

ICANN DNSSEC validation

torbjorn.eklov@interlan.se
@tobbe_interlan

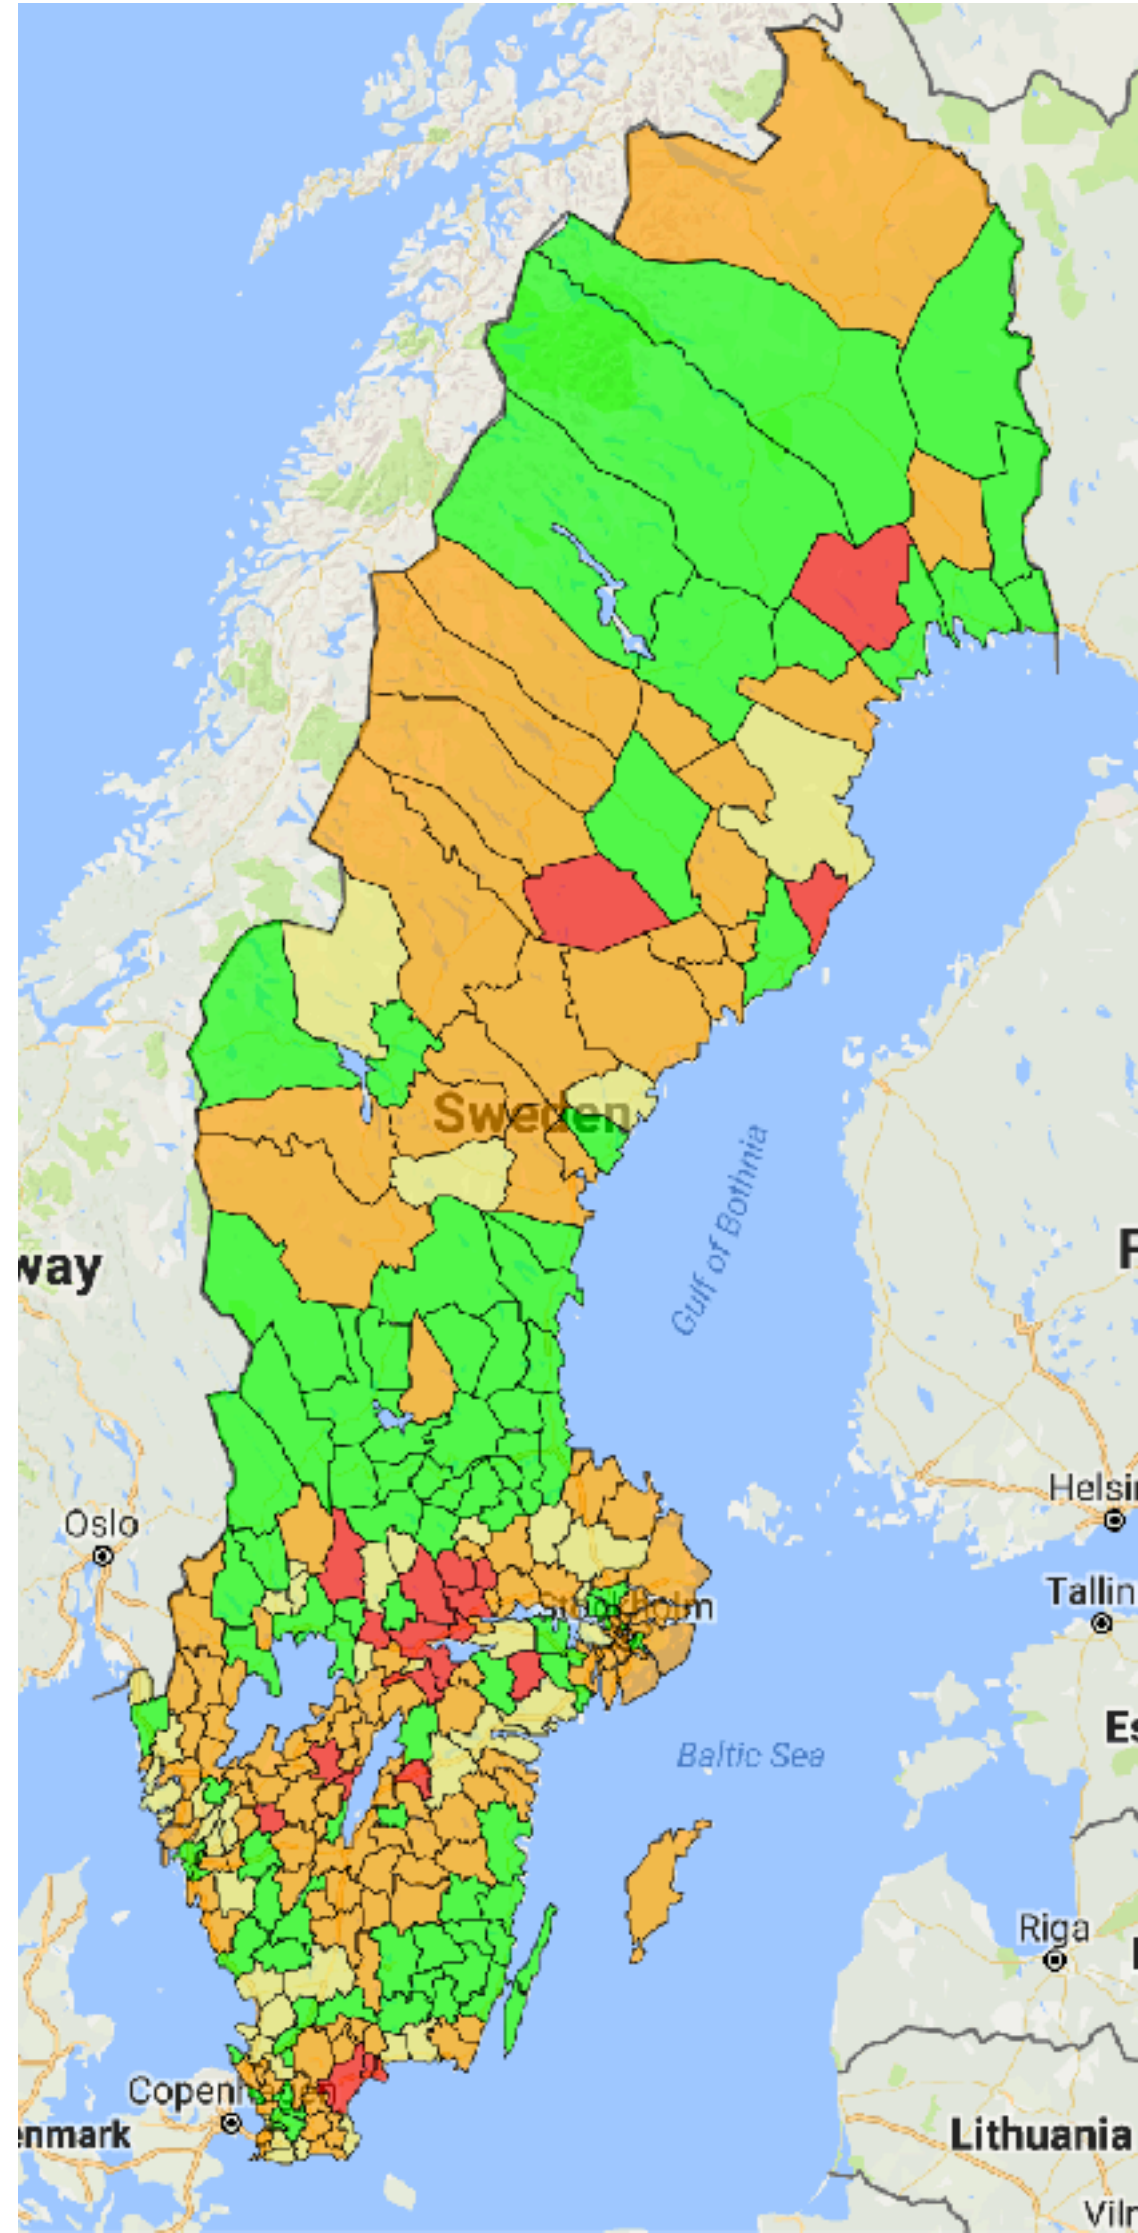

Ten years with DNSSEC

