

13 October 2014

Global Domains Division ICANN 51 Update

Akram Atallah

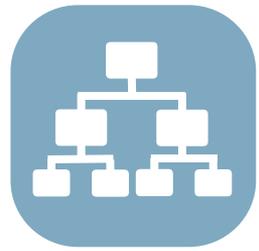

President, Global Domains Division

#ICANN51

Internet Identifier Ecosystem: Technology and Support

IANA Department

- Priority: Liaison on the IANA Stewardship Coordinating Group (ICG)
- 14 August 2014: 18th DNSSEC Key Signing Ceremony
- 1 September 2014: 3rd annual IANA functions customer survey
- Average processing times and volumes for root zone-related changes published monthly

Technical Initiatives

- Goal: Improve ICANN's Technical Stature
- Immediate Priorities: Root Zone management, Root DNSSEC Key rollover
- Strengthening technical team – new CTO
- Leveraging “Strategy Panel on Identifier Technology Innovation” and working with “I*” innovators

ICANN 51 Workshop Session

DNSSEC Key Rollover Workshop
Thursday, 16 October

Security, Stability and Resiliency

- Priority: Moving forward with DNS Risk Framework
 - Documenting assets
 - Identifying existing mitigation strategies
 - Defining community involvement

Attend the ICANN 51 Session

Domain Name System Risk Framework
Wednesday, 15 October – 15:00-16:15

Contracted Parties Initiatives

#ICANN51

Registry Engagement and Support

- Priority: Evolving interactions with and support for registries; improving communications
 - Developing Engagement Manager role
 - Implementing usable service platforms
 - Establishing service level targets and metrics
 - Educational outreach and expanded language support

