6.	ABSTRACT: CBUC provided detailed response on IGOs support / no support for each of the WG positions. Refer to their attached Word Document. Background: This document is the response of the ICANN Business Constituency (BC) to ICANN's public comment period on the Draft Final Report on Protection of IGO and INGO identifiers in All gTLDs. The BC's comments arise from the perspective of business users, as defined in our Charter: The mission of the Business Constituency is to ensure that ICANN policy positions are consistent with the development of an Internet that: • promotes end-to-end user confidence because it is a safe place to conduct business • is competitive in the supply of registry and registrar and related services and • is technically stable, secure and reliable. Comments. The BC offers comments on each of the recommendations in the Draft Final Report on Protection of IGO and INGO identifiers in All gTLDs, as described in the table beginning on page 25 of the draft report. Business Constituency Charter, at http://www.bizconst.org/charter.html. http://forum.icann.org/lists/comments-igo-ingo-final-2dsept13/msg00021.html	Steve DelBianco / Public Comment	11/6 - Noted and WG acknowledges these comments have been discussed within WG deliberations and has considered this issue. WG reviewed each of the sections of the CBUC public comment. RCRC and IOC recommendations were supported. A few recommendations for the IGO-INGOs varied from current assigned consensus levels.	Updated Final Report & Consensus Call dossier d to reflect the position of the CBUC on each of the WG's recommendations. Their position submission required a review of the assigned consensus levels.
TOP-LEVEL PROTECTIONS				
7.	ABSTRACT: Association can support reservation protection of exact match full names at the top level, but does not support any recommendation to reserve acronyms. However, they note existing new gTLD objections processes are sufficient to prevent application of a protected identifier. In regard to the top level of new gTLDs, we generally favor full protection for exact matches of the full name of all the IGOs and INGOs add exactly the Report by barring their registration by third parties – but we oppose such blanket, registration-blocking protection of exact matches of their acronyms. We doubt that any party would make the very substantial time and monetary investment to apply for a acronym registry with the intent of confusing the public in regard to its ownership, sponsorship, or purpose, but in the highly unlikely event that such a situation were to occur it could be readily addressed	ICA / Public Comments	13/16 - Noted and WG acknowledges these comments have been discussed within WG deliberations and has considered this issue. The WG does not recommend blocking or reserving acronyms.	No actions taken

** Because of support to reserve Scope 1 names at the top and second levels, it is not necessary to list Scope 1 names for any of the TMCH recommendations for second level protections.

[†] This recommendation depends on identifiers being reserved. If no support is determined for reservation protection, this recommendation is not required.
[††] If IGO-INGO identifiers are to utilize the Claims service, both WG deliberation and public comments noted that a separate claims notice, as distinct from the Trademark notices, may be required.

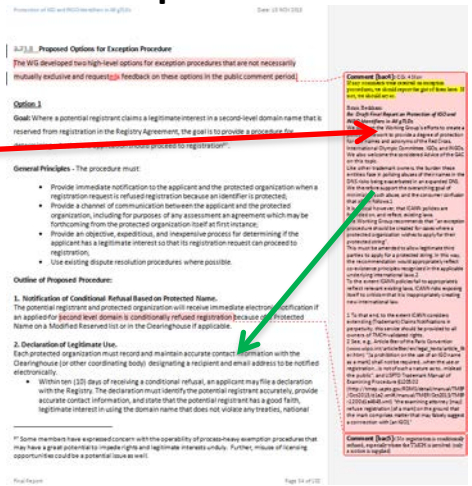
Exception Procedures				
11.	ABSTRACT: Exception Procedure should be amended for third parties and reflect co-existence principles under international law. *Re: Draft Final Report on Protection of IGO and INGO identifiers in All gTLDs* We support the Working Group's efforts to create a policy framework to provide a degree of protection for the names and acronyms of the Red Cross, International Olympic Committee, IGOs, and INGOs. We also welcome the considered Advice of the GAC on this topic. Like other trademark owners, the burden these entities face in policing abuses of their names in the DNS risks being exacerbated in an expanded DNS. We therefore support the overarching goal of minimizing such abuse, and the consumer confusion that often follows.1 It is critical however, that ICANN policies are founded on, and reflect, existing laws. The Working Group recommends that "an exception procedure should be created for cases where a protected organization wishes to apply for their protected string". This must be amended to allow legitimate third parties to apply for a protected string. In this way, the recommendation would appropriately reflect co-existence principles recognized in the applicable underlying international laws.2 To the extent ICANN policies fail to appropriately reflect recent existing laws, ICANN risks exposing itself to criticism that it inappropriately creating new international law. 1 To that end, to the extent ICANN considers extending (Trademark) Claims Notifications in perpetuity, this service should be provided to all owners of TMCH-validated rights. 2 See, e.g., Article 6ter of the Paris Convention (www.wipo.int/article6ter/en/legal_texts/article_6ter.html "In particular, on the use of an IGO name as a mark); shall not be required…when the use or registration…is not of such a nature as to…mislead the public"; and USPTO Trademark Manual of Examining Procedure §1206.02 (http://tmep.uspto.gov/RDMS/detail/manual/TMEP/Oct2013/d1e2…xml#/manual/TMEP/Oct2013/d1e4645.xml) "the examining attorney [may] refuse registration [of a mark] on the ground that the mark comprises matter that may falsely suggest a connection with [an IGO]." http://forum.icann.org/lists/comments-igo-ingo-final-	Brian Beckham / Public Comment	11/6 - Noted and WG acknowledges that these comments have been discussed within WG deliberations and has considered this issue.	The Exception Procedures sections of the report was reviewed by the WG for any changes that required to reflect the stated comment.

