Date: Tuesday, 9 March 2010 - 14:00 - 15:30
Room: Batian

Presentation: Open Meeting of the Security and Stability Advisory Committee
Meeting Leaders: Julie Hedlund Director, SSAC Support
http://nbo.icann.org/node/8920

[13:57] Dave: good morning from SC
[13:59] Doug_Barton: Same from soggy southern california :)
[14:00] Suzanne_Woo: and relatively-balmy eastern MA
[14:00] Nick_Ashton: Good afternoon all
[14:00] Dave: is anyone picking up audio yet
[14:00] Suzanne_Woo: nice music :)
[14:01] Dave: ah there we go
[14:01] Dave: i need led zeppelin or heavy metal in the morning
[14:02] Doug_Barton: I wish they'd do the chat with jabber so the people in the room could more easily join in
[14:03] Nick_Ashton: Doug, I don’t know if you are aware of this or not, but the chat is actually using IRC
[14:03] Doug_Barton: ... and that this meeting were not scheduled opposite the gac/ccnso meeting
[14:03] Doug_Barton: ..... and a pony while you’re at it :)  
[14:04] Doug_Barton: Nick are you referring to _this_ chat? And if so, is there another way to access it?
[14:05] Doug_Barton: One of the really nice things about IETF remote participation is that in a jabber chat room it's easy for the non-remote participants to join in without consuming all the b/w that this adobe thing does
[14:07] Nick_Ashton: so if you have an IRC client, you can connect to the IRC server directly
[14:07] Nick_Ashton: AND, there is a web interface tothe IRC room, on the agenda for this and every open meeting
[14:07] wseltzer: chat.icann.org, channels named after the rooms
[14:07] Nick_Ashton: so those on low bandwidth connections do not have to load up AC
[14:08] tlr: ... and those with small screens don't need to clutter them with it
[14:09] Doug_Barton: *wave*
[14:09] Doug_Barton: Interesting, thanks Nick
Doug_Barton: Is the information on how to connect with an irc client published?
Suzanne_Woo: are you guys getting this meeting on the audio stream?
Dave: the link on the ssac page has audio with Cheryl langdon orr?
wseltzer: gaah!
Doug_Barton: Suz, re-click the URL, I just got a different result
Doug_Barton: (insert joke about insanity here)
Jim_Galvin: I've had "crossed audio" a few times the past 2 days. As Doug says, re-clicking always seem to fix it.
Suzanne_Woo: got it
guest12: nothing but muzak here
Dave: ditto
Jim_Galvin: I suggest re-clicking.
guest12: have done
Suzanne_Woo: yeah, music still
Dave: julie says audio is on regular ssac line i'll try that
Jim_Galvin: The phone can hear itself but no Nairobi.
Dave: 1 sec
DougBartonI: And they let us run the Internet?
Dave: well, they don't, that might be the problem
* DougBartonIRC listening to GAC meeting (which has no slides) and watching the slides in this room ...
Dave_Piscit: cannot hear crocker
Nick_Ashton: weird, will report now
Ram_Mohan: "Have you been following the IDNA Work, it seems to overlap very strongly"
Nick_Ashton: sorry about the streaming audio folks, it is getttting sorted
Ram_Mohan: "statement about another WG around service requirements, and has to do with transport of Whois data"
Ram_Mohan: "one can constrain the other, how are you going to tie these together"
Nick_Ashton: Dear all, the audio stream is now up
Dave_Piscit: ram, that's something we have identified as an issue, and we don't have a definitive solution yet
Dave_Piscit: try to connect again
Doug_Barton: ok, sound now, with some static
Doug_Barton: 16 bit version is actually less staticy, although seems to be lagging
Nick_Ashton: working on the quality now
Dave_Piscit: agree with doug
Nick_Ashton: 64K is now very clear - for me at least
Doug_Barton: yes, same here
Doug_Barton: thanks for handling this, I know it's un-fun
Doug_Barton: ok, serious question now, does anyone know what the actual change to the root zone file will be for the 4 IDN ccTLDs in phase 3?
Dave: by "actual" do you mean size? the specific RRset?
Doug_Barton: Well, rrsset probably, in other words, will it be a parallel delegation? DNAME in the child zone? Other?
Dave: I don't offhand but I imagine Tina Dam can point you to the implementation plan
Dave: or one of the IANA staff
Doug_Barton: Ok, I'll bug tina and barbara
Dave: I suggest you go thru Tina 1st
Doug_Barton: Ok, thanks
Nick_Ashton: Was a pleasure to listen in
Nick_Ashton: I never get to attend SSAC meetings, and I always miss the opportunity!
Doug_Barton: Nice to see y'all :)