Attend the ICANN 51 Session

Registry Services Update

Wednesday, 15 October – 11:30-12:30

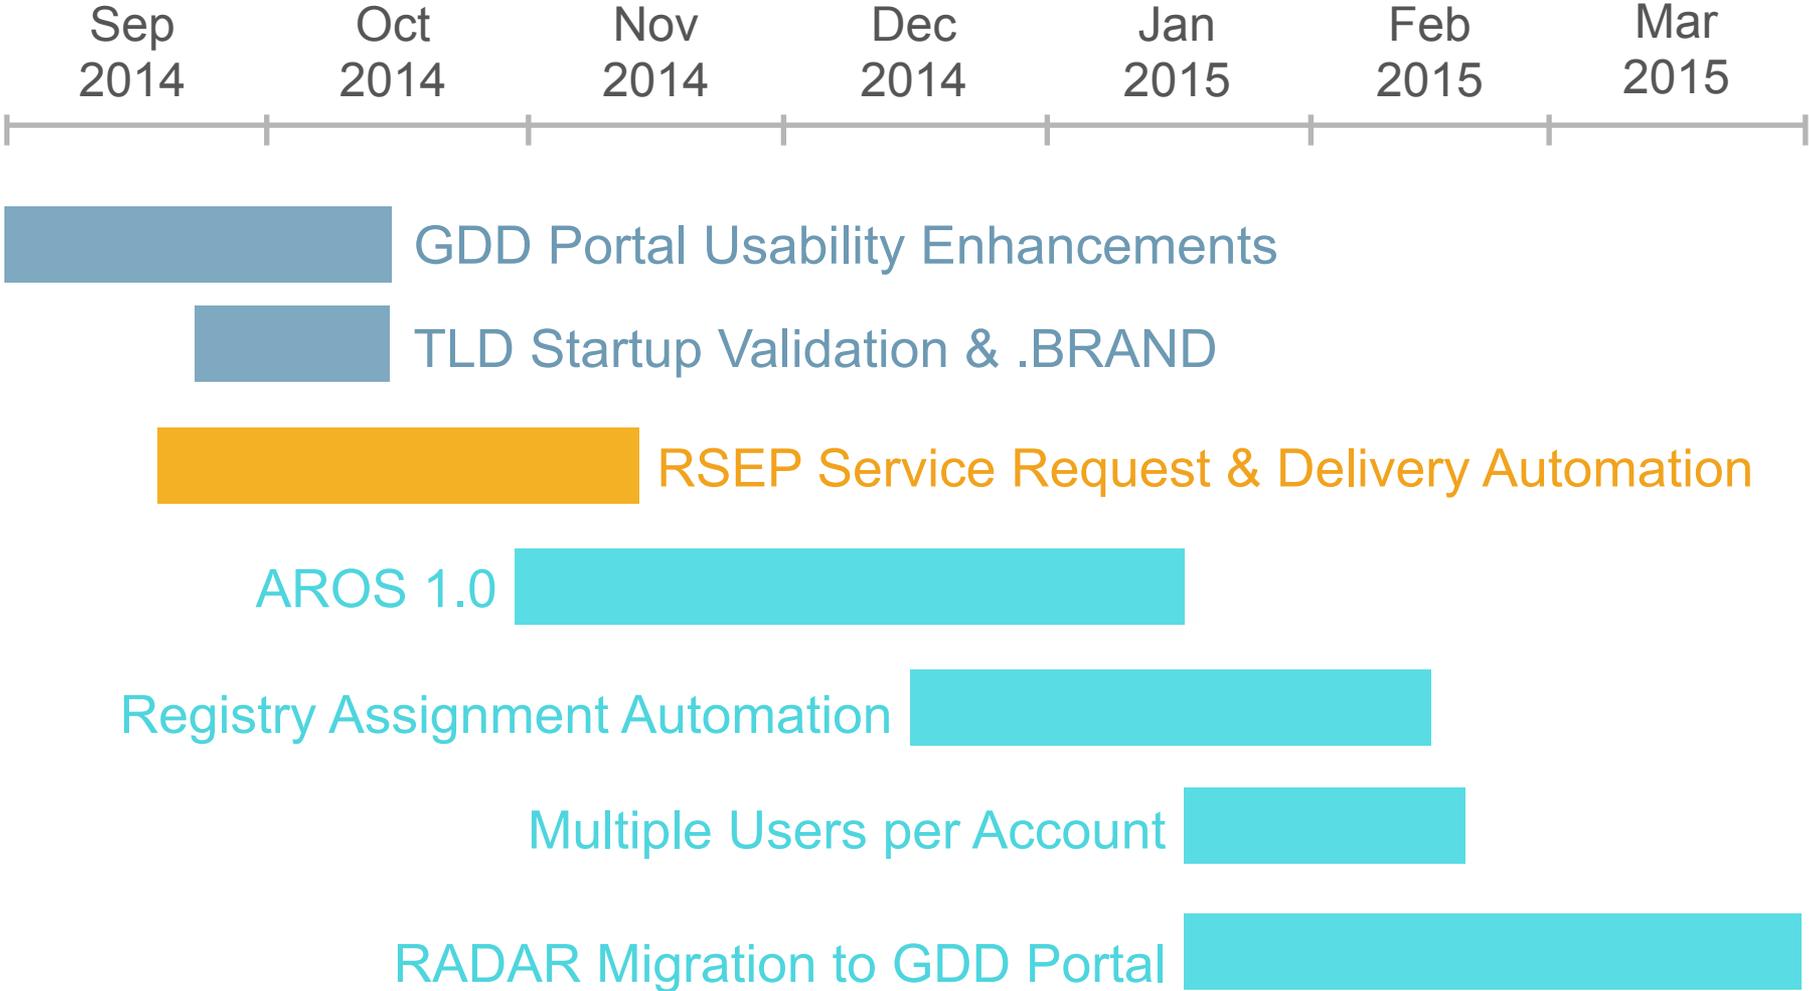

Registrar Engagement and Support

Priorities:

- Relationship management
- Geographic diversification of Registrar Services team
- Accreditation application improvements
- Expanded language support
- Educational outreach
- WHOIS accuracy study
- Updating service platforms

GDD Portal Timeline

Service Delivery

- Priority: Improving systems, staffing to meet demand and creating new channels for communicating with ICANN
- Creating processes that will result in reliable, responsive and transparent delivery of services

Attend the ICANN 51 Session

GDD Service Delivery, Customer Service & SLAs
Wednesday, 15 October – 15:00-16:15

New gTLD Program

- Priority: Reliable and quality processing of remaining applications
- Contention resolution: 50% completed (233 total sets)
 - 4 sets resolved via Auction
 - 4 resolved via Community Priority Evaluation

