Active domains by type

Data from May 20th, 2015

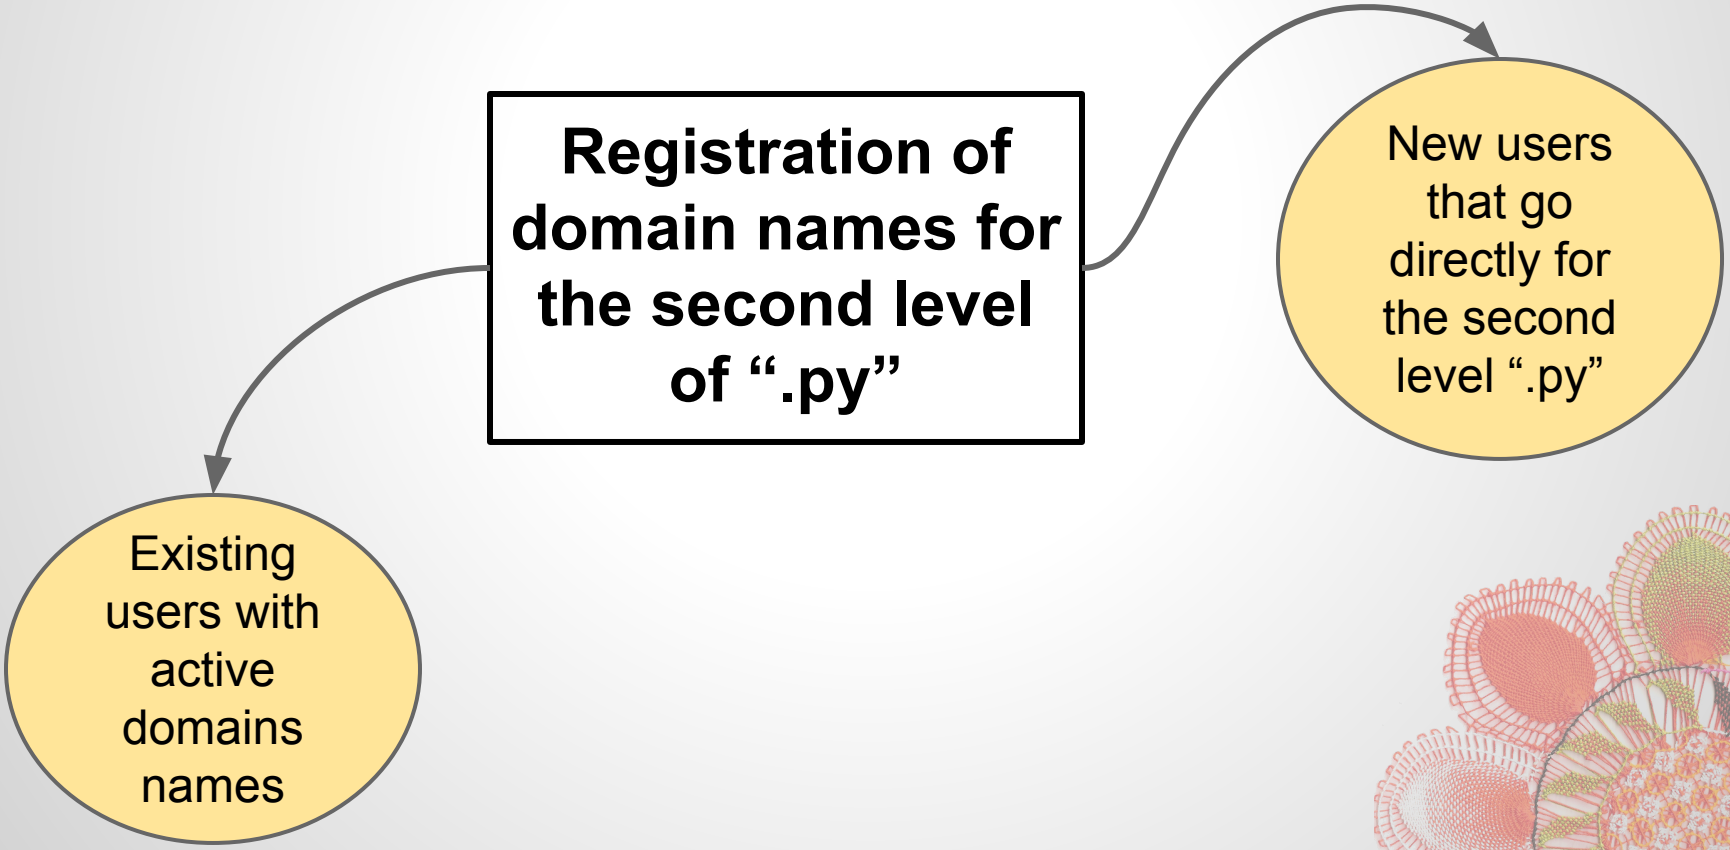
Type of domains	Quantity
com.py	15670
org.py	694
gov.py	339
edu.py	284
coop.py	78
net.py	33
mil.py	14
TOTAL	**17112**