Final Report - Redline



3.7.1.8 **Proposed Options for Exception Procedure**

The WG developed two high-level options for exception procedures that are not necessarily mutually exclusive and requests feedback on these options in the public comment period.

Option 1

Goal: Where a potential registrant claims a legitimate interest in a second-level domain name that is reserved from registration in the Registry Agreement, the goal is to provide a procedure for [illegible] registration should proceed to registration[*].

General Principles - The procedure must:

- Provide immediate notification to the applicant and the protected organization when a registration request is refused registration because an identifier is protected;
- Provide a channel of communication between the applicant and the protected organization, including for purposes of any assessment an agreement which may be forthcoming from the protected organization itself at first instance;
- Provide an objective, expeditious, and inexpensive process for determining if the applicant has a legitimate interest so that its registration request can proceed to registration;
- Use existing dispute resolution procedures where possible.

Outline of Proposed Procedure:

1. Notification of Conditional Refusal Based on Protected Name.
The potential registrant and protected organization will receive immediate electronic notification if an applied-for second level domain is conditionally refused registration because of a Protected Name on a Modified Reserved list or in the Clearinghouse if applicable.

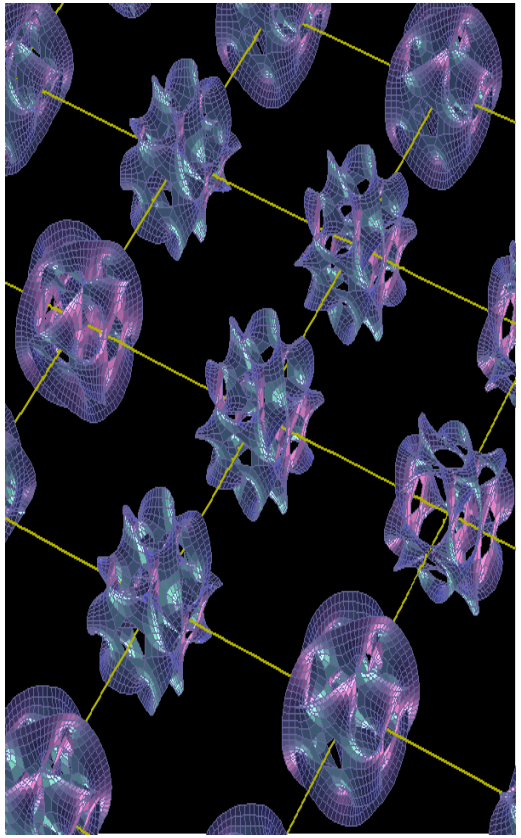
2. Declaration of Legitimate Use.
Each protected organization must record and maintain accurate contact information with the Clearinghouse (or other coordinating body) designating a recipient and email address to be notified electronically.