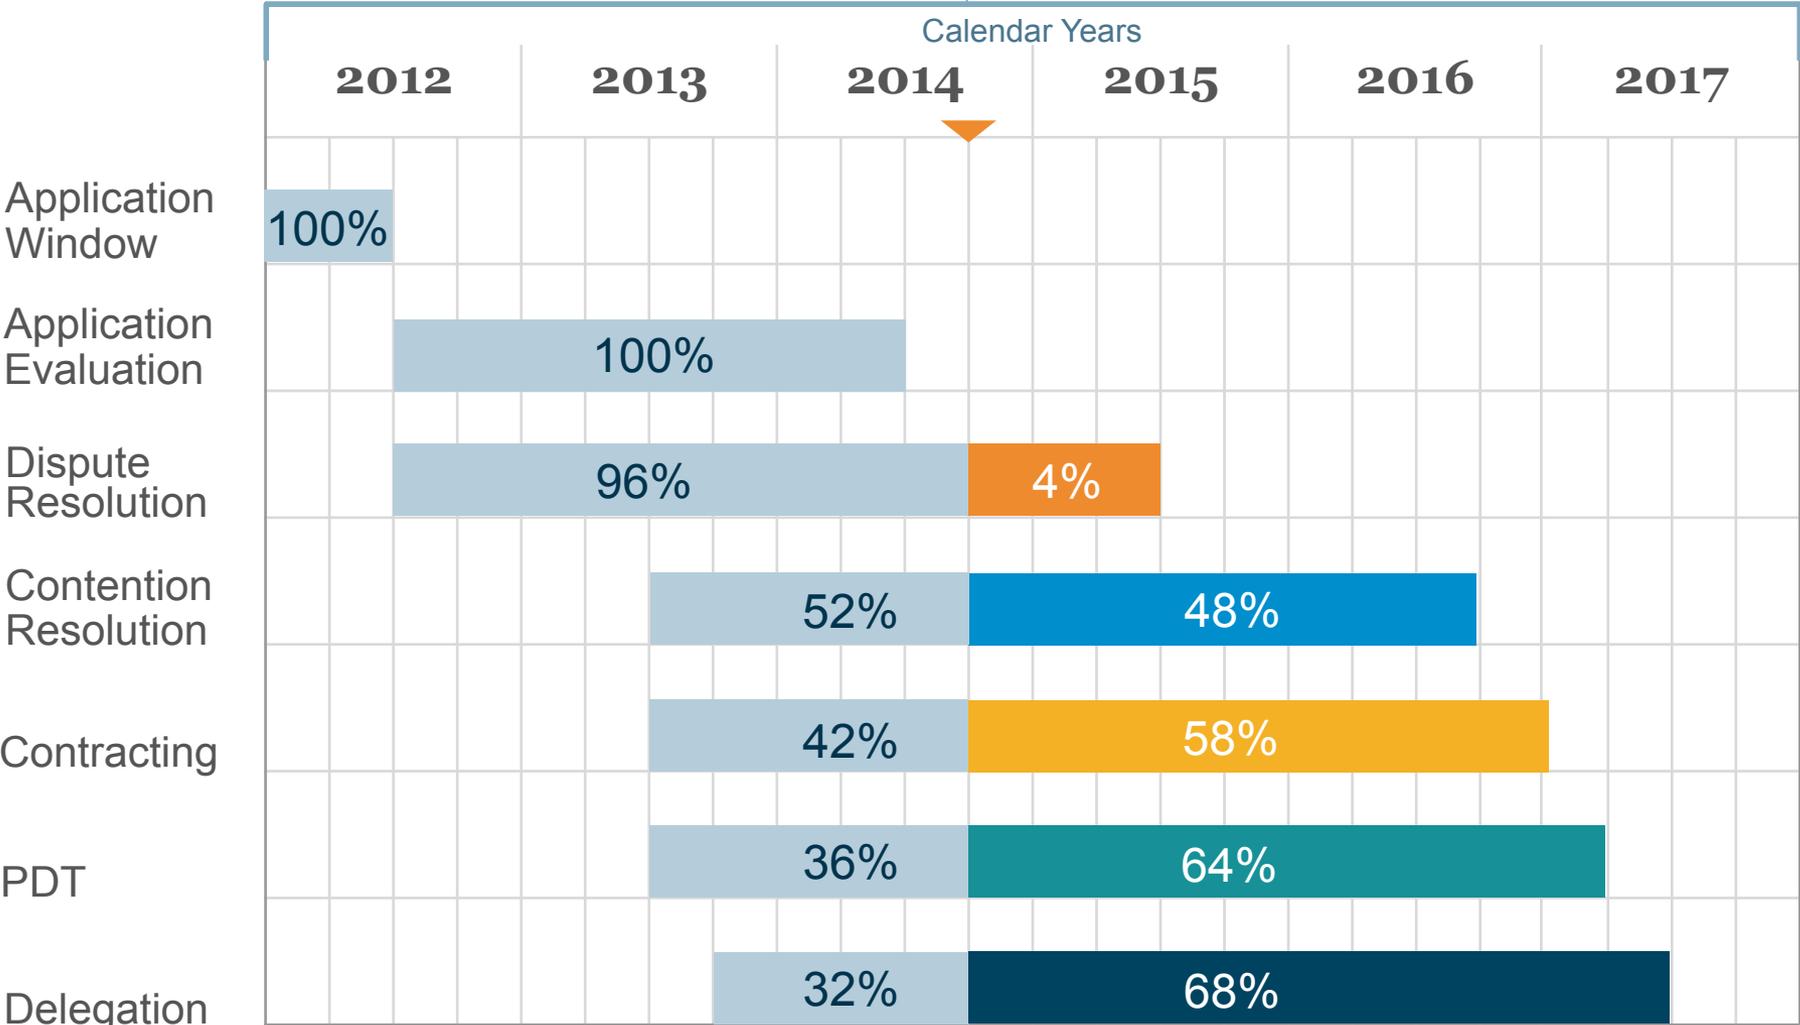

Attend the ICANN 51 Session

New gTLD Program Update
Monday, 13 October – 16:45-18:00

Program Timeline

Completed

Remaining

First new gTLD Delegation: 23 October 2013

