George Kirikos: (10/11/2014 08:58) Hi folks.

Lars Hoffmann: (09:41) Amr Elsadr joined the phone bridge

Cintra Sooknanan 2: (09:41) Hi Lars is it possible to increase the size of the chat window?

Lars Hoffmann: (09:42) @cintra - you might remember from London (where yu had the the same request) - the set up of these rooms is done by tech support and it's the least bad option to have the windows split up this way ...

Cintra Sooknanan: (09:49) not conducive to adequate utilisation of the chat space atall, with ICANN staff taking over the technical requirements of meetings and not outsourcing this service I would think that there would be more flexibility

Mary Wong: (09:51) @Cintra, apologies for the inconvenience - every AC room for an actual ICANN meeting is set up according to uniform specs due to the technical infrastructure and coordination required. We cannot change these for individual meetings as the same room is used for multiple meetings.

George Kirikos: (09:52) Great work, Petter & Phil.

George Kirikos: (09:52) Bye folks.

Volker A. Greimann: (09:53) could the screen in front of me be turned off? the shaking of the picture is making me crazy(or at least crazier than normal)
