WHOIS Activities through 2017

WHOIS Accuracy Reporting System Design (ARS)

Exploring Identity Checks

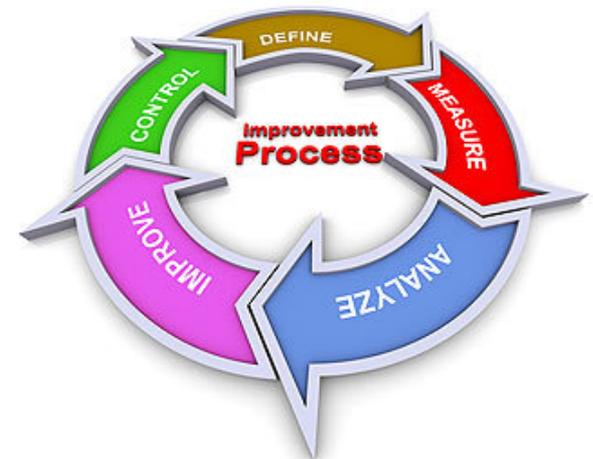

Margie Milam

WHOIS Accuracy Reporting System

- ⦿ Part of 2012 ICANN Board directive to implement WHOIS Review Team-recommended improvements

- ⦿ Approach

- ⦿ Proactively identify inaccurate WHOIS records
- ⦿ Explore using automated tools
- ⦿ Forward potentially inaccurate records to registrars for action
- ⦿ Publicly report on the resulting actions

WHOIS ARS Pilot Status & Next Steps

Pilot

- ⦿ Pilot Study completed by NORC tested Methodology using live data
- ⦿ Findings reflect 2013 RAA contributed to improved accuracy rates
- ⦿ Compliance Pilot underway to confirm findings & forward possible contractual related issues to registrars

Next Steps

- ⦿ Public Comment Open until Feb 28 2015
- ⦿ Feedback to Inform the final Design of the ARS
- ⦿ **Question:** *Should ARS include identity validation checks?*

WHOIS ARS - Timeline

May 14

- Launch of RFP
- Selection of vendors

Oct. 14 - Feb 15

- Preliminary Findings
- Public Comment on Pilot Report

Mid 2015

- Syntactical validation of:
- Email
 - Telephone
 - Postal address

Late 2015

- Operational validation of:
- Email
 - Telephone
 - Postal address

TBD

- Identity validation?
- Integration of new systems

Exploring Identity Validation

- ⊙ NORC Accuracy Pilot (2014)
 - ⊙ **Syntactic and Operational Validation** for sample of
 - ⊙ Registrant emails, postal addresses, & telephone numbers
- ⊙ Did not attempt **Identity Validation** due to
 - ⊙ Complexity and cost concerns
 - ⊙ What degree of validation is feasible/acceptable?
- ⊙ In this panel, we will further explore **Identity Validation**:

Assessment that the data corresponds to the real world identity of the entity. It involves checking that a data item correctly represents the real world identity for the registrant. In general, identity validation checks are expected to require some manual intervention. – SAC058

WHOIS Identity Validation RFP Responses

- ◉ WHOIS Online Accuracy Reporting System: [Request for Proposal](#) issued in May 2014
- ◉ Objective: Identify one or more vendors to provide services, software or data to support ICANN's development of the Accuracy Reporting System, including
 - ◉ Verification and validation of WHOIS contact data, including postal address, email, telephone and registrant identity
- ◉ Six (6) RFP respondents proposed Identity Validation services
 - Research Organization
 - Systems Integrator
 - Credit Bureau
 - Standards Body
 - Industry-specific Verification Providers

Summary of Proposed Services

- ⦿ No standard, little consistency, but some patterns...
- ⦿ Common components
 - ⦿ Database lookups
 - ⦿ Phone validation
 - ⦿ Email validation
 - ⦿ Postal validation
- ⦿ Most involve some degree of Syntactic and Operational validation, *in addition to identity validation and largely manual processes*
- ⦿ Possible Approaches:
 - ⦿ Third Party Database checks vs. Interactive Registrant Validation
 - ⦿ Dependence on existing registration in external databases (e.g., corporate registration, photo ID, postal address)