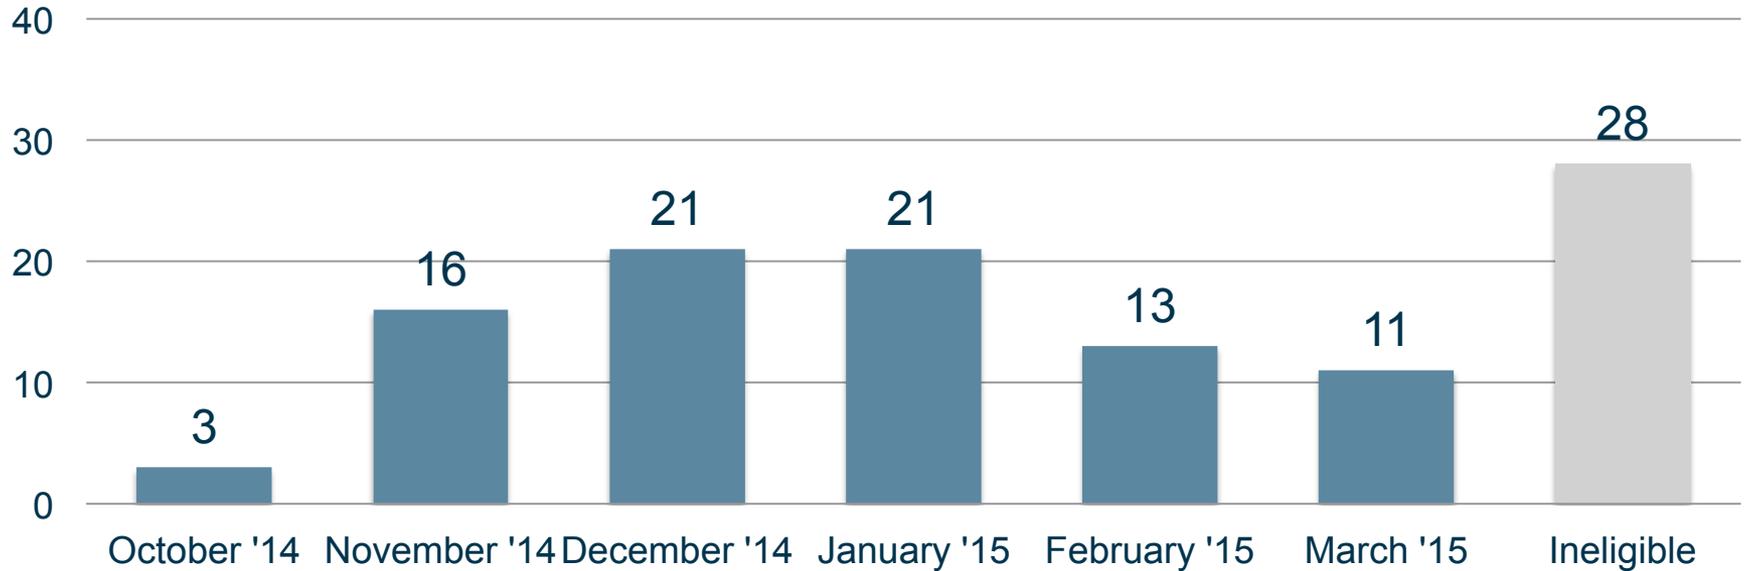

Note: This graphic depicts forecast completion dates based on current program operations; forecast dates are subject to change

