

“Crisis of Accountability, Crisis of Trust”

Desiree Miloshevic

ccNSO @ ICANN 50
June 2014
London UK

Latest Developments in Internet Governance

A

- IANA Transition
- NetMundial
- WSIS +10
- IGF

... all as paths of the
Internet governance journey

B

We will explore recent global shift in focus on what's required to rebuild digital trustworthiness within the Internet ecosystem as well as among stakeholders and institutions.

Latest Developments in Internet Governance

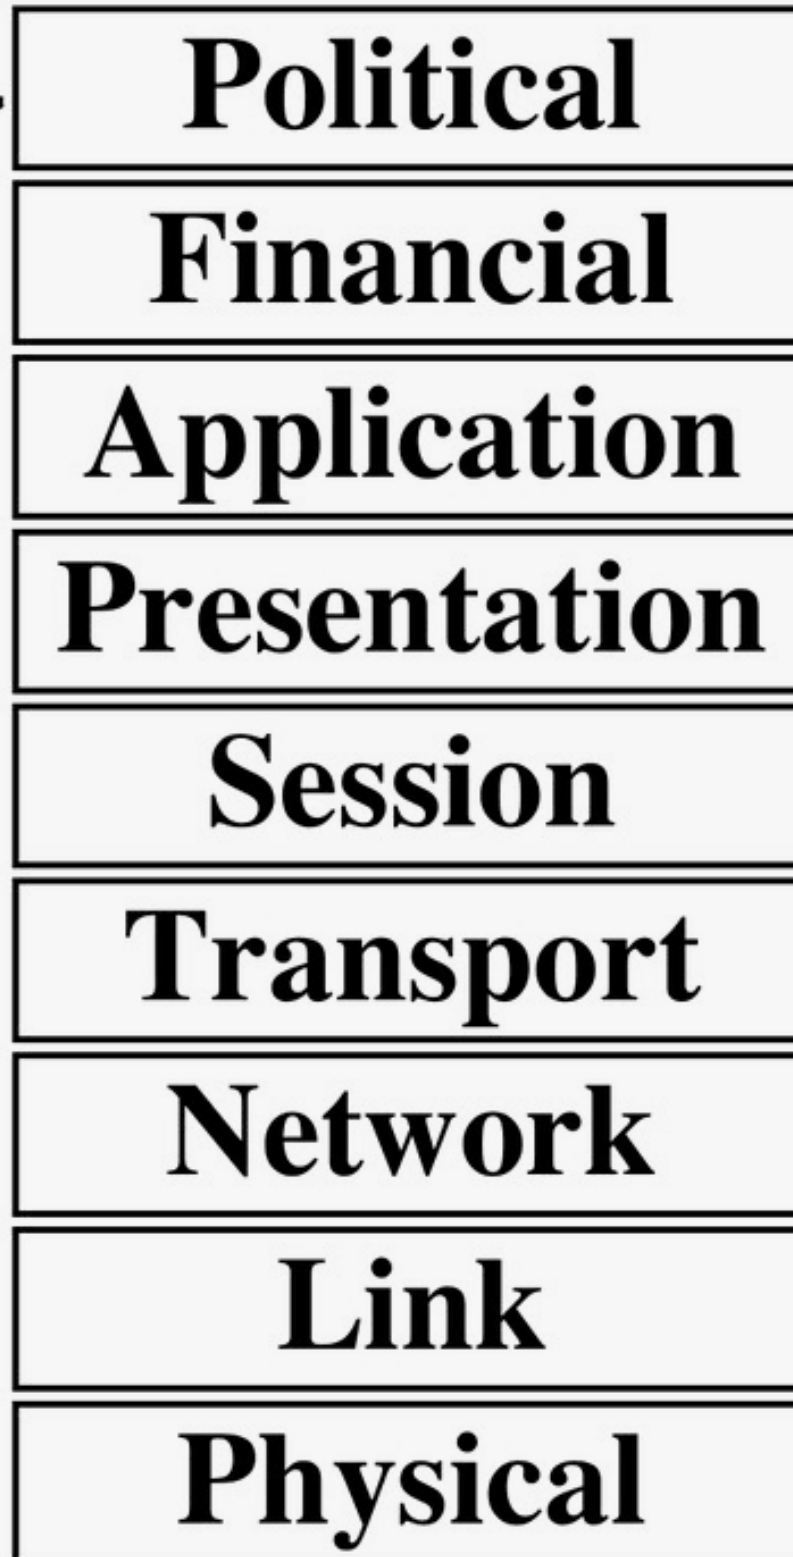

Can we imagine healthy development of our digital society without solving the post-Snowden challenges it brings to citizens, technology, community and governments as well

Latest Developments in Internet Governance

- For the first time in human history, the power of ideas has greater potential leverage than the power of corporations.

