

DNSSEC deployment in Sweden

How do we do it?

.se

.se

DNSSEC | **IPv6**

Domains that are

- Sverige
- Norge
- Finland
- Danmark

- Signed

Without error = Unsigned
 With warning
 With error

dnscheck is used to control the domain status and what does error and warnings mean? Click on the appropriate municipality for more information.

June 2014

Mo	Tu	We	Th	Fr	Sa	Su
						1
2	3	4	5	6	7	8
9	10	11	12	13	14	15
16	17	18	19	20	21	22
23	24	25	26	27	28	29

What .SE registry does to further deploy DNSSEC?

- DNSSEC bonus
- 10 SEK price reduction for registrars who use our campaign offers
- Technically assist one of our largest registrars to overcome difficulties with mass signing

.se

Why is it so hard?

- Lack of competence
- Consultants work for larger margins, not necessarily more secure systems