Application Pipeline

Auctions – Status

Auctions Scheduled Per Month

- Primary reasons sets are not yet eligible for an auction:
 - Awaiting CPE
 - Pending Accountability Mechanisms / Sets on Hold
 - Indirect Contention Sets - rules to be published November 2014

Program Financial Model

2000 Applications Model

Historical Costs: \$50M

**Application Processing
Costs: \$200M**

**Hard to Predict Costs:
\$120M**

FY15 Budget

70 Fewer Applications: \$13M

Historical: \$33M

Refunds: \$51M

**Program Operating
Expenses: \$192M**

**Forecast Remaining Funds:
\$87M**

Internationalized Domain Names

- Priority: Completing the Root Zone Label Generation Ruleset (LGR)
 - Current focus: Latin, Cyrillic and Greek scripts
- Revision of the IDN Implementation Guidelines being assessed

Attend the ICANN 51 Session

IDN Program Update

Wednesday, 15 October – 08:30-09:45

Name Collision

- Priority: Community consultation on how to handle second-level domain names withheld as a result of the Name Collision block list
- Collision Framework process working as planned
- Discussion with GNSO about potential need for additional policy work

Attend the ICANN 51 Session

Name Collision

Wednesday, 15 October – 10:00-11:15

Rights Protection Mechanisms

- Priority: Review of user experiences with Rights Protection Mechanisms to date
 - Trademark Clearinghouse and Claims service
 - Uniform Rapid Suspension (URS) system
 - Post-Delegation Dispute Resolution Procedures (PDDRPs)

Attend the ICANN 51 Session

Rights Protection Mechanisms: User Feedback
Wednesday, 15 October – 13:15-14:45

Universal Acceptance

- Priority: Convincing software vendors and the DNS industry to adopt and support Universal Acceptance
- Develop a means of testing and measuring Universal Acceptance progress

Attend the ICANN 51 Session

Universal Acceptance Initiative
Wednesday, 15 October – 16:30-17:45

New gTLD Program: Next Round

- Priority: Finalizing the New gTLD Program Work Plan with community (draft published 22 September 2014)
- Key review areas:
 - Program Reviews
 - GNSO Policy Development
 - Affirmation of Commitments
 - New Round Preparation

Attend the ICANN 51 Session

Update on Next Round of gTLDs
Monday, 13 October – 15:15-16:30

WHOIS

- Thick WHOIS: Updating current plan to streamline implementation

Attend the ICANN 51 Session

Thick WHOIS Implementation (Working Session)
Thursday, 16 October – 08:30-10:00

- Registry Data Access Program: Helping registries and registrars prepare to implement new RDAP protocol

Attend the ICANN 51 Session

Deploying the IETF's WHOIS Replacement
Thursday, 16 October – 10:30-11:45

New Initiative: Data Privacy White Paper

- ICANN agreements govern collection, use, retention, security, escrow and transfer of registrant data
- Local jurisdictions have differing requirements on handling of Personally Identifiable Information
- Staff gathering information on the extent and impact of possible clashes between ICANN requirements and local privacy laws
- Staff white paper by ICANN 52 to identify issues for community consideration (“Stress Tests”)

GDD + Related Sessions

Monday, 13 October 2014

- Update on Next Round of gTLDs
- New gTLD Program Update

Wednesday, 15 October

- Internationalized Domain Name (IDN) Program Update
- Contractual Compliance Update
- IDN Root Zone LGR (workshop)
- Name Collision
- Registry Services Update
- Rights Protection Mechanisms: User Feedback Session
- DNS Risk Framework
- GDD Service Delivery, Customer Service & SLAs
- Universal Acceptance

Thursday, 16 October

- DNSSEC Key Rollover Workshop
- Thick WHOIS Implementation (Working Session)
- Deploying the IETF's WHOIS Replacement