Discussion Questions for Panel

- ⦿ What is required to move beyond Syntactic and Operational Validation to Identity Validation?
- ⦿ Are third party database checks adequate?
 - ⦿ What makes a database reliable?
 - ⦿ How to address inconsistent quality of databases across regions?
- ⦿ Should registrants be contacted through the ARS to confirm their identity? How do we ensure they will respond?
- ⦿ Is interactive Identity Validation acceptable or reliable?
 - ⦿ Are there security concerns raised by reaching out to registrants?
- ⦿ Given the high costs, smaller sample sizes may be used. How do you ensure reliability?

Help Shape the Design of the ARS

Download Final Report:

<http://whois.icann.org/sites/default/files/files/ars-pilot-23dec14-en.pdf>

Comment Forum: Open Until 27 February 2015:

<https://www.icann.org/public-comments/whois-ars-pilot-2014-12-23-en>

A world map where the continents are defined by a complex network of white nodes and connecting lines, set against a dark blue background. The nodes vary in size and are densely packed in some areas, creating a digital or network-like appearance of the globe.

Questions on the ARS?

RAA Review of WHOIS Accuracy Obligations

Mike Zupke

WHOIS Accuracy Specification

2013 Registrar Accreditation Agreement (RAA) introduced new requirements:

- **Registrant & Account Holder “validation”:**
 - No empty, required fields
 - Email addresses formed to spec (RFC 5322)
 - Telephone numbers formed to spec (ITU-T E.164)
 - Postal addresses formed to spec (UPU S42)
 - Postal address fields jibe with each other (cross-field validation) – where technically and commercially feasible
- **Verification of either email or telephone number within 15 days**
- **Deletion or suspension of registrations for willful inaccuracies or failure to respond**

Section 6: Specification is to be reviewed 1 year after the new RAA first executed