Interlan/me
Signed ~50 municipalities

Second in Auth-DNS for
Sweden municipalities

Auth DNS ~1000 - ~300
signed

ZKT and Opendnssec

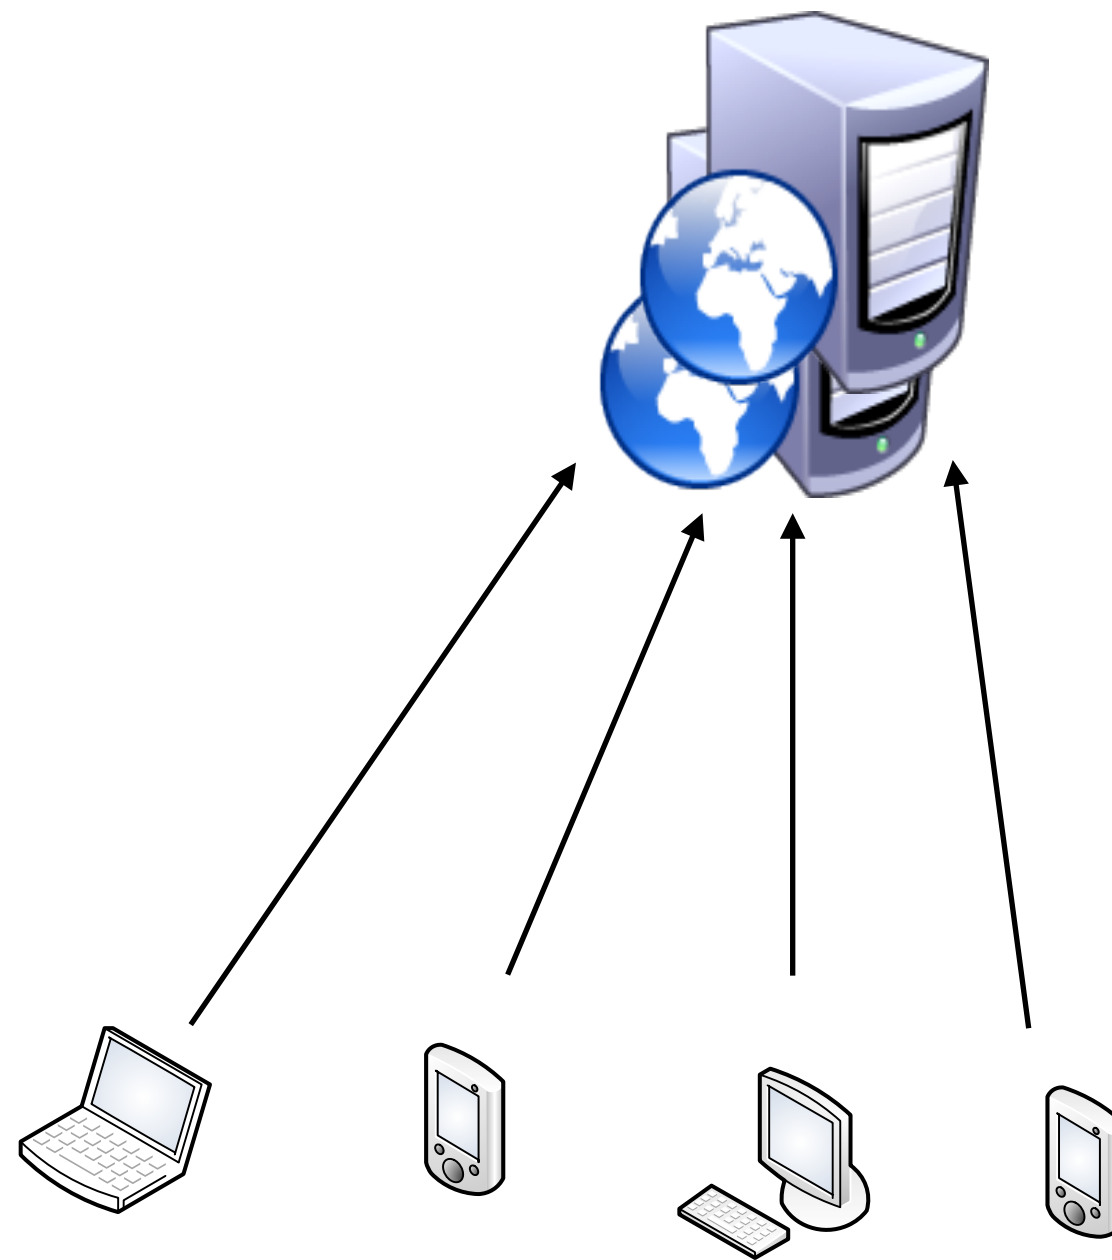

See more at
<https://dnssecandipv6.se/>

Ten years with DNSSEC

Unbound
resolver cluster