- Within ten (10) days of receiving a conditional refusal, an applicant may file a declaration with the Registry. The declaration must identify the potential registrant accurately, provide accurate contact information, and state that the potential registrant has a good faith, legitimate interest in using the domain name that does not violate any treaties, national

[*] Some members have expressed concern with the operability of process-heavy exemption procedures that may have a great potential to impede rights and legitimate interests unduly. Further, misuse of licensing opportunities could be a potential issue as well.

Dimensions of Protection Proposals

- **Organization Types** [RCRC, IOC, IGO, INGO]
- **Domain Tier** [top-level vs. second-level]
- **Scope of Identifiers** [Full Name, Acronym, Exact Match]
- **Scope of Language** [UN6+, Language specific to Org]
- **Protection Options**
  - [Reservation;
  - Clearing House: Sunrise, Claims Notification (90d, permanent);
  - Curative Mechanisms: URS, UDRP;
  - Fee Waivers: Objections, TMCH, Curative RPM]



Some Facts

- WG Duration [31-Aug-12 to 10-Nov-13]
  - RCRC/IOC [01-Nov-11 to 20-Dec-12]
- Met weekly [38 meetings @ 2 hours]
- Meetings in Prague, Toronto, Beijing, Durban, Buenos Aires
- Membership [42 members, 22 active >50%]
  - All but one group within GNSO, ALAC, RCRC, IOC, IGOs, INGOs
- Chair's Message:
  - Expedited manner of PDP and MSM
  - External activities regarding this issue
  - WG recommendations & complexity
  - WGG consensus levels tested
  - Implementation complexity
  - Stakeholder representation
  - Additional effort required

Working Group Recommendations

- 29 Recommendations grouped by RCRC, IOC, IGO, Other INGOs & General

- What is supported**:
  - Top-level reservation protection of full name + exception procedure (all)
  - Second-level reservation protection of full name + exception procedure (RCRC, IOC, IGO)
  - Identifiers (not reserved) bulk added to TMCH
    - 90 days claims notification service (RCRC and IGO acronyms, RCRC additional strings, INGO full names)
    - SSbSO for Sunrise

**These recommendation statements are only for presentation purposes and are not an accurate representation of the WG's actual recommendations.

Working Group Recommendations – cont.

- Issue Report for possible PDP to determine how IGOs-INGOs may access UDRP, URS curative rights protections
- SCI to review WGG consensus levels

- Proposals not supported
  - Acronym reservation protections
  - Fee waivers at top and second levels
  - Permanent TMCH Claims

- Difference from GAC Advice
  - Reservations of acronyms
  - 90 Days Claims notification
  - INGOs

**These recommendation statements are only for presentation purposes and are not an accurate representation of the WG's actual recommendations.

6	Second-Level protections of only Exact Match, Acronym Scope 2 identifiers of the Red Cross Red Crescent Movement are bulk added as a single list to the Trademark Clearinghouse**	Consensus NCSG supports, but with some opposition within the SG
7	Red Cross Red Crescent Movement Scope 2 identifiers, if added to the TMCH, allowed to participate in Sunrise phase of each new gTLD launch	Strong Support but Significant Opposition RySG, does not support; NCSG supports, but with some opposition within the SG
8	Red Cross Red Crescent Movement Scope 2 identifiers, if added to the TMCH, allowed to participate in 90 Day Claims Notification phase of each new gTLD launch for Second-Level registrations	Consensus NCSG supports, but with some opposition within the SG

** Because of support to reserve Scope 1 names at the top and second levels, it is not necessary to list Scope 1 names for any of the TMCH recommendations for second level protections.
*** Scope 2 Identifiers contain both full name and acronyms. The distinction is that Scope 1 identifiers are based on a list provided by GAC advice, while Scope 2 names were additionally requested by the RCRC.

- The Scope 1 identifiers for RCRC are already placed on the reserved list: http://www.icann.org/sites/default/files/packages/reserved-names/ReservedNames.xml
- If IGO-INGO identifiers are to utilize the Claims service, both WG deliberation and public comments noted that a separate claims notice, as distinct from the Trademark notices, may be required.

