

AFNIC community DNSSEC Adoption

- ✓ AFNIC operates 6 ccTLD (.fr/.re/.pm/.tf/.yt/.wf). More than 2.3 millions domain names registered by 600 registrars.
- ✓ DNSSEC was introduced in September 2010. DS registration launched in April 2011.
- ✓ After one year, only **50** signed zones with DS announced (16 registrars involved)... ☹
- ✓ ...then, two months ago, AFNIC largest registrar (1/3 of all AFNIC registered domain names) started to propose DNSSEC as an option for new registrations.
=> About **10 new registrations** with DS **per day**.
- ✓ ... and from the 1st of June, this option is set as default for new registrations.
=> About **150 new registrations** with DS **per day**.
- ✓ Is it the beginning of a larger adoption ??? Stay tuned... ☺