Discussion Questions for Panel

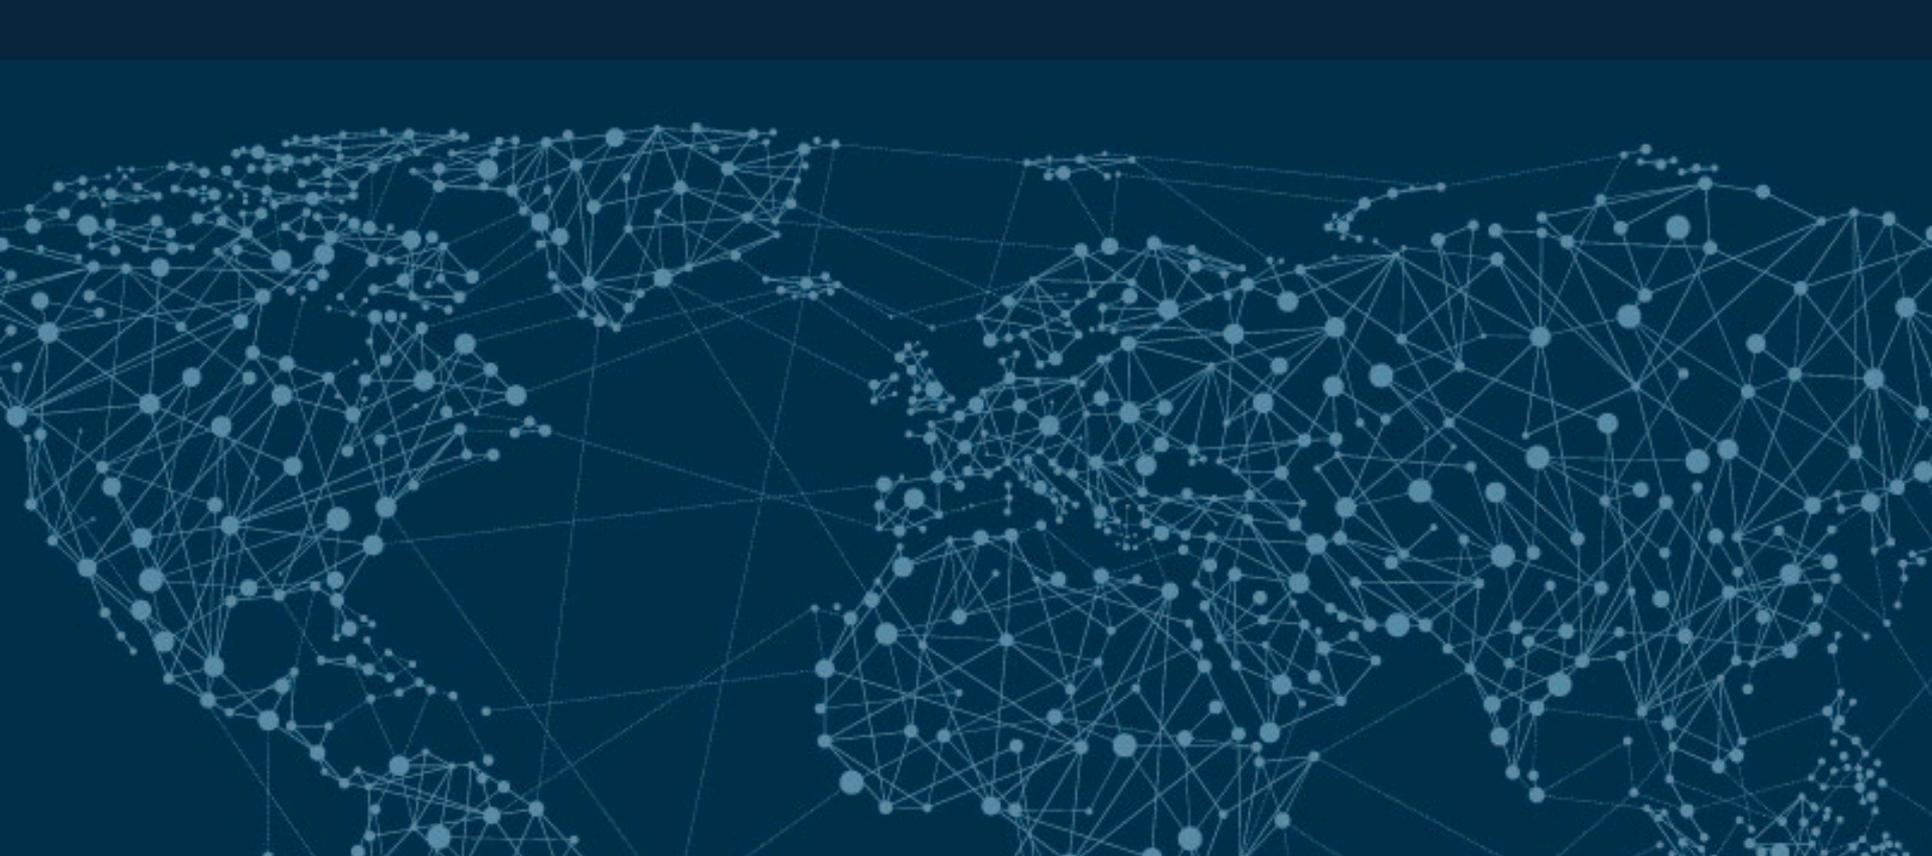

- ⦿ How have the newly implemented validation/verification requirements impacted various stakeholders:
 - ⦿ Registrars
 - ⦿ Intellectual Property Practitioners
 - ⦿ Businesses
 - ⦿ Registrants
 - ⦿ Law Enforcement Agents
 - ⦿ Others?

- ⦿ Should the requirements be updated or refined?
 - ⦿ Why?
 - ⦿ How?
 - ⦿ When?