6	International Non-Governmental Organizations Scope 1 (unless otherwise protected) & Scope 2 identifiers, if added to the TMCH, allowed to participate in 90 Day Claims Notification phase of each new gTLD launch for Second-Level registrations	Consensus ISPCP support scope 1 only; NCSG support, but with some opposition within the SG

- The IRT will need to determine how this list is managed as new organizations enter the list. How will ICANN be notified of changes? How is the protection implemented when an organization's string exceeds 63 characters?
- This recommendation depends on identifiers being reserved. If no support is determined for reservation protection, this recommendation is not required.
- The concept of bulk addition into the TMCH was to minimize cost associated with entry and validation. However, the Scope 2 names exceed 2000+ organizations. The IRT will need to determine how contact information required for TMCH forms be acquired and validated for bulk entry. Note that voluntary submission requests into TMCH will require backend validation of eligibility.
- f IGO-INGO identifiers are to utilize the Claims service, both WG deliberation and public comments noted that a separate claims notice as distinct from the Trademark notices may be required.

	Recommendation	Level of Support
1	Top-Level protections of Exact Match, Acronym identifiers are placed in Applicant Guidebook section 2.2.1.2.3, of the Applicant Guidebook, Strings "Ineligible for Delegation"	Consensus Against (refer to rec#4) IGO supports; BC Supports for RCRC
2	Second-Level protections of Exact Match, Acronym identifiers are placed in Specification 5 of Registry Agreement	Consensus Against (refer to rec#4) IGO supports
3	The WG recommends that the respective policies are amended so that curative rights of the UDRP and URS can be used by those organizations that are granted protections based on their identified designations.	Consensus NCSG supports, but with some opposition within the SG
4	The WG recommends that the GNSO Council task the Standing Committee on Improvements (SCI) to review the Consensus levels as defined in the Working Group Guidelines.	Full Consensus

- It was decided that this level of designation be used for recommendations 1 & 2 because a specific action will be required to remove acronyms of RCRC and IGO identifiers from the current Specification of 5 of the new gTLD Registry Agreement.
- The WG participants that supported this proposal represent a number of additional IGOs that favor this position; for further reference, see the IGO's Minority Statement in the Minority Positions supplement
- This WG experienced a possible limitation in the currently defined Consensus Levels when assigning “Divergence” to recommendations regarding acronym protections (see recs. #1 and #2 of the General Recommendations now assigned with “Consensus Against”). The use of “Divergence” did not adequately represent the lack of support for the proposed recommendation when said recommendation was stated in the affirmative, for example “Do you support..?”. The Chair was equally concerned about not adhering to current Working Group Guidelines could introduce risk to the process, because “Consensus Against” is not formally defined. Note this recommendation for an SCI review was not part of the formal consensus call within the WG, but full support was determined via WG conference calls.

1	IGO-INGO organizations be granted a fee waiver (or funding) for objections filed against applied-for gTLDs at the Top-Level	Divergence RySG, IPC, ISPCP, BC do not support; NCSG supports, but with some opposition with the SG In general, opposition to this proposal recognized that the GAC will be able to file objections on behalf of IGOs, RCRC and IOC. It was also determined that if fee waivers were granted, other stakeholders will still subsidize the cost.
2	Fee waivers or reduced pricing (or limited subsidies) for registering into the Trademark Clearinghouse the identifiers of IGO-INGO organizations	Divergence IGO, ALAC, RySG, IPC, ISPCP do not support; NCSG Support, but with opposition The support for the recommendation(s) to bulk-add protected organizations into the TMCH reduced the need for this recommendation. Further, subsidy of pricing extended an additional right over other TMCH participants.
3	IGO-INGOs allowed to participate in permanent Claims Notification of each gTLD launch	Divergence IGO, ALAC, RySG, NCSG, IPC, ISPCP do not support Many members of the WG felt that extending permanent claims protections to IGO-INGOs granted additional rights.
4	Fee waivers or reduced pricing for IGO-INGOs filing a URS or UDRP action	Divergence ALAC, RySG, IPC, ISPCP do not support; NCSG supports, but with some opposition within SG Subsidy of pricing extended an additional right over other TMCH participants.

Present TMCH implementation of the Claims Notification service is defined to last for at least a 90 day period. WG deliberations considered, but eventually reject the notion of a permanent notification service to compensate where a reserved name protection may not be granted. Permanent notification is defined as a notification services that exists indefinitely.