~10 minor ISP's

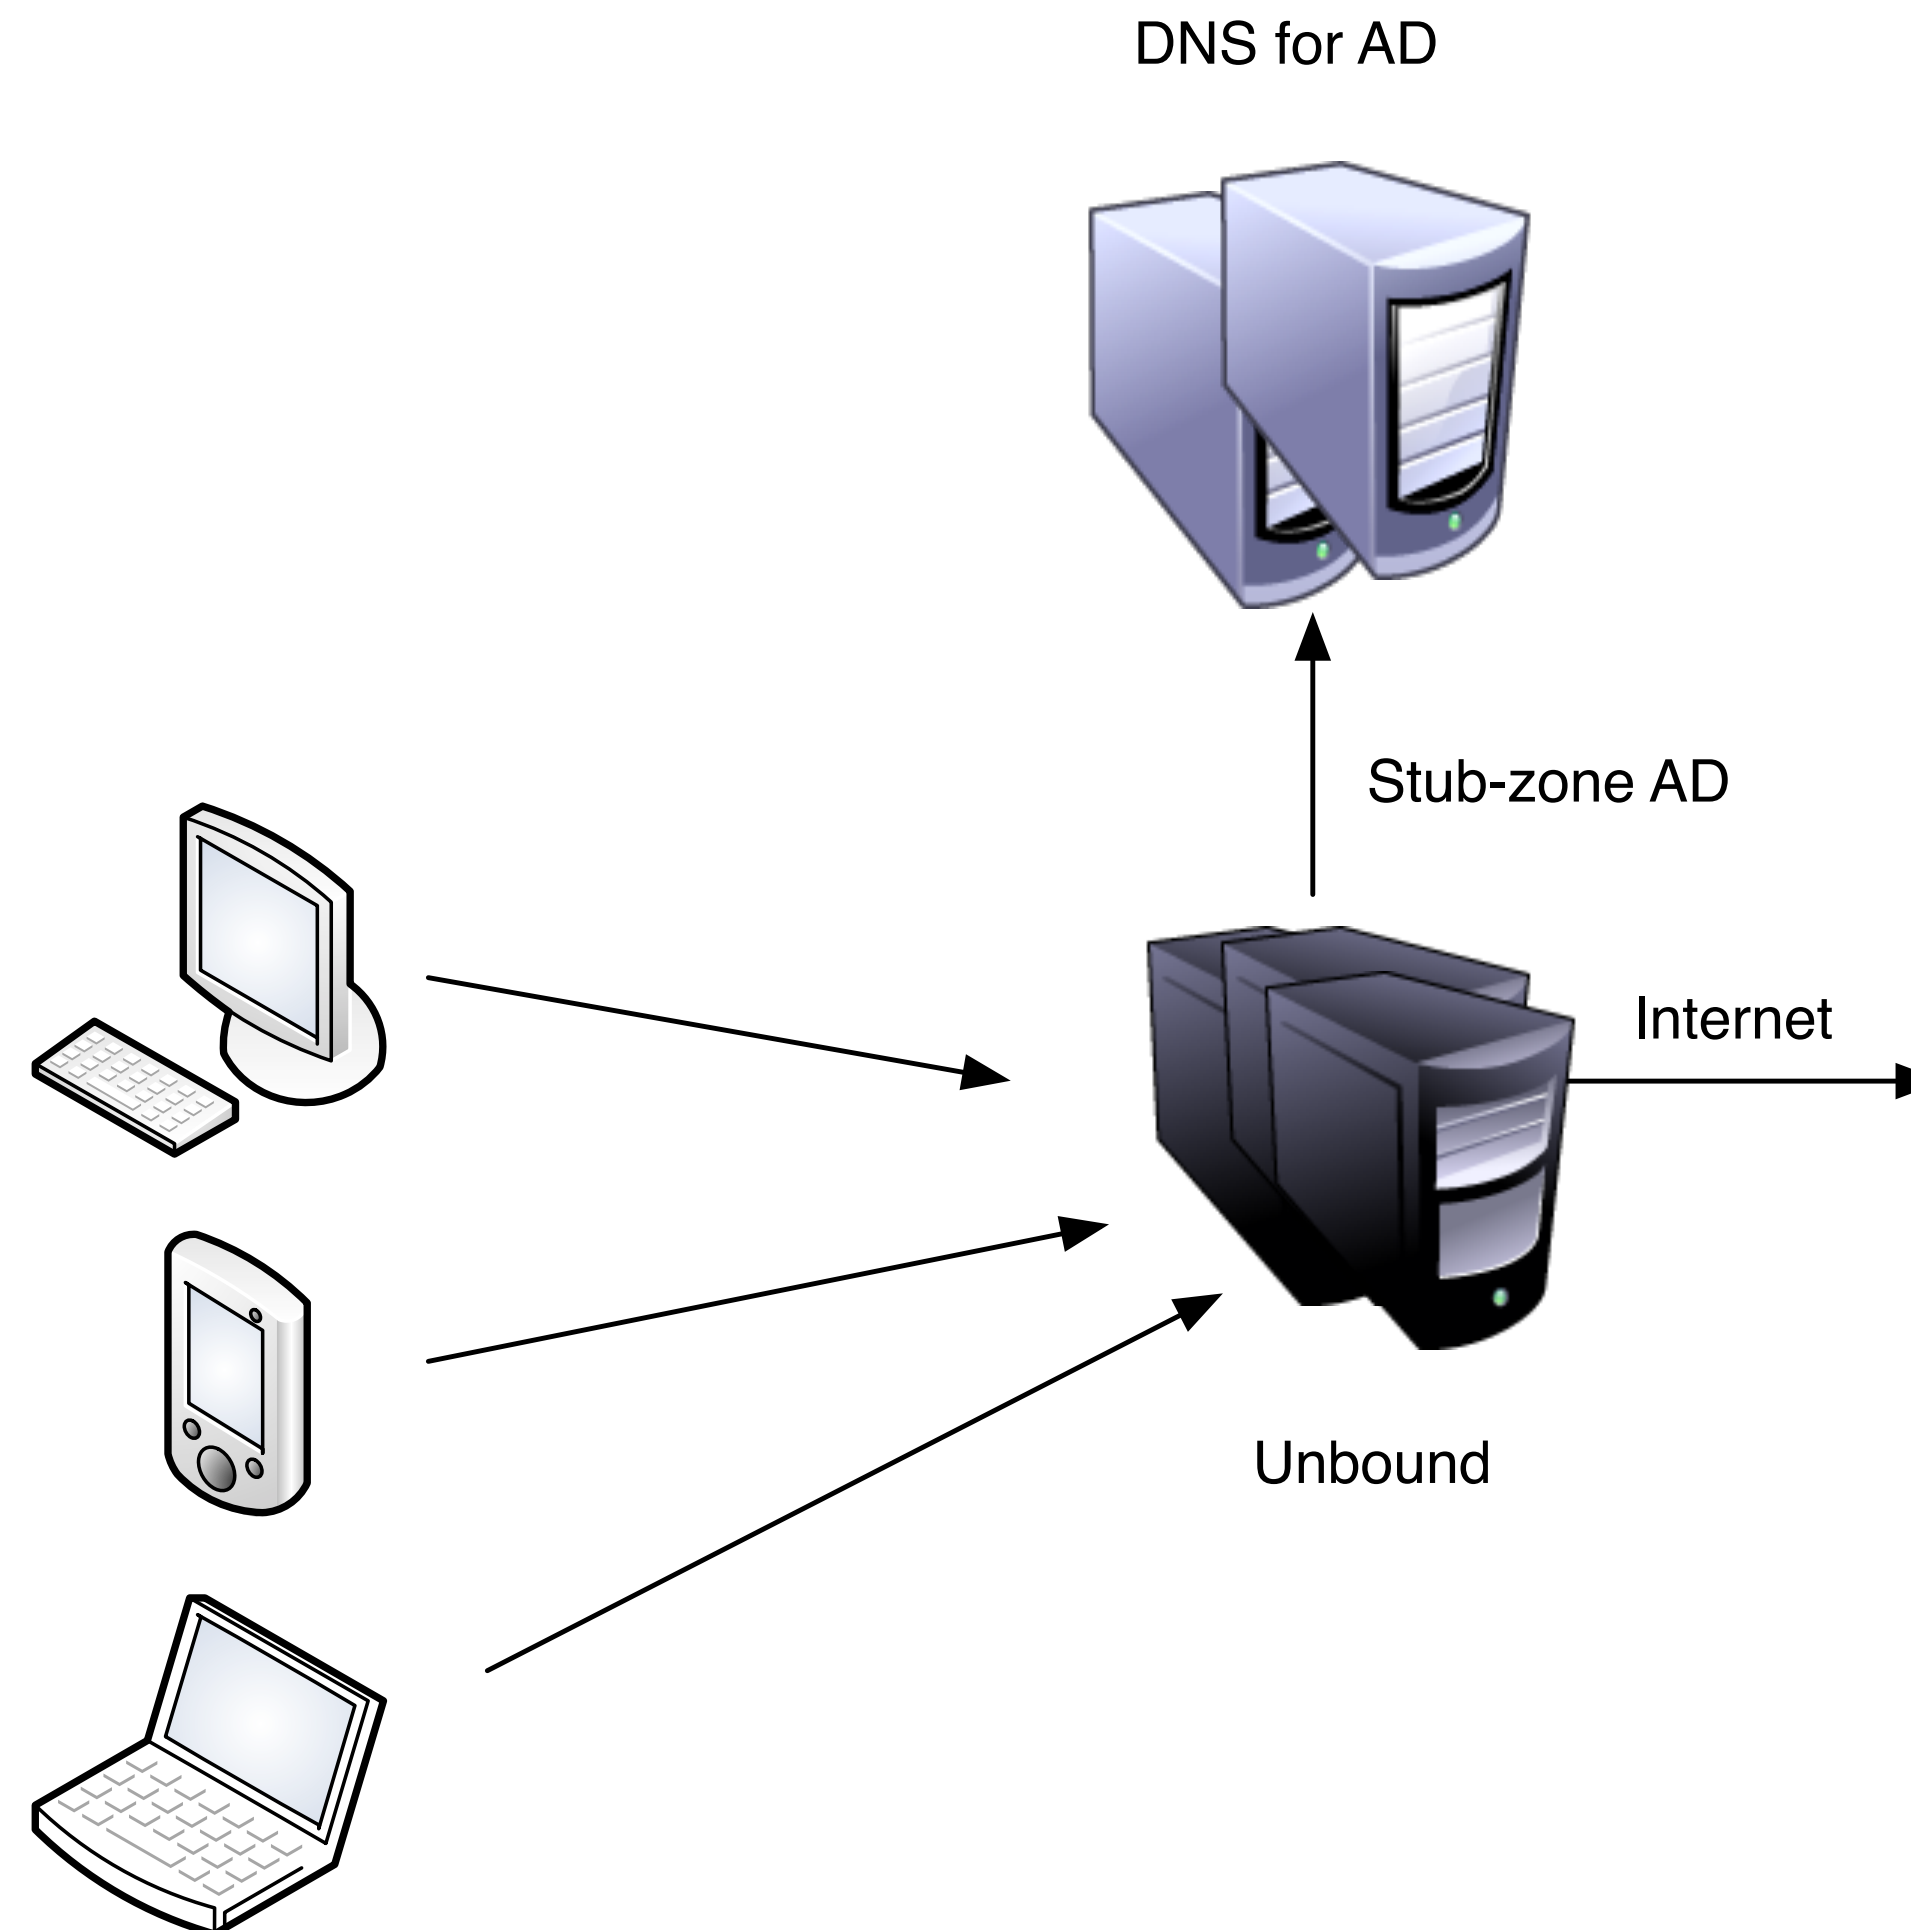

~30 000 Subscribers

Ten years with DNSSEC

Municipalities and
Enterprise

Use Unbound as resolver
for performance and
"easyness"

Problems??

- [gavle.se](#) 2007
- ns.? can't reach HM and vice versa
- Time sync problem - HM's clock is very important!
- Some KSK problem before root signing

KSK rollover - whats
the problem???
