

A stylized map of Taiwan is centered on the left side of the slide, rendered in a light blue outline. The background is a dark teal color with a pattern of concentric, slightly irregular circles radiating from the map. Several solid blue circles of varying sizes are scattered across the background, particularly in the top-left and bottom-right corners.

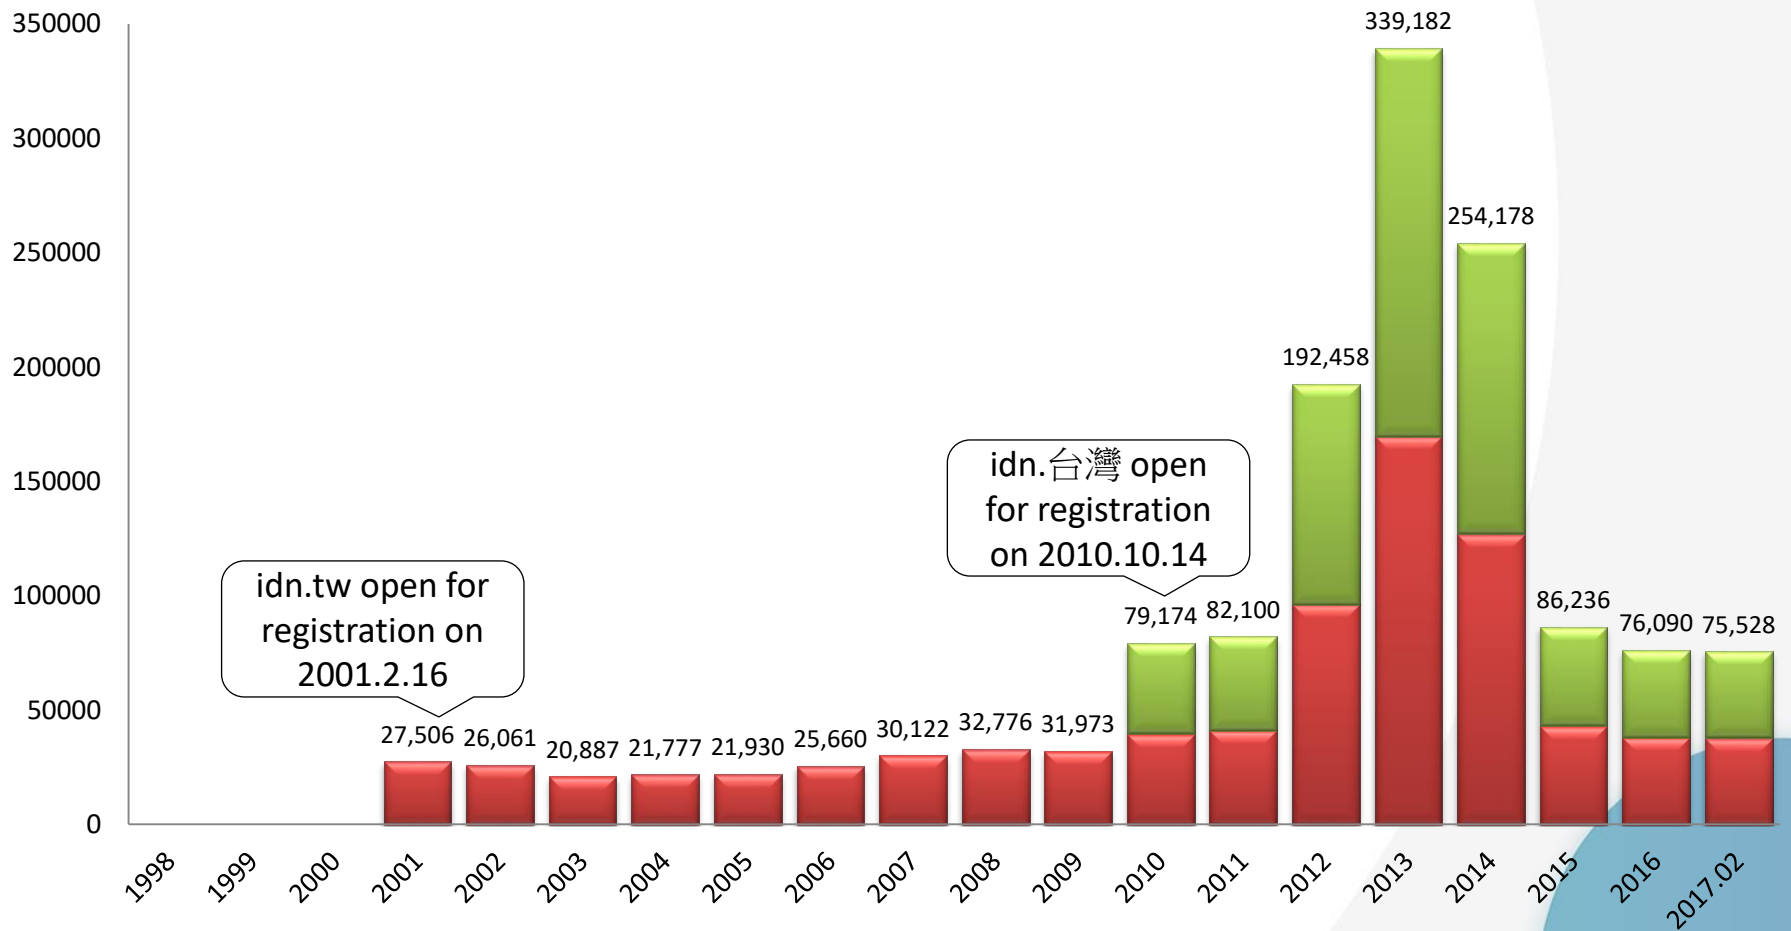

TWNIC Chinese EAI Promotion

ICANN 58

2017/03/14

idn.tw & idn.台灣 registrations

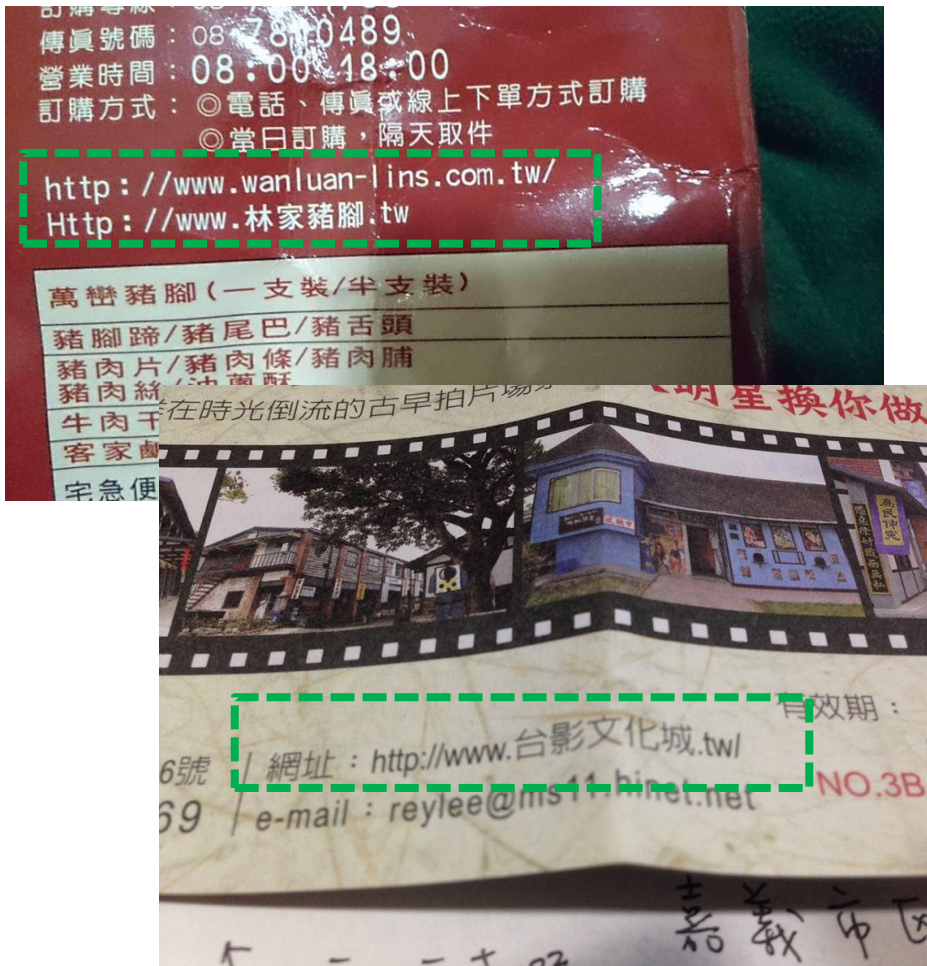

idn.tw & idn.台灣 cases

idn.tw & idn.台灣 cases

idn.tw & idn.台灣 cases

idn.tw & idn.台灣 registrations

The supply is there. But question is:
how to increase the demand?

