

Hej!

Hello

สวัสดีครับ

Chawana Huangsunornchai (Ferrari)
LLM. Candidate, Leiden University

What might happen if we have a personal IP Address?

Imagining Everything might be connected using single account (IP)

Anonymity Absence

Effects on Governments

- Surveillance becomes easier
- Law enforcement and investigation become more effective

But

- Possibly enhance citizen's protection against unlawful procedure

Data Protection Issue

- IP Address becomes 'personal data'

But

- This may enhance abilities to manage online privacy

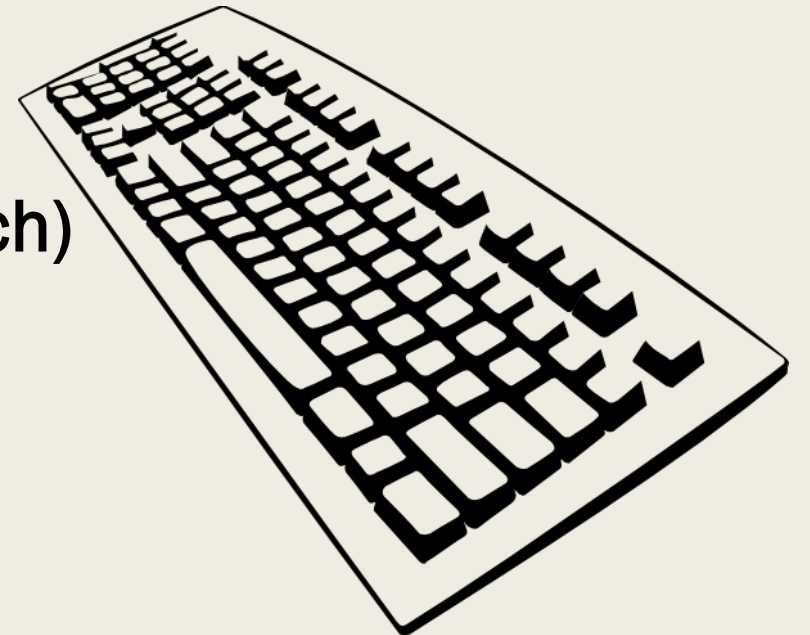

Peaceful Internet

- Rethinking before pressing 'enter'

Prevent Cyberbullying

But

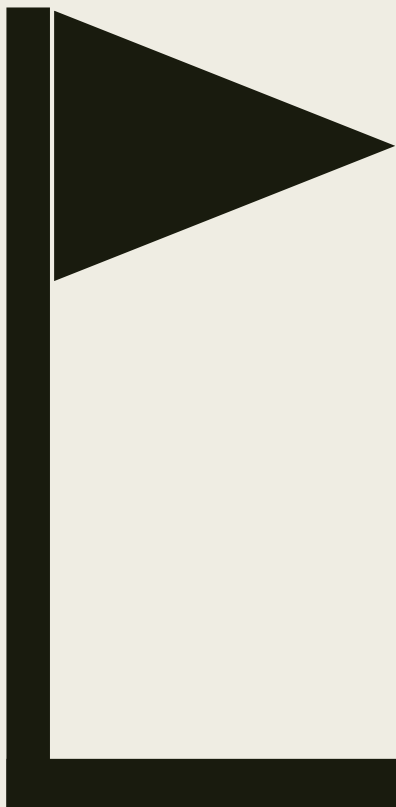

- Chilling effect (freedom of speech)

- Conflict of interests is possible to happen
- IP Address may supersede any identity number

New Opportunities & Difficulties

Tak!

Thank You