"Code is law... and architecture is politics"

—LARRY LESSIG

Swinging countries

Accountability?

NetMundial

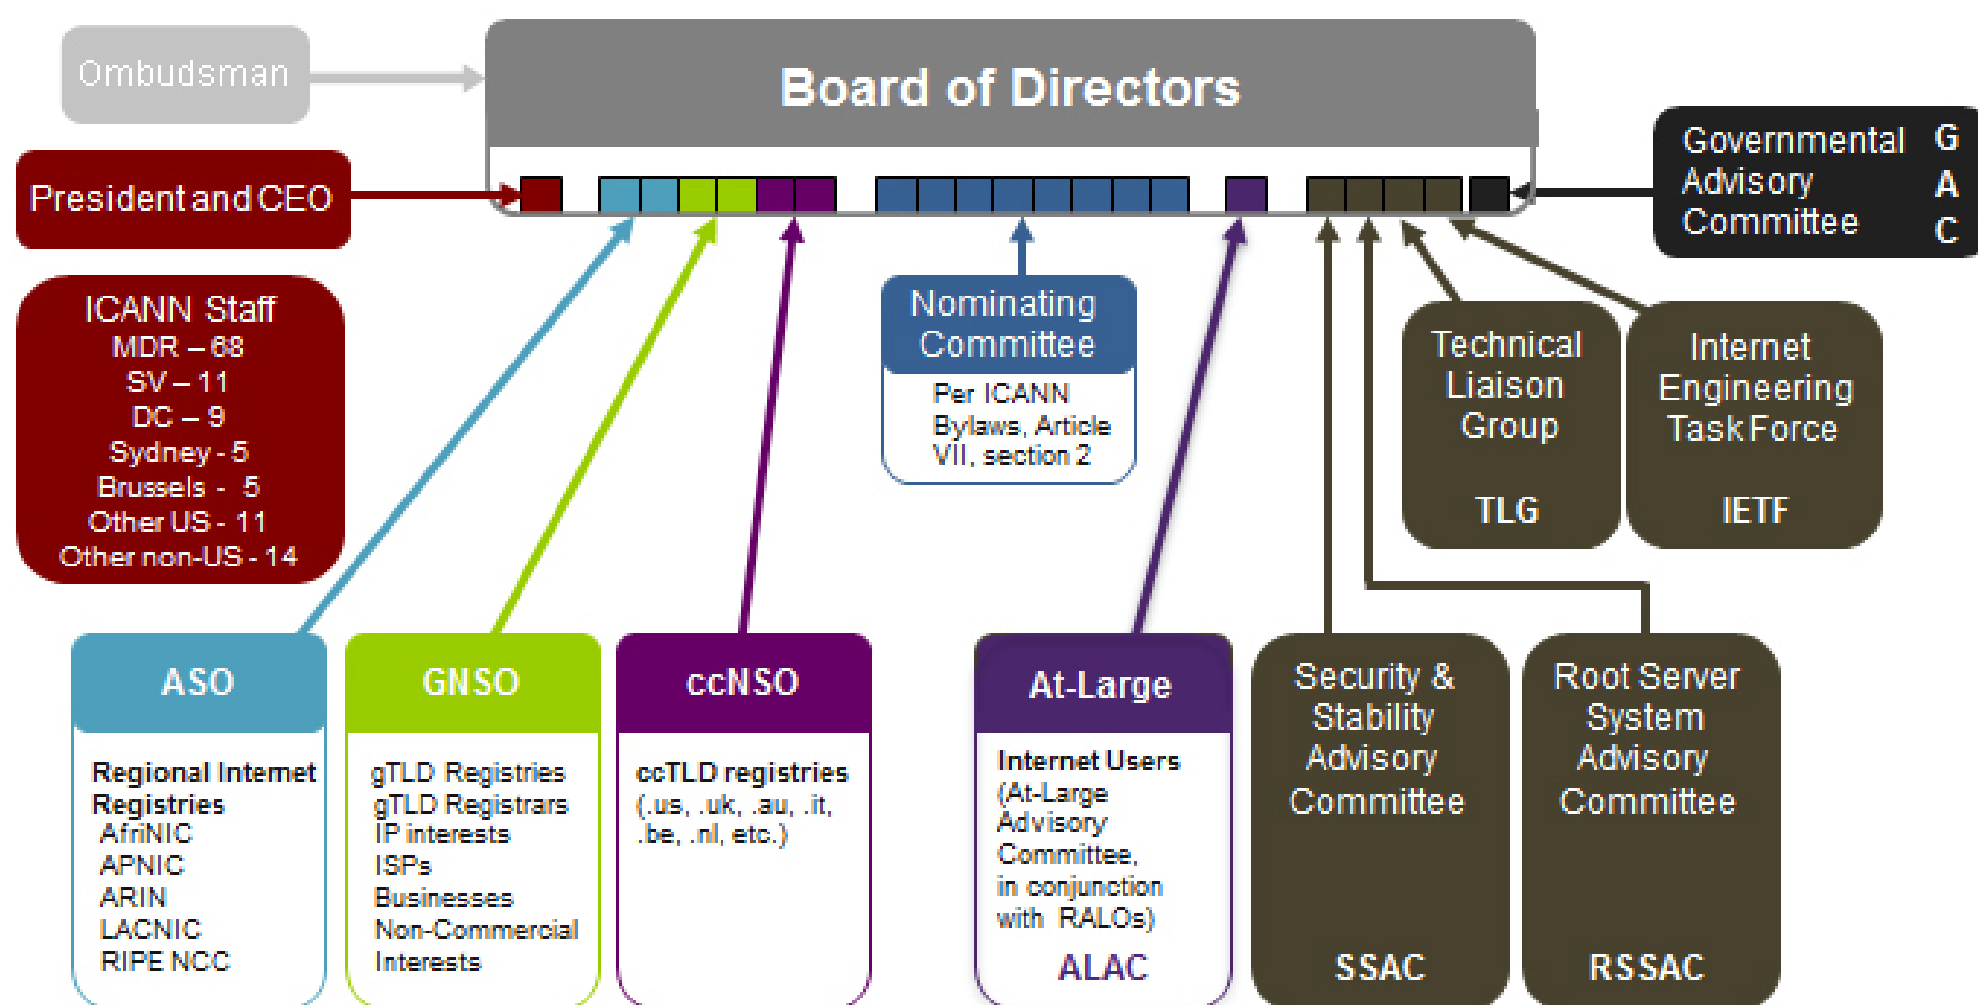

Multistakeholderism?

Hamadoun, Dilma, Fadi

ICANN Accountability

ICANN Multi-Stakeholder Model

IANA Transitions

- Subject is being discussed

WSIS +10

WSIS+10 Review (1)

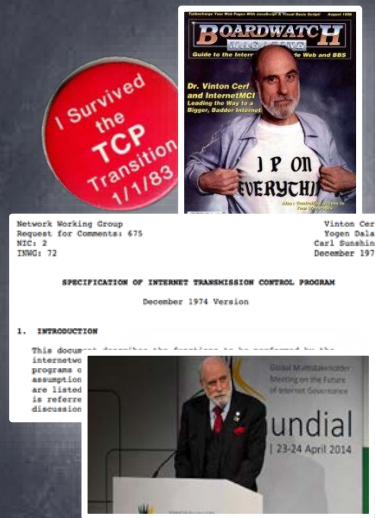

- As Called for in the Tunis Agenda (2005);
- Essentially to look at “effectiveness” of WSIS Action Lines;
- UNGA sanctioned two Review Sessions; UNESCO (March 2013) and ITU (June 2014)
- HL Event at Geneva last week was successful - Background and Vision Documents adopted after long, difficult but successful multi-stakeholder process;
- Fadi spoke in Opening; we did IG Workshop

The Internet Today

PERMISSIONLESS INNOVATION

- Architecture is at threat
- Multistakeholder processes at threat
- Governance institutions are at threat

Where Are We Going?

What are the main obstacles on the way?

What's the Final Destination of the Journey?

- For large number of people it's the most important thing – the Internet.
- Reminder of how importance the Internet is and why these discussions are important