A world map where the continents are defined by a complex network of white dots and thin white lines, resembling a social network or a data visualization. The background is a solid dark blue color.

Questions on the RAA Review?

The Future of Whois: Next Generation RDS

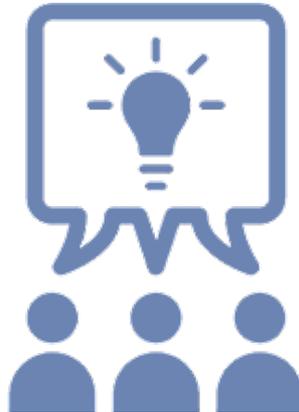

EP-WG | ICANN-52 | 9 February 2015

About the EWG Process WG (EP-WG)

- ICANN Board is considering how to use the Expert Working Group (EWG) Final Report on Registration Directory Services (RDS) as input to a GNSO Policy Development Process (PDP) WG
- The EP-WG is a collaboration between the GNSO and the Board, formed to recommend how to best structure PDP(s) for success

Board Members

- Cherine Chalaby
- Steve Crocker
- Chris Disspain
- Ram Mohan
- Ray Plzak
- Bruce Tonkin

GNSO Members

- James Bladel, RrSG
- Don Blumenthal, RySG
- Ching Chiao, RySG
- Avri Doria, NCSG
- Susan Kawaguchi, BC
- Dan Reed, Nom Com Appointee
- Jonathan Robinson, GNSO Chair

Where Are We in the PDP Process?

GNSO Policy Development Process *Summarized

*Some steps omitted, for brevity.

GNSO PDP Materials: <http://gns0.icann.org/en/node/31379/>

Where Are We in the PDP Process?

Nov 2012	Board	<input checked="" type="checkbox"/> Direct preparation of a (PDP) Issue Report
Nov 2012	Board	<input checked="" type="checkbox"/> Launch the EWG
Mar 2013	Staff	<input checked="" type="checkbox"/> PDP - Preliminary Issue Report
Mar-Apr 2013	Community	<input checked="" type="checkbox"/> Public Comment Forum (on above)
Jun 2013	EWG	<input checked="" type="checkbox"/> EWG Initial Report
Jun-Aug 2013	Community	<input checked="" type="checkbox"/> Public Comment Forum, Consultations (on above)
Nov 2013	EWG	<input checked="" type="checkbox"/> EWG Update Report
Dec-Feb 2014	Community	<input checked="" type="checkbox"/> Public Comment Forum, Consultations (on above)
Jun 2014	EWG	<input checked="" type="checkbox"/> EWG Final Report
Oct 2014- Feb 2015	EP-WG	<input checked="" type="checkbox"/> Develop Recommendations on PDP WG Process and Charter Guidance
Mar 2015	Staff	<input type="checkbox"/> New Preliminary Issue Report reflecting EP-WG output
May-Jun 2015	Community	<input type="checkbox"/> Public Comment Period on New Issue Report
July 2015	Staff	<input type="checkbox"/> Final Issue Report reflecting Public Comments
Aug-Sep 2015	GNSO Council	<input type="checkbox"/> Refine Charter for PDP Working Group
	GNSO Council	<input type="checkbox"/> Adopt Charter (start of PDP WG process)

