to GAC meeting (which has no slides) and watching the slides in this room ...

[14:31] Dave_Piscit: cannot hear crocker

[14:31] Nick_Ashton: weird, will report now

[14:32] Ram_Mohan: "Have you been following the IDNA Work, it seems to overlap very strongly"

[14:35] Nick_Ashton: sorry about the streaming audio folks, it is getting sorted

[14:36] Ram_Mohan: "statement about another WG around service requirements, and has to do with transport of Whois data"

[14:37] Ram_Mohan: "one can constrain the other, how are you going to tie these together"

[14:39] Nick_Ashton: Dear all, the audio stream is now up

[14:39] Dave_Piscit: ram, that's something we have identified as an issue, and we don't have a definitive solution yet

[14:39] Dave_Piscit: try to connect again

[14:40] Doug_Barton: ok, sound now, with some static

[14:41] Doug_Barton: 16 bit version is actually less staticy, although seems to be lagging

[14:41] Nick_Ashton: working on the quality now

[14:42] Dave_Piscit: agree with doug

[14:42] Nick_Ashton: 64K is now very clear - for me at least

[14:43] Doug_Barton: yes, same here

[14:43] Doug_Barton: thanks for handling this, I know it's un-fun

[14:45] Doug_Barton: ok, serious question now, does anyone know what the actual change to the root zone file will be for the 4 IDN ccTLDs in phase 3?

[14:47] Dave: by "actual" do you mean size? the specific RRset?

[14:48] Doug_Barton: Well, rrset probably, in other words, will it be a parallel delegation? DNAME in the child zone? Other?

[14:48] Dave: i don't offhand but i imagine Tina Dam can point you to the implementation plan

[14:48] Dave: or one of the IANA staff

[14:49] Doug_Barton: Ok, I'll bug tina and barbara

[14:49] Dave: i suggest you go thru Tina 1st

[14:50] Doug_Barton: Ok, thanks

[15:22] Nick_Ashton: Was a pleasure to listen in

[15:23] Nick_Ashton: I never get to attend SSAC meetings, and I always miss the opportunity!

[15:23] Doug_Barton: Nice to see y'all :)
