New gTLD Subsequent Procedures PDP WG

⊙ The WG has at least 38 subjects in its charter to review. The WG continues to consider a set of 6 overarching issues and is also broken into 4 Work Tracks to address the remaining subjects within its charter.

⊙ Will be working to send out a second request for Community Comment, related to the Work Tracks

⊙ Large WG in terms of members and scope – welcome additional participation.

⊙ Interconnected efforts (e.g., RPMs, CCT-RT, CWG-UCTN, etc.) can make it difficult to stay coordinated and informed. Some efforts serve as gating factors for certain subjects.

CWG-UCTN Overview

- The Working Group was established in 2014, has considered two- and three-letter country codes

- The Working Group reached preliminary consensus in support of maintaining the status quo of 2-character codes as exclusively reserved for country code TLDs

- A wide range of views was presented, with no consensus on three-letter codes

- The Working Group did not progress to considering country and territory names

- The Working Group is currently discussing a proposal to wind up to enable consolidation of the community's discussion on geographic names into a single initiative with a clearer link to policy development

- Progress Report and Draft Interim Report are available on the CWG-UCTN wiki: https://community.icann.org/x/4xXxAg

Review of all Rights Protection Mechanisms in all gTLDs PDP WG

Phil Corwin, Kathy Kleiman

ICANN

Review of All Rights Protection Mechanisms (RPMs) in All gTLDs Policy Development Process (PDP)

1

What this PDP is about

A two-phased PDP initiated in March 2016:

Phase 1: All RPMs developed for the 2012 New gTLD Program
Phase 2: The 1999 Uniform Dispute Resolution Policy (UDRP)

2

What is the overall goal?

Recommend improvements to the RPMs to achieve appropriate balance and effectiveness

Develop a consistent framework for future reviews of all RPMs

3

What is the work status?

Currently in Phase 1:
Began with the Trademark Post-Delegation Dispute Resolution Procedure; launched data gathering effort regarding the Trademark Clearinghouse

4

What to expect at ICANN57

Open Working Group meeting on Monday 7 November at 1100

Aim to complete initial review of TM-PDDRP; begin discussion of TMCH Charter questions

5

When will Phase 1 be completed?

Current aim – present initial recommendations to community in late/end 2017

6

When will the full PDP be done?

UDRP review will not begin before 2018
Projected date for final completion has not yet been set

Analysis Group TMCH Independent Review

- Draft report published July 25, 2016.

- Public comments received and report on public comments published September 26, 2016.

- Revisions in response to public comments in progress. Updated report will be completed by Q1 2017.

  - We are working to collect additional data from registries and registrars to expand our analyses.

  - We are conducting additional analyses to help further inform the results in the draft report.

 - We are editing the report text to reflect public comments and suggestions.

CDAR Status

- ## Draft report published for public comment
  Primary conclusion: *We did not observe a degradation of the security and stability of the root DNS system as a result of the delegation of new gTLDs*

**CDAR workshop is on Tuesday
8 November 14:00-15:00 in Hall 6**

- ## Next step

**WP 6: Clarifying and discussing findings
with ICANN's multi-stakeholder community**