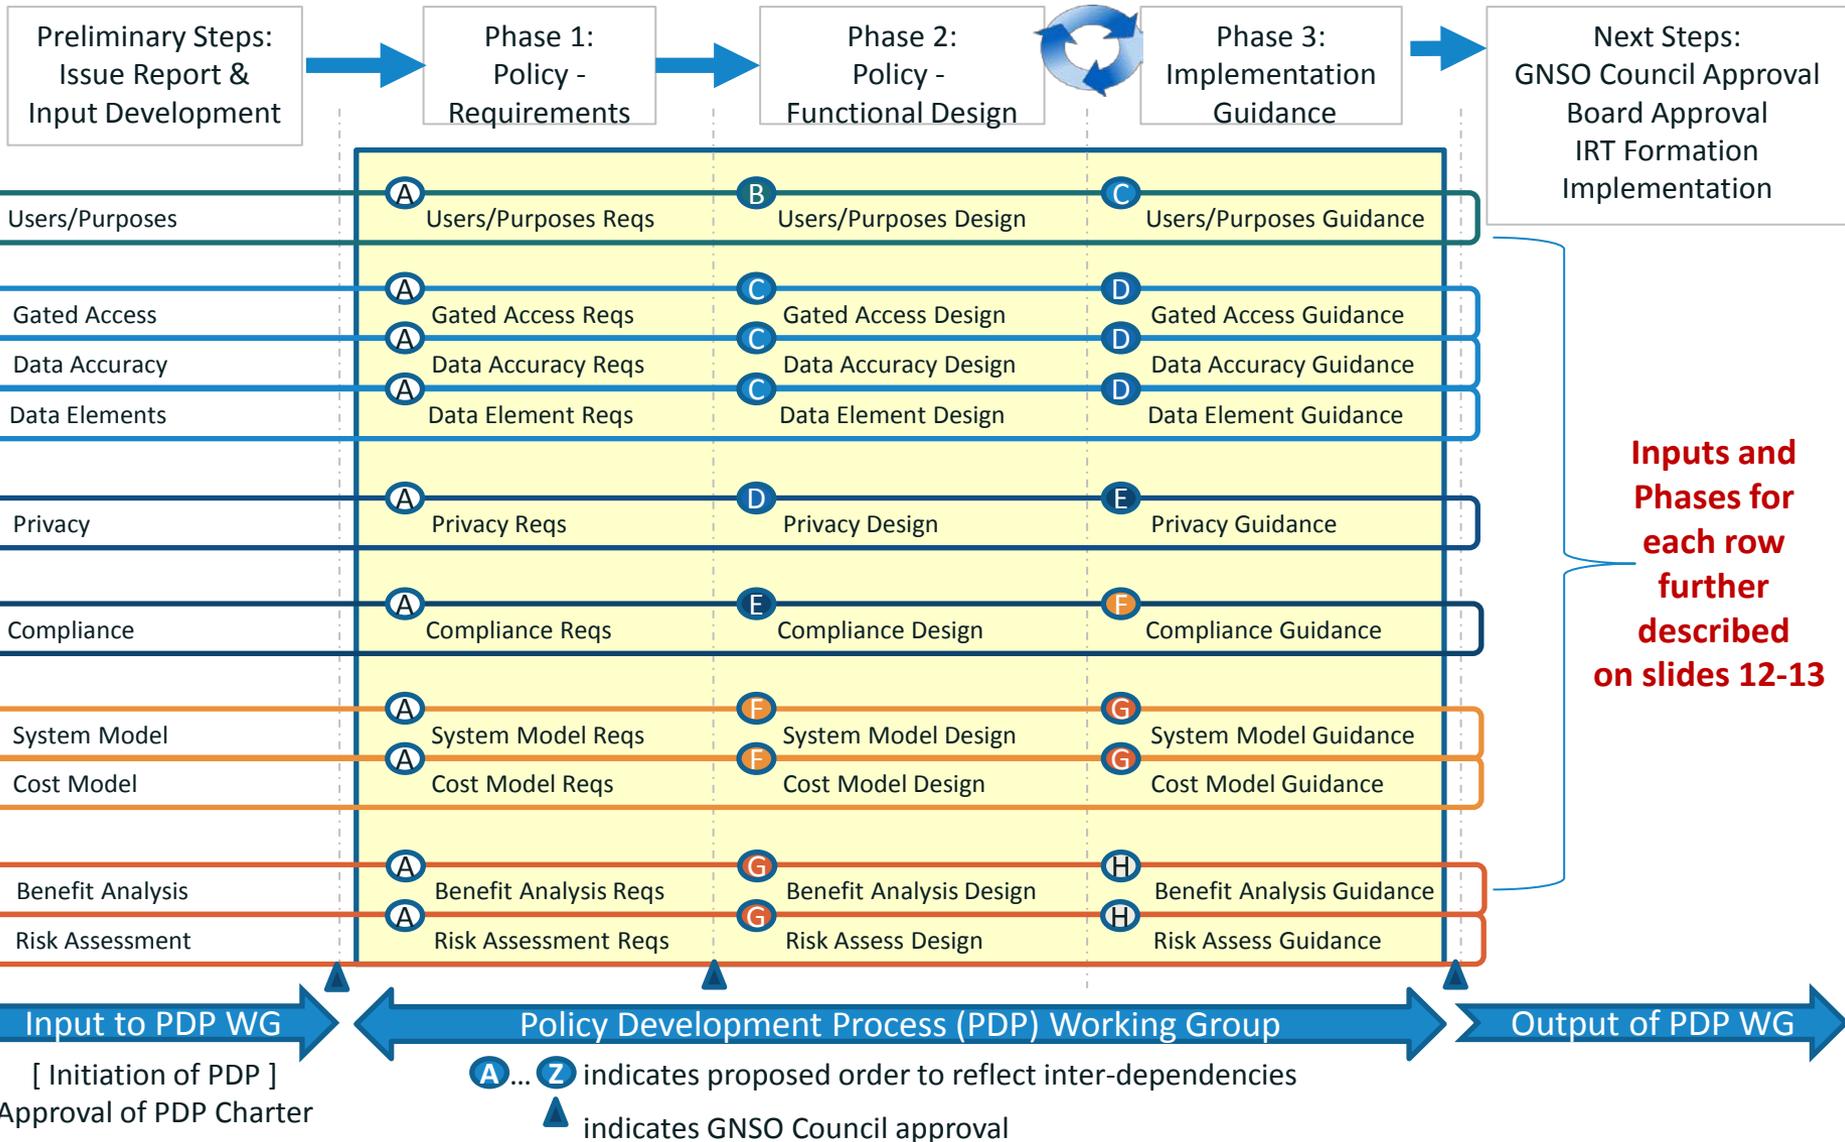

EP-WG Recommendations for RDS PDP WG

- ⦿ The EP-WG recommends a 3-Phase PDP WG approach:
<https://community.icann.org/download/attachments/49359624/RDS-PDP-Process-v8.pdf>
- ⦿ Groups and sequences principles in the EWG's Final Report
 - ⦿ Phase 1: Policy Requirements Definition (WHY)
 - ⦿ Phase 2: Policy Functional Design (WHAT)
 - ⦿ Phase 3: Implementation Guidance (HOW)
- ⦿ Pre-WG Steps: New Issue Report (including needed inputs and draft PDP WG Charter); Public Comment; Final Issue Report; GNSO Council consideration; PDP WG formation.
- ⦿ Post-WG Steps: GNSO Council and Board Approval; IRT Formation; Implementation informed by PDP WG guidance

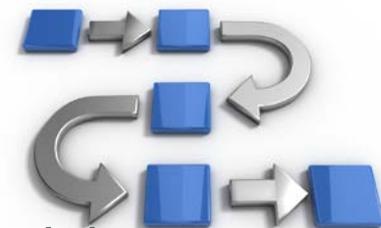

Flow
Charts

Recommended 3-phase Process Flow

Recommended Methodology and Timeline

- Oversight
 - GNSO Council should **approve Phase 1 outputs** before the PDP WG proceeds to Phase 2
 - To ensure alignment with Phase 1 requirements, oversight should be provided by **GNSO PDP WG coordination team**
- Timeline
 - To foster sustained progress and timely completion, the WG should work towards a **defined timeline and targets**
 - Phases 2-3 contain opportunities for parallel progress, sequenced for **inter-dependencies**, subject to **resourcing**
- Methodology
 - In addition to regular calls, PDP WG may hold **periodic face-to-face meetings**, including subteam and plenary meetings

