

The image is a promotional graphic for the ICANN 60 Annual General meeting. It features a background photograph of a cityscape at dusk or dawn, with several tall, modern skyscrapers on the left and a large, ornate archway on the right. In the foreground, there are colorful flower beds and a paved walkway. A white rectangular box with a thin border is overlaid on the right side of the image, containing the event details in white text. The text is arranged in three lines: 'ICANN' in a large, bold, sans-serif font, followed by 'ANNUAL GENERAL' in a smaller, bold, sans-serif font, and '60' in a very large, bold, sans-serif font. Below this, 'ABU DHABI' is written in a bold, sans-serif font, and '28 October-3 November 2017' is written in a smaller, sans-serif font.

The Uniform Rapid Suspension Procedure (URS) Rights Protection Mechanism – Community Feedback Session

**GNSO Policy Development Process Working Group
– Review of All Rights Protection Mechanisms
(RPMs) in All gTLDs**

ICANN60 (Abu Dhabi)
2 November 2017

Preliminary Notes on Working Group Charters

- ⦿ All GNSO Policy Development Process (PDP) Working Groups operate within scope of a Charter approved by the GNSO Council
- ⦿ The Uniform Rapid Suspension procedure (URS) is one of the rights protection mechanisms (RPMs) the Working Group was chartered to review
- ⦿ This PDP Charter contains a list of issues and questions identified by the community over the past few years:
 - ❑ ***GNSO Council decided not to review/edit the questions; all were included in their entirety in the PDP Charter***
 - ❑ Working Group needs to refine the Charter questions as a first step to reviewing the RPMs

Uniform Rapid Suspension (URS) Charter Questions (1 of 5)

Questions Specific to the URS:

Response to Complaints; Defenses; Standard of Proof

- ⦿ Should the ability for defaulting respondents in URS cases to file a reply for an extended period (e.g. up to one year) after the default notice, or even after a default determination is issued (in which case the complaint could be reviewed anew) be changed?
- ⦿ Should the Response Fee applicable to complainants listing 15 or more disputed domain names by the same registrant be eliminated?
- ⦿ Is the URS' 'clear and convincing' standard of proof appropriate?
- ⦿ Are the expanded defenses of the URS being used and if so, how, when, and by whom?

Uniform Rapid Suspension (URS) Charter Questions (2 of 5)

Remedies; Appeals; Costs

- ⦿ Should the URS allow for additional remedies such as a perpetual block or other remedy, e.g. transfer or a “right of first refusal” to register the domain name in question?
- ⦿ Is the current length of suspension (to the balance of the registration period) sufficient?
- ⦿ How can the appeals process of the URS be expanded and improved?
- ⦿ Is the cost allocation model for the URS appropriate and justifiable?
- ⦿ Should there be a loser pays model? If so, how can that be enforced if the respondent does not respond?

URS Charter Questions (3 of 5)

Misuse; “Repeat Offenders”; Language

- ⦿ What sanctions should be allowed for misuse of the URS by the trademark owner?
- ⦿ Is there a need to develop express provisions to deal with ‘repeat offenders’ as well as a definition of what qualifies as ‘repeat offences’?
- ⦿ Has ICANN done its job in training registrants in the new rights and defenses of the URS?
- ⦿ What evidence is there of problems with the use of the English-only requirement of the URS, especially given its application to IDN New gTLDs?

URS Charter Questions (4 of 5)

Questions about Providers (applicable also to the Uniform Dispute Resolution Policy in Phase Two of this PDP)

- Assess the benefit of the Arbitration Forums self-reviews, including the WIPO Advanced Workshop on Domain Name Dispute Resolution, May 2015, in which inconsistencies of decisions, including in the free speech/freedom of expression area were candidly discussed and contemplated
- Are the processes being adopted by Providers of URS services fair and reasonable? (*note: this question also included TMCH & UDRP providers*)
- Are the Providers' procedures fair and equitable for all stakeholders and participants?
- Are the Providers consulting with all stakeholders and participants in the evaluation, adoption and review of these new procedures?
- What changes need to be made to ensure that procedures adopted by Providers are consistent with the ICANN policies and are fair and balanced?