New domains by type in April 2015	
Type of domains	Quantity
com.py	304
org.py	17
gov.py	10
edu.py	3
TOTAL	**334**

There was an average of 243 eliminated domains by month in 2014

Going for the second level

★ Deployment of second level domains is part of the enhancing plan for the NIC-PY



Existing users with active domains names

★ First, we need to see who are automatically eligible and who are not...

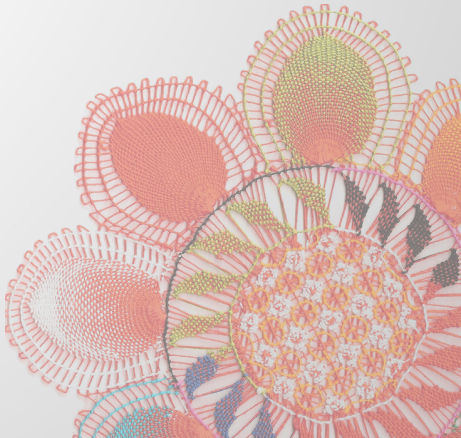
Who goes for the second level?

"Non eligible" domains

Domain name	Type of domains	State
paraguay	**com.py**	ACTIVE
paraguay	**org.py**	ACTIVE
paraguay	**edu.py**	ACTIVE

"Eligible" domains

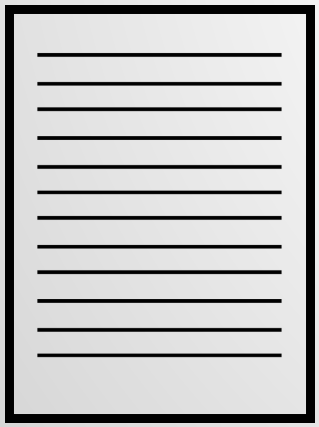
Domain name	Type of domains	State
asuncion	**com.py**	ACTIVE



Deployment strategies (1/3)

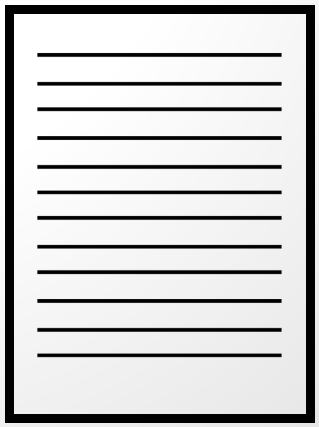
All “eligible” domains that were registered before July 1th, will pass through a process

ASUNCION.com.py



Copying ownership details...

ASUNCION.py



* Estimated date

Deployment strategies (2/3)

Time that would have
ASUNCION.com.py
to pay the registration of
ASUNCION.py

★ Within the grace period, if the “reserved” domain is not paid, then the domain name will be open to request it.

* Estimated date

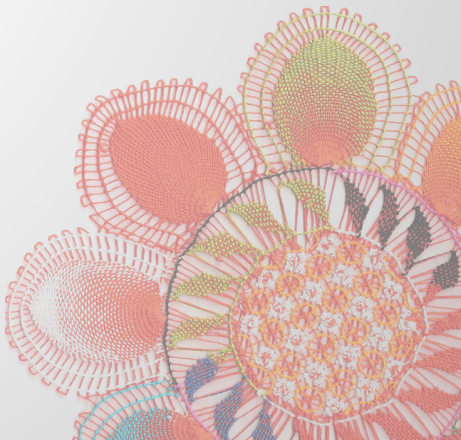
Deployment strategies (3/3)

★ NIC-PY is planning to establish an agreement with WIPO/OMPI for dispute resolution regarding second and third level names for ".py"

Expected outcome

- Answer the demand of users that have diverse services in their company/organization and do not want to be identified with a third level domain

- Canalize services that are general for Paraguay, ie: Open government (e-government) and other local initiatives from Paraguay



Other projects we are working on

- Enabling DNS resolution over IPv6