Next Step: Issue Report, Handoff to GNSO

- ⦿ Informal community feedback on EP-WG's process recommendations welcomed at **ICANN-52** “[All Things Whois](#)”
- ⦿ At the ICANN Board's request, Staff will use EP-WG's output to draft a **new Preliminary Issue Report in March 2015**, including EP-WG's recommended process and a draft charter that will factor in this recommended process
- ⦿ Formal community feedback invited on this new Preliminary Issue Report during **public comment period (April-May 2015)**
- ⦿ **Final Issue Report** reflecting comments expected in July
- ⦿ GNSO Council will consider Final Issue Report and proposed Charter for PDP WG, followed by formation of PDP WG

Next Steps (using PDP WG's output)

* See GDD Consensus Policies Implementation Framework for further details on each phase

The background of the slide is a dark blue color. Overlaid on this is a stylized world map. The map is not a solid shape but is composed of a complex network of white lines connecting numerous small white circular nodes. These nodes and lines are distributed across the entire frame, with a higher density in the central and right-hand portions, creating a sense of global connectivity and data flow.

Annex: WHOIS Activity by Category

I. IMPLEMENTATION

WHOIS Activity	Description	Type of Activity	Timeline & Milestones	Related Activities
<p>WHOIS Accuracy/GAC Safeguard Advice on WHOIS Verification and Checks</p>	<p>The new WHOIS Online Accuracy Reporting System is a key project linked to ICANN's strategic initiative to improve the overall effectiveness and accuracy of the WHOIS system. In response to the recommendations of the WHOIS Review Team, the system is designed to produce statistical reports on WHOIS accuracy rates. These reports will be made available on the WHOIS website on a periodic basis, providing visibility and transparency into whether accuracy levels are improving over time. ICANN will also rely on this system to comply with the GAC Beijing Advice regarding WHOIS verification and checks.</p>	<p>Contract implementation; WHOIS Review Team Recommendation implementation</p>	<ul style="list-style-type: none"> • Pilot Program RFP published, May 2014 • Contracts executed, Aug. 2014 • Preliminary Findings published, Oct. 2014 • Community feedback on Pilot Preliminary Findings, Oct. 2014 • Publication of Final Pilot Report, Dec. 2014 • Public Comment Forum, Dec. 2014 – Feb. 2015 • IAG to be formed to recommend process for the follow-up procedure, Jan. 2015 • Launch of Compliance Pilot on the ARS Pilot Study findings, Jan. 2015 • Initiate modifications to Accuracy Reporting System, Mar. 2015 • Launch of Accuracy Reporting System – Phase I (Syntactic validation), mid 2015 • Launch of Accuracy Reporting System – Phase II (Operational validation), late 2015 • Launch of Accuracy Reporting System – Phase III (Identity validation), TBD • IAG Process Recommendations published for public comment, TBD • IAG Process finalized & launched, TBD 	

WHOIS Activity	Description	Type of Activity	Timeline & Milestones	Related Activities
WHOIS Conflicts with National Privacy Laws	<p>Mandatory review of the effectiveness of the procedure under which registries and registrars may seek modification of their contractual WHOIS requirements in light of a conflict with national law.</p> <p>Currently, the process may only be invoked by the contracted party upon receiving notification of an investigation, litigation, regulatory proceeding or other government or civil action that might affect its compliance with the provisions of the RAA or other contractual agreement with ICANN dealing with the collection, display or distribution of personally identifiable data via WHOIS.</p>	Contract implementation	<ul style="list-style-type: none"> • Staff paper posted for public comment, May 2014 • Comment period open, May – Aug. 2014 • Analysis/proposed next steps provided to GNSO; call for volunteers to form Implementation Advisory Group (IAG) and update procedure, ICANN 51/LA, Oct. 2014 • IAG formed to recommend changes to the procedure, not the policy, Dec. 2014 • IAG submits recommendations to GNSO to ensure they are consistent with existing GNSO policy, June 2015 • Board reviews recommended changes to procedure, TBD 	