URS Charter Questions (5 of 5)

- ⦿ Are Providers exceeding the scope of their authority in any of the procedures they are adopting?
- ⦿ What remedies exist, or should exist, to allow questions about new policies by the Providers offering URS services, and how can they be expeditiously and fairly created? *(note: this question also included TMCH & UDRP providers)*
- ⦿ Are the Providers training both the Complainants and the Respondents, and their communities and representatives, fairly and equally in these new procedures?
- ⦿ Is ICANN reaching out properly and sufficiently to the multi-stakeholder community when such procedures are being evaluated by ICANN at the Providers' request? Is this an open and transparent process?

Other Relevant Charter Questions (1 of 2)

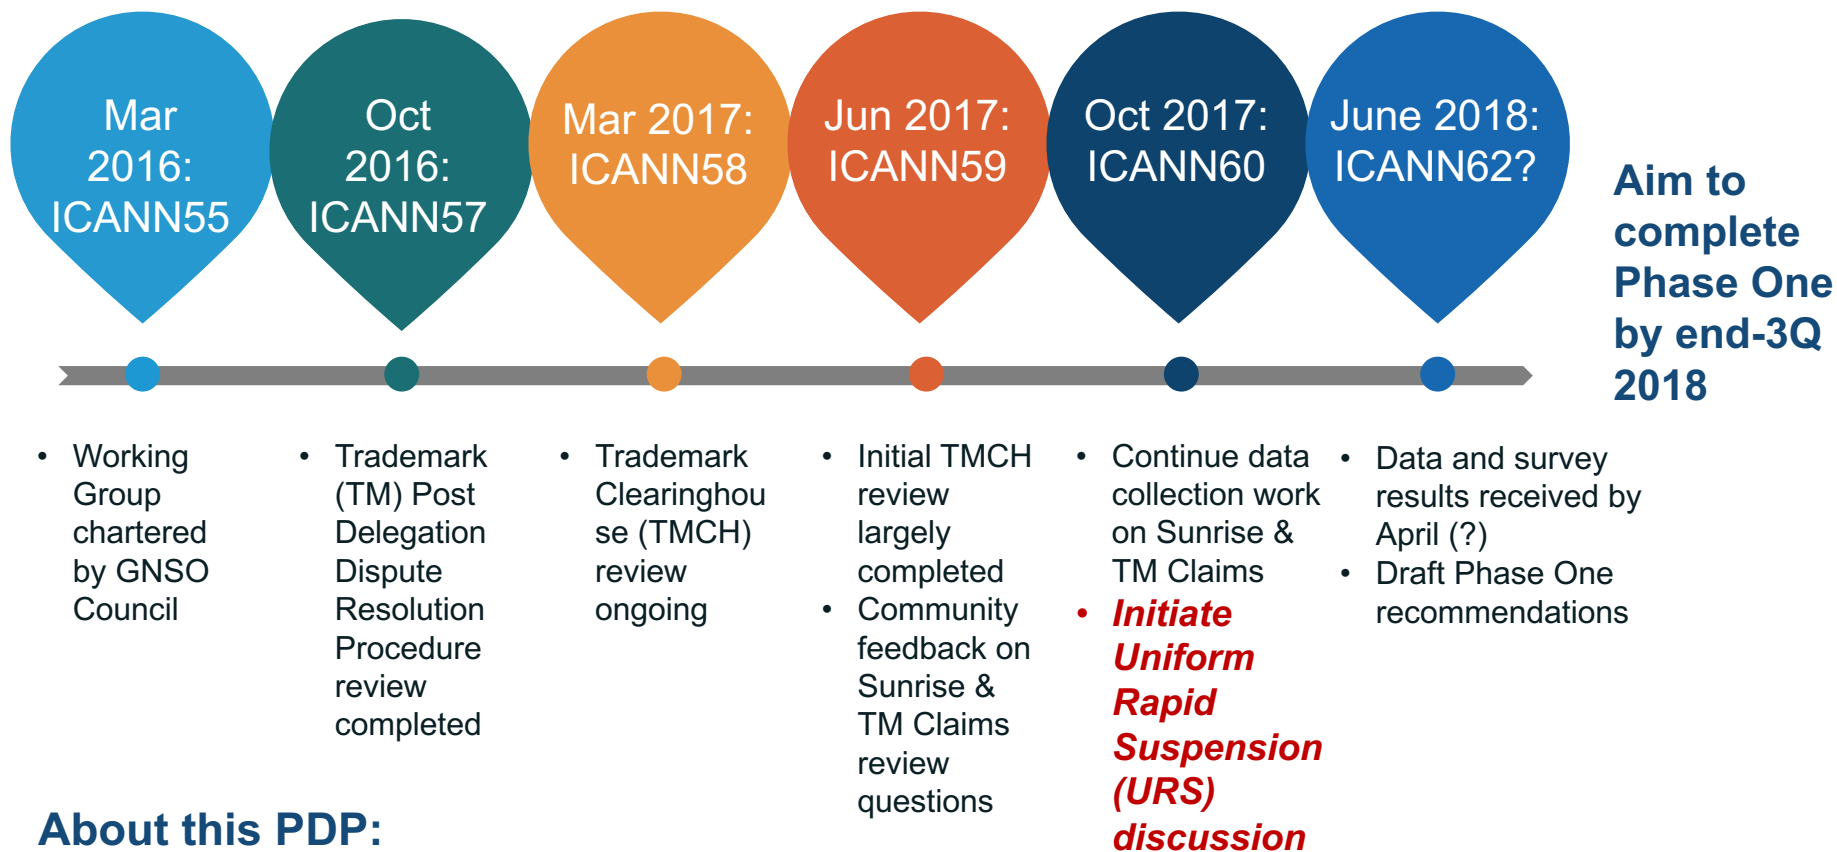

General Questions from the PDP Charter:

- Do the RPMs work for registrants and trademark holders in other scripts/languages, and should any of them be further “internationalized” (such as in terms of service providers, languages served)?
- Do the RPMs adequately address issues of registrant protection (such as freedom of expression and fair use)?
- Have there been abuses of the RPMs that can be documented and how can these be addressed?
- Whether, and if so to what extent, changes to one RPM will need to be offset by concomitant changes to the others
- Do the RPMs collectively fulfil the objectives for their creation... In other words, have all the RPMs, in the aggregate, been sufficient to meet their objectives or do new or additional mechanisms, or changes to existing RPMs, need to be developed?
- Should any of the New gTLD Program RPMs (such as the URS), like the UDRP, be Consensus Policies applicable to all gTLDs, and if so what are the transitional issues that would have to be dealt with as a consequence?

Other Relevant Charter Questions (2 of 2)

- ⦿ Do the RPMs work for registrants and trademark holders in other scripts/languages, and should any of them be further “internationalized” (such as in terms of service providers, languages served)?
- ⦿ Are recent and strong ICANN work seeking to understand and incorporate Human Rights into the policy considerations of ICANN relevant to the UDRP or any of the RPMs?
- ⦿ Are there any barriers that can prevent an end user to access any or all RPMs?
- ⦿ How can costs be lowered so end users can easily access RPMs?

RPM Review PDP: Phase One timeline

About this PDP:

PDP to review all the Rights Protection Mechanisms (RPMs) that are currently in operation

- Phase One - RPMs created for the 2012 New gTLD Program
- Phase Two - 1999 Uniform Dispute Resolution Policy (which applies to all gTLDs)
