

IDN Tables and Variant TLDs

- Variant TLD reservation or blocking
 - No technical solution to alias TLDs, but community need
 - For example: Pakistan: پاکستان and پاکستان
 - Usability entry problem
- IDN tables are developed by registry managers to
 - Inform users what characters are available
 - Eliminate confusability by listing variant characters
- IDN Tables are used both on second level and top level
 - Strongly urging language community collaboration
 - Languages using the same script
 - Scripts looking alike (fx. Cyrillic, Greek, Latin)
 - Review of need stronger rules on development of tables