WHOIS Activity	Description	Type of Activity	Timeline & Milestones	Related Activities
Implementation of Thick WHOIS – Consistent Labeling and Display of WHOIS across all current thick gTLDs	Implement recommendation #1 from the Final Report of the Thick WHOIS Policy Development Process for all current thick gTLDs	Policy implementation	<ul style="list-style-type: none"> Initial Draft Implementation Plan for Consistent Labeling and Display, Jan. –Feb. 2015 Final Implementation Plan for Consistent Labeling and Display, May 2015 Announcement of Policy Effective Date on Consistent Labeling and Display, July 2015 Implementation of Consistent Labeling and Display by Registries and Registrars, Aug. 2015 – Jan. 2016 Policy Effective Date for Consistent Labeling and Display, Jan. 2016 	
Implementation of Thick WHOIS – Transition from thin to thick WHOIS for .COM, .NET and .JOBS	Implement recommendation #1 and #3 from the Final Report of the Thick WHOIS Policy Development Process for the thin WHOIS gTLDs (.COM, .NET and .JOBS)	Policy Implementation	<ul style="list-style-type: none"> Initial Draft Implementation Plan for transition of .COM, .NET, .JOBS, April – May 2015 Final Implementation Plan for the transition, July – Aug. 2015 Implementation of the transition of .COM, .NET, .JOBS by Registries and Registrars, Aug. 2015 – Aug. 2016/Jan. 2017 Policy Effective Date for Transition from Thin to Thick, Aug. 2016 – Jan. 2017 	

WHOIS Activity	Description	Type of Activity	Timeline & Milestones	Related Activities
Cross-Field Address Data Validation Requirements	The WHOIS Accuracy Program Specification of the 2013 RAA requires registrars to validate that all postal address fields are consistent across fields (for example: street exists in city, city exists in state/province, city matches postal code) where such information is technically and commercially feasible for the applicable country or territory.	Contract specification	<ul style="list-style-type: none"> Registrar working group was formed to ascertain the availability of technically and commercially feasible tools for cross-field validation. The group was dormant during the rollout of the 2013 RAA but is currently being reinitiated. Proposed validation requirements/specifications to be developed by mid-2015. Registrar Working Group to vote on technical and commercial feasibility in mid-to-late 2015. If approved, requirements become effective 180 days after ICANN announces the approval. 	
Review of RAA WHOIS Accuracy Program Specification	Terms and conditions of the WHOIS Accuracy Program Specification to be reviewed by ICANN in consultation with the Registrar Stakeholder Group on or about the first anniversary of the date that the RAA is first executed by a registrar.	Contract implementation	<ul style="list-style-type: none"> ICANN is planning the approach and proposed methodology for the review Initial discussions with the leadership of the Registrar Stakeholder Group began in December 2014 ICANN plans to solicit community feedback beginning in January 2015 and meet with registrars in Singapore in February 2015 Results of the review will determine 'next steps' 	

WHOIS Activity	Description	Type of Activity	Timeline & Milestones	Related Activities
Internationalized Registration Data (IRD)	WHOIS RT made recommendations to charter a new IRD group to look at requirements holistically and to make recommendations in this area.	Recommendations to form basis for further policy work and contract discussions; WHOIS Review Team Recommendation implementation.	<ul style="list-style-type: none"> Announcement for IRD Team, including call for applicants, July 2013 IRD Team selected, Sept. 2013 Preliminary Report published, June 2014 Interim Report from the Expert Working Group on Internationalized Registration Data published, April 2014 Interim Report posted for public comment, April – July 2014 Report of Public Comments on Interim Report published, 2 September 2014 Final Report publication, 1Q2015 Board consideration following public comment, 2Q2015 	<p>GNSO PDP Working Group on Translation and Transliteration of Contact Information</p> <p>Expert Working Group on Next Generation gTLD Directory Services</p> <p>IETF WEIRDS work</p>