We believe EAI is one of the
opportunities

4 Stages of TWNIC EAI Development

Preparation
2003-2006

Experiment
2007-2012

Implementation
2013-2014

Promotion
2014-

Stage 1-Preparation (2003~2006)

- Set up TWNIC i-Email Task Force
- Collaborate with some ccTLDs on CDNC meeting/JET meeting
 - Discuss about i-Email issues
 - Discuss possible solutions
 - Outline of framework
- Participate IEE BoF on IETF 64
- Join EAI WG on IETF 65
 - experimental RFCs
 - Gather experience
 - Standard track

Stage 2- Experiment (2007~2012)

- Conduct EAI Testing Plan
 - Set up a test-bed
 - Modify sendmail software to implement EAI WG draft (SMTP, UTF-8header, Downgrade)
 - Develop plug-in for MUA to send, receive and display i-Email address
 - Participate the EAI function test including CNNIC, JPRS, NIDA, Afilias and TWNIC registrants .
 - Around 6000 users participating the test mentioned above (400 active users, 1000 average number of emails /per day)
- Publish RFC 5335 Internationalized Email Headers (2008) and RFC 6532 Internationalized Email Headers (2012)
 - RFC 6532 is the replacement of RFC 5335 (obsoleted by RFC 6532)

Stage 2- Experiment (2007~2012)

- Search for an appropriate partner to implement EAI's RFC
 - Our concerns
 - the enthusiasm of participating in EAI
 - the ability of handling complex Mail server software
 - the modifiability of existing mail server architecture
 - the coverage of mail services
 - Openfind Mail 2000
 - Over 20,000,000 user accounts in Asia
 - government 55%, telecom 80%, academic 60%

Stage 2- Experiment (2007~2012)

- Interoperability test among other ccTLDs
 - Mail server: Openfind mail2000 Version 6 with EAI patch
 - MUA: mail2000 webmail
 - Participated the interoperability test group including CN, SG, MO, HK, and TWNIC staffs.
 - Held technical press conference in June 2012.

Stage 3 - Implementation (2013~2014)

Step 1

RFC 6531 / RFC 6532

- Web UI+CGI -support UTF-8 e-mail address name, domain name, login
- SMTP-support SMTP Extension
- MIME-Header and Message

Step 2

RFC 6857 / RFC 6858 / RFC 6533

- Downgrade- Downgrade for outside recipients, MUAs
- Notification –Delivery status and Disposition notification

Step 3

RFC 6855 / RFC 6856

- Support MUAs with UTF-8 enabled
- Support other MTAs with UTF-8 enabled

Stage 4 - Promotion (2014~)

- Step 1.
 - Provide EAI technical /conceptual training courses for vendors and users respectively.
- Step 2.
 - Survey the willingness of upgrading mail server software and MUA software for all vendors.
- Step 3.
 - Encourage the mail server vendors and mail service providers to implement EAI RFCs.

Stage 4 - Promotion (2014~)

- Step 4.
 - Conduct a trial program with designated hostname
 - TWNIC provides email service with designated hostname IDN.IDNccTLD (台網中心.台灣).
 - Register one IDN, get one free Internationalized E-mail account @ designated hostname.
 - For the users with the above hostname, they can send/receive EAI email via webmail.
 - 646 people participated in Step 4 program (Jul-Dec 2013)
 - 64.24% completed the required tasks
 - 81.69% felt satisfied with EAI experience
 - Easy to remember (70.00%) and personal representation (61%) are the advantages of Chinese EAI
 - 66.74% will apply his/her own EAI in the future

Stage 4 - Promotion (2014~)

- Step 5.
 - Conduct a trial program with user's own IDN
 - Register one IDN, get one free Internationalized E-mail account @ user's own IDN , hosted by TWNIC .
 - Set up an IDN-to-ASCII mapping table for communicating with the other ASCII-only e-mail users.
 - 366 people participated in Step 5 program (Mar-Jun 2014)
 - 55.46% completed the required tasks
 - 87.68% felt satisfied with EAI experience
 - 74.03% felt no difficult with DNS setting
 - 78.33% will apply his/her own EAI in the future
 - 54.19% will register IDN domain because of EAI.

Stage 4 - Promotion (2014~)

- Current Step.
 - Since Gmail and Outlook 2016 support EAI, TWNIC conducts a program with user's own IDN Register one IDN, get one free Internationalized E-mail account @your IDN , hosted by TWNIC .
 - Users are required to add his/her EAI account in Gmail or Outlook 2016 and send/receive email (complete required tasks) via Gmail or Outlook 2016.
 - It is to let users to experience that sending/receiving email with EAI account is same as ASCII account .
